[Language, Minorities and Human Rights](#) - Fernand de Varennes 2021-09-27

One of the most vexing issues in many of the world's so-called ethnic or minority conflicts is the question of language use by the State and its citizens. While international and national law has traditionally viewed language preference to be within a State's prerogative - at least when involving governmental activities and machinery - this position has proved to be a continuous source of acrimony and conflict, and wrong in some respects. Language, Minorities, and Human Rights is the most complete book ever written on the topic, providing for the first time an analysis of every aspect of language and the law. In addition to presenting a theoretical model for language's particular position and relevance in human rights, it constitutes an invaluable reference document by including the provisions of close to 100 international, multilateral and bilateral instruments involving language rights, as well as the constitutional provisions of 140 countries dealing with language. By addressing little explored areas such as the language rights of indigenous peoples, non-citizens and even the use of script, in addition to more traditional topics such as nationalism and language, freedom of expression and non-discrimination, Language, Minorities and Human Rights proposes a complete descriptive picture of language and human rights as well as proposing a number of suggestions on how to address and balance the many problems currently caused by the linguistic demands of various individuals and the interests of states in nation building.

[Voices of Angel Island](#) - Charles Egan 2020-12-10

Voices of Angel Island is a historical and literary anthology of the writings of immigrants detained at Angel Island, designed to provide a conduit for readers today to connect with early-20th-century perspectives on the process of "becoming American." The Angel Island Immigration Station in San Francisco Bay has been called the "Ellis Island of the West," but its purpose was quite different. It was primarily a detention center, established in large part to discourage immigration by Asians. The station barracks contain an extraordinary archive: hundreds of poems and prose records in half a dozen languages are on the walls, inscribed by immigrant detainees between 1910 and 1940, and by POWs and "enemy aliens" during World War II. Charles Egan draws on over a decade's work deciphering the wall inscriptions by Japanese, Chinese, Korean, European, and other detainees to assemble a selection of their writings in this book, alongside literary materials from Bay Area ethnic newspapers. While each inscription tells the story of an individual, taken together they illuminate the historical, economic, and cultural forces that shaped the lives of ordinary people in the early 20th century.

AAUSC 2014 Volume - Issues in Language Program Direction: Innovation and Accountability in Language Program Evaluation - Nicole Mills 2015-01-01

Despite rapid globalization within contemporary society and the seemingly obvious need for the study of foreign languages (FL) and cultures; recruitment to undergraduate FL degrees has dwindled, graduate

programs have disappeared; and institutions have restructured independent language departments into mega-departments of languages, literatures, and cultures. At the same time, the FL and humanities disciplines have engaged in "soul-searching" exercises in an effort to understand and express a renewed sense of value for the study of foreign language and culture. As a result of these kinds of societal and disciplinary movements, FL programs, along with other educational sectors, are facing the increased need to engage with peripheral forces like accountability and accreditation, to express and ensure their value through outcomes assessment, and to begin to think, innovate, and behave programmatically. Key to enacting these changes systematically and effectively is heightened awareness of the importance of program evaluation, not only as a means to demonstrate how and why FL study is a valuable pursuit in today's world, but also as a process through which sound improvements can be made, participants can learn, and educational relevance can be sought. [Language Matters](#) - Timothy Reagan 2009-04-01

"This book addresses a timely and very important topic: language in education. Language, apparently, is a very tricky business. On the one hand, everyone uses language, and virtually everyone has strong views about language. In the educational domain this seems to be especially true. Language is not merely an intrinsic component of the educational process as the medium of instruction in the classroom, but also serves as the mediator of social reality for students and teachers alike. It plays a central role in articulating and conveying not only social, cultural and empirical ideas, but ideological concepts as well. It is also used to make judgments about the speaker, not to mention its role in maintaining differential power relations. And yet, in spite of this, the role of language is not sufficiently recognized in classroom practice much of the time. Nor is language, except in fairly narrow ways, really an especially central part of the curriculum, in spite of its incredible importance. To be sure, we do spend a great deal of time and money attempting to teach students to read and write (that is, to provide them with basic literacy skills), and we provide nominal support for foreign language education programs. We also provide limited support for children coming to school who do not speak English. What we do not do, though, is to recognize the absolute centrality of language knowledge and language use for the educated person. This book seeks to address these issues from the broad perspective of critical pedagogy.

Foreign Language Teaching and the Environment - Charlotte Ann Melin 2019-10-01

At a time when environmental humanities and sustainability studies are creating new opportunities for curricular innovation, this volume examines factors key to successful implementation of cross-curricular initiatives in language programs. Contributors discuss theoretical issues pertinent to combining sustainability studies with foreign languages, describe curricular models transferable to a range of instructional contexts, and introduce program structures supportive of teaching cultures and languages across the curriculum. Exploring the intersection of ecocritical theory, second language acquisition research, and disciplinary fields, these essays demonstrate ways in which progressive language departments are being reconceived as relevant and viable programs of cross-disciplinary studies. They provide an introduction to teaching sustainability and environmental humanities topics in language, literature, and culture courses as well as a wide range of resources for teachers and diverse stakeholders in areas related to foreign language education.

[Introducing Pragmatics in Use](#) - Anne O'Keeffe 2019-10-22

Introducing Pragmatics in Use is a lively and accessible introduction to pragmatics which both covers theory and applies it to real spoken and written data. This textbook systematically draws on a number of different language corpora and the corresponding software applications. Its primary focus is the application of a corpus methodology in order to examine core component areas such as deixis, politeness, speech acts, language variation and register. The main goal of the book is to contextualise pragmatics in the study of language through the analysis of different language contexts provided by spoken and written corpora. Substantially revised and updated, this second edition covers a wider range of topics, corpora and software packages. It consistently demonstrates the benefits of innovative analytical synergies and extends this to how corpus pragmatics can be further blended with, for example, conversation analysis or variational pragmatics. The second edition also offers a new chapter specifically dedicated to corpus pragmatics which proposes a framework for both form-to-function and function-to-form approaches. The book also addresses the - sometimes thorny - area of the integration of the teaching of pragmatics into the language classroom. All chapters in the second edition include a number of cohesive, step-by-step tasks that can be done in small groups in class or can be used as self-study resources. A wide range of illustrative language samples drawn from a number of English language corpora, coupled with instructive tasks and annotated further reading sections, make this an ideal textbook for advanced undergraduate or postgraduate students of pragmatics, discourse analysis and corpus linguistