Deep Space - Govert Schilling 2014-11-04

Govert Schilling explores the mysteries of space that lie beyond our solar system on this mind-bending trip to nebulae, galaxies, black holes, and the edge of the observable universe. Join Govert Schilling on a journey across the universe that will ignite the imagination. The trip begins inside our own solar system with a brief tour of the sun, the planets and their moons, asteroids, comets, and dwarf planets. We then accelerate into deep space, traveling from our interstellar neighborhood, through our own galaxy, the Milky Way, to the far reaches of the cosmos. With Schilling as our guide, we explore the birth of stars and stellar nurseries, such as the Orion and Carina Nebulae; the death of stars, from red giants to catastrophic supernova explosions; and galaxies and galaxy clusters beyond our own including spiral galaxies, elliptical galaxies, and lenticular galaxies. We learn about supermassive black holes, which astronomers now believe exist at the center of every galaxy including our own, and exoplanets, billions of which are believed to be orbiting stars in the Milky Way and beyond. The book concludes at the edge of the cosmological horizon with a look at dark matter, dark energy, and theories of extraterrestrial life and the Multiverse. Including hundreds of photographs and custom illustrations, as well as a star atlas that shows the full celestial sky, *Deep Space* is the perfect book for astronomy buffs, students, and anyone fascinated with the mystery and beauty of the cosmos.

The Image of the City - Kevin Lynch 1964-06-15

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller?

To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

"Surely You're Joking, Mr. Feynman!": Adventures of a Curious Character - Richard P. Feynman 2018-02-06

One of the most famous science books of our time, the phenomenal national bestseller that "buzzes with energy, anecdote and life. It almost makes you want to become a physicist" (*Science Digest*). Richard P. Feynman, winner of the Nobel Prize in physics, thrived on outrageous adventures. In this lively work that "can shatter the stereotype of the stuffy scientist" (*Detroit Free Press*), Feynman recounts his experiences trading ideas on atomic physics with Einstein and cracking the uncrackable safes guarding the most deeply held nuclear secrets—and much more of an eyebrow-raising nature. In his stories, Feynman's life shines through in all its eccentric glory—a combustible mixture of high intelligence, unlimited curiosity, and raging chutzpah. Included for this edition is a new introduction by Bill Gates.

With Keiko's *Power Wish Method*, you will learn to speak the language of the Moon and the stars--specifically, how to . . . wish upon the New Moon and the Full Moon--the phases when the Moon is available to help you; make your wishes using words of high vibration that have the greatest cosmic resonance and fortune-boosting potential; get the universe in the mood to help by embracing gratitude and positivity; time your wishes to harness the particular strengths of all twelve zodiac signs, such as the speed of Aries, the financial expertise of Taurus, and the transformative power of Scorpio. With Keiko as your astrological coach, you don't merely wait for the universe to fulfill your dreams; you become actively involved in charting a path for your life--and in finding the love, happiness, and

success you've always desired. "Astrology is not fortune telling, but rather the skill to read the energy of the stars." --Keiko A PENGUIN LIFE TITLE

Hello, Universe - Erin Entrada Kelly 2017-03-14

Winner of the Newbery Medal "A charming, intriguingly plotted novel."—Washington Post Newbery Medalist Erin Entrada Kelly's *Hello, Universe* is a funny and poignant neighborhood story about unexpected friendships. Told from four intertwining points of view—two boys and two girls—the novel celebrates bravery, being different, and finding your inner bayani (hero). "Readers will be instantly engrossed in this relatable neighborhood adventure and its eclectic cast of misfits."—Booklist In one day, four lives weave together in unexpected ways. Virgil Salinas is shy and kindhearted and feels out of place in his crazy-about-sports family. Valencia Somerset, who is deaf, is smart, brave, and secretly lonely, and she loves everything about nature. Kaori Tanaka is a self-proclaimed psychic, whose little sister, Gen, is always following her around. And Chet Bullens wishes the weird kids would just stop being so different so he can concentrate on basketball. They aren't friends, at least not until Chet pulls a prank that traps Virgil and his pet guinea pig at the bottom of a well. This disaster leads Kaori, Gen, and Valencia on an epic quest to find missing Virgil. Through luck, smarts, bravery, and a little help from the universe, a rescue is performed, a bully is put in his place, and friendship blooms. The acclaimed and award-winning author of *Blackbird Fly* and *The Land of Forgotten Girls* writes with an authentic, humorous, and irresistible tween voice that will appeal to fans of Thanhha Lai and Rita Williams-Garcia. "Readers across the board will flock to this book that has something for nearly everyone—humor, bullying, self-acceptance, cross-generational relationships, and a smartly fateful ending."—School Library Journal

Breaking The Habit of Being Yourself - Dr. Joe Dispenza 2013-02-15

Democracy and Education - John Dewey 1916

In this book, Dewey tries to criticize and expand on the educational philosophies of Rousseau and Plato. Dewey's ideas were seldom adopted in America's public schools, although a number of his prescriptions have been continually advocated by those who have had to teach in them.

Supermath - Anna Weltman 2020-09-01

Drawing on history and current events, Weltman tackles five fascinating questions: Is math the universal language? Can math eliminate bias? Can math predict the next move? Can math open doors? And finally, What is genuine beauty? *Supermath* is an enlightening book that pursues complex lines of mathematical thought while providing a fascinating lens into global problems and human culture as a whole.

The Last Book in the Universe - Rodman Philbrick 2013-03-01

This fast-paced action novel is set in a future where the world has been almost destroyed. Like the award-winning novel *Freak the Mighty*, this is Philbrick at his very best. It's the story of an epileptic teenager nicknamed Spaz, who begins the heroic fight to bring human intelligence back to the planet. In a world where most people are plugged into brain-drain entertainment systems, Spaz is the rare human being who can see life as it really is. When he meets an old man called Ryter, he begins to learn about Earth and its past. With Ryter as his companion, Spaz sets off an unlikely quest to save his dying sister -- and in the process, perhaps the world.

The Sun Is Kind of a Big Deal - Nick Seluk 2018-10-09

A hilarious nonfiction picture book from the New York Times bestselling author and creator of *Awkward Yeti*. Oh hey, guess what? The Sun never stops working to keep things on Earth running smoothly. (That's why it's been Employee of the Month for 4.5 billion years.) So why does the Sun get to be the center of attention? Because it's our solar system's very own star! This funny and factual picture book from *Awkward Yeti* creator Nick Seluk explains every part of the Sun's big job: keeping our solar

system together, giving Earth day and night, keeping us warm, and more. In fact, the Sun does so much for us that we wouldn't be alive without it. That's kind of a big deal. Each spread features bite-sized text and comic-style art with sidebars sprinkled throughout.

Anthropomorphized planets (and Pluto) chime in with commentary as readers learn about the Sun. For instance, Mars found someone's rover. Earth wants the Sun to do more stuff for it. And Jupiter just wants the Sun's autograph. Funny, smart, and accessible, *The Sun Is Kind of a Big Deal* is a must-have!

At Home on the Earth - David Landis Barnhill 1999-08-05

"The physical earth is clearly under unprecedented siege—heated, toxified, scraped. But almost as if they were antibodies, the finest nature writers of any era have come forward to help in the fight. This anthology collects many of the most important, at their most eloquent. May it ring and echo and do some good!"—Bill McKibben, author of *The End of Nature* "This is a stunning collection of vivid writing about landscapes and the people who inhabit them. The diverse narratives gathered here do more than describe hawks diving and twigs snapping, although the book has its share of moving accounts of the natural world. A concern to live responsibly in nature runs through this evocative anthology like a subterranean stream, and that moral impulse, together with the lively prose, makes this the best collection of nature writing I've seen."—Thomas A. Tweed, editor of *Retelling U.S. Religious History*

An Immense World - Ed Yong 2022-06-21

NEW YORK TIMES BESTSELLER • A "thrilling" (The New York Times), "dazzling" (The Wall Street Journal) tour of the radically different ways that animals perceive the world that will fill you with wonder and forever alter your perspective, by Pulitzer Prize-winning science journalist Ed Yong "One of this year's finest works of narrative nonfiction."—Oprah Daily ONE OF THE TEN BEST BOOKS OF THE YEAR: The Wall Street Journal, The New York Times, Time, People, The Philadelphia Inquirer, Slate, Reader's Digest, Outside, Publishers Weekly, BookPage ONE OF

THE BEST BOOKS OF THE YEAR: Oprah Daily, The New Yorker, The Washington Post, The Guardian, Smithsonian Magazine, Prospect (UK), Mental Floss, She Reads, Kirkus Reviews, Library Journal The Earth teems with sights and textures, sounds and vibrations, smells and tastes, electric and magnetic fields. But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth's magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile's scaly face is as sensitive as a lover's fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called "the only true voyage . . . not to visit strange lands, but to possess other eyes." WINNER OF THE ANDREW CARNEGIE MEDAL • FINALIST FOR THE KIRKUS PRIZE • FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE AWARD • LONGLISTED FOR THE PEN/E.O. WILSON AWARD

Test of Faith - Bonnie S. Hirst 2019-09-24

Bonnie S. Hirst is a woman of faith who has always believed that everything in life works out for the best. So, when her daughter, Lacey, is accused of a terrible crime, although Bonnie is devastated, she is also convinced that God will protect her family from harm. He always has, after all. But when her prayers are not answered and Lacey is sentenced to life in prison, Bonnie questions every aspect of her existence: her beliefs, her role as a mother, and the purpose behind the events that are tearing her family apart. As Bonnie and her family navigate the complicated labyrinth of the legal system, she struggles with the duality of presenting a façade of being okay on the outside and screaming for air on the inside. Finally, she is guided to ask for help—a concept previously foreign to her—and is rewarded with a bubble of friends who surround her and her family with love. Poignant, hopeful, and ultimately uplifting, *Test of Faith* is the story of one mother's spiritual journey of awareness—and her discovery that even when your life seems to have radically veered off course, there are always blessings to be found, if you can just keep your heart open enough to receive them.

Scripting the Life You Want - Royce Christyn 2020-04-07

A step-by-step guide to the process of "scripting" your future and successfully manifesting what you want in life • Explores the science behind how the scripting method works and shares the vivid journal entries from the author's big breakthrough--when he successfully used his method to land a lead role on a TV show • Details how the understanding of incredible new (and, until now, mostly unheard of) scientific discoveries and emerging technologies is the most important key to creating and manifesting in your life • Reveals fun, easy tools for manifesting and self-help, updated for a new generation In this step-by-step guide, filled with success stories and practical exercises, Royce Christyn details a simple "scripting" process for harnessing the Law of Attraction and manifesting what you want in your life--happiness, wealth, travel, love, health, the perfect career, or simply a productive day. The process is backed by science and experience, yet it feels like magic. And all you need is a pen and paper. Inspired by New Thought and Positive Thinking classics, Christyn explains how he developed his scripting method through 4 years of trial and error, keeping what worked and dropping what didn't until he brought his success rate from 5% to nearly 100%. Sharing pages from his own journals, he outlines how to create the life you want with daily journaling exercises, beginning with a simple list-making practice to figure out your wants and intentions and then progressing to actual scripting of your future, whether the next 12 hours or the next 10 days. He shows how, over time, your scripts will increase in accuracy until they converge with reality. He shares the vivid entries from his big breakthrough--when he successfully used his method to land a lead guest-starring role on Disney Channel's *Wizards of Waverly Place* with Selena Gomez. He explores how "feeling" your future success as you write your daily scripts helps attract your desired outcomes, and he shares the key phrases to include to make your script come true. The author also explores the science behind how the scripting method works, including a down-to-earth examination of quantum mechanics. From

small dreams to lifelong goals, this book gives you the tools to put your thoughts into action and finally close the gap between where you are and where you want to be in your life.

Freak the Mighty - Rodman Philbrick 2015-04-01

Culturally Responsive Approaches to Evaluation - Jill Anne Chouinard 2019-09-27

Evaluators have always worked in diverse communities, and the programs they evaluate are designed to address often intractable socio-political and economic issues. Evaluations that explicitly aim to be more responsive to culture and cultural context are, however, a more recent phenomenon. In this book, Jill Anne Chouinard and Fiona Cram utilize a conceptual framework that foregrounds culture in social inquiry, and then uses that framework to analyze empirical studies across three distinct cultural domains of evaluation practice (Western, Indigenous and international development). *Culturally Responsive Approaches to Evaluation* provide a comparative analysis of these studies and discuss lessons drawn from them in order to help evaluators extend their current thinking and practice. They conclude with an agenda for future research.

Planet Earth (A True Book) - Stephanie Warren Drimmer 2021-03-23

Decoding Reality - Vlatko Vedral 2012-02-23

For a physicist, all the world is information. The Universe and its workings are the ebb and flow of information. We are all transient patterns of information, passing on the recipe for our basic forms to future generations using a four-letter digital code called DNA. In this engaging and mind-stretching account, Vlatko Vedral considers some of the deepest questions about the Universe and considers the implications of interpreting it in terms of information. He explains the nature of

information, the idea of entropy, and the roots of this thinking in thermodynamics. He describes the bizarre effects of quantum behaviour — effects such as 'entanglement', which Einstein called 'spooky action at a distance', and explores cutting edge work on harnessing quantum effects in hyperfast quantum computers, and how recent evidence suggests that the weirdness of the quantum world, once thought limited to the tiniest scales, may reach into the macro world. Vedral finishes by considering the answer to the ultimate question: where did all of the information in the Universe come from? The answers he considers are exhilarating, drawing upon the work of distinguished physicist John Wheeler. The ideas challenge our concept of the nature of particles, of time, of determinism, and of reality itself. This edition includes a new foreword from the author, reflecting on changes in the world of quantum information since first publication. Oxford Landmark Science books are 'must-read' classics of modern science writing which have crystallized big ideas, and shaped the way we think.

Culturally Responsive Standards-Based Teaching - Steffen Saifer 2011
Teaching children from diverse backgrounds begins with simple questions: What is my culture? What are my students' cultures? How does culture affect how I teach and how my students learn? Can I learn to value and honour the unique experiences and cultures of my students? These are essential questions for educators with a sincere desire to help all students succeed. This comprehensive guide provides detailed examples that show why and how to create culturally responsive, standards-based (CRSB) instruction in the classroom, schoolwide, and at the district level. Results of effective programs include: increased academic success for all learners; engaged and motivated students; development of critical thinking skills necessary for higher learning; and strengthened partnerships between students, families, and communities. This new edition is enhanced with nationwide examples, up-to-date resources, and tools that can be implemented immediately. Principals, administrators, K - 12 teachers, curriculum and staff developers, and college instructors will find this handbook a valuable and powerful tool for promoting student engagement and improving struggling schools.

How to Lie with Maps - Mark Monmonier 2014-12-10

Originally published to wide acclaim, this lively, cleverly illustrated essay on the use and abuse of maps teaches us how to evaluate maps critically and promotes a healthy skepticism about these easy-to-manipulate models of reality. Monmonier shows that, despite their immense value, maps lie. In fact, they must. The second edition is updated with the addition of two new chapters, 10 color plates, and a new foreword by renowned geographer H. J. de Blij. One new chapter examines the role of national interest and cultural values in national mapping organizations, including the United States Geological Survey, while the other explores the new breed of multimedia, computer-based maps. To show how maps distort, Monmonier introduces basic principles of mapmaking, gives entertaining examples of the misuse of maps in situations from zoning disputes to census reports, and covers all the typical kinds of distortions from deliberate oversimplifications to the misleading use of color.

"Professor Monmonier himself knows how to gain our attention; it is not in fact the lies in maps but their truth, if always approximate and incomplete, that he wants us to admire and use, even to draw for ourselves on the facile screen. His is an artful and funny book, which like any good map, packs plenty in little space."—Scientific American "A useful guide to a subject most people probably take too much for granted. It shows how map makers translate abstract data into eye-catching cartograms, as they are called. It combats cartographic illiteracy. It fights cartophobia. It may even teach you to find your way. For that alone, it seems worthwhile."—Christopher Lehmann-Haupt, *The New York Times* ". . . witty examination of how and why maps lie. [The book] conveys an important message about how statistics of any kind can be manipulated. But it also communicates much of the challenge, aesthetic appeal, and sheer fun of maps. Even those who hated geography in grammar school might well find a new enthusiasm for the subject after reading Monmonier's lively and surprising book."—Wilson Library Bulletin "A reading of this book will leave you much better defended against cheap atlases, shoddy journalism, unscrupulous advertisers, predatory special-interest groups, and others who may use or abuse maps at your expense."—John Van Pelt, *Christian Science Monitor* "Monmonier meets his goal admirably. . . . [His] book should be put on every map user's 'must read' list. It is informative and readable . . . a big step forward in helping us to understand how maps can mislead their readers."—Jeffrey S. Murray, *Canadian Geographic*

A New Map for Relationships - Martin E. . Hellman 2016-08-20

transform an almost failed marriage into one where they reclaimed the true love that they felt when they first met fifty years ago. Surprisingly, they found that working on interpersonal and international challenges at the same time accelerated progress on both.

Entangled Life - Merlin Sheldrake 2020-05-12

NEW YORK TIMES BESTSELLER • A "brilliant [and] entrancing" (*The Guardian*) journey into the hidden lives of fungi—the great connectors of the living world—and their astonishing and intimate roles in human life, with the power to heal our bodies, expand our minds, and help us address our most urgent environmental problems. "Grand and dizzying in how thoroughly it recalibrates our understanding of the natural world."—Ed Yong, author of *I Contain Multitudes* ONE OF THE BEST BOOKS OF THE YEAR—Time, BBC Science Focus, The Daily Mail, Geographical, The Times, The Telegraph, New Statesman, London Evening Standard, Science Friday When we think of fungi, we likely think of mushrooms. But mushrooms are only fruiting bodies, analogous to apples on a tree. Most fungi live out of sight, yet make up a massively diverse kingdom of organisms that supports and sustains nearly all living systems. Fungi provide a key to understanding the planet on which we live, and the ways we think, feel, and behave. In *Entangled Life*, the brilliant young biologist Merlin Sheldrake shows us the world from a fungal point of view, providing an exhilarating change of perspective. Sheldrake's vivid exploration takes us from yeast to psychedelics, to the fungi that range for miles underground and are the largest organisms on the planet, to those that link plants together in complex networks known as the "Wood Wide Web," to those that infiltrate and manipulate insect bodies with devastating precision. Fungi throw our concepts of individuality and even intelligence into question. They are metabolic masters, earth makers, and key players in most of life's processes. They can change our minds, heal our bodies, and even help us remediate environmental disaster. By examining fungi on their own terms, Sheldrake reveals how these extraordinary organisms—and our relationships with them—are changing our understanding of how life works. Winner of the Wainwright Prize, the Royal Society Science Book Prize, and the Guild of Food Writers Award • Shortlisted for the British Book Award • Longlisted for the Rathbones Folio Prize

Albion's Seed - David Hackett Fischer 1991-03-14

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.
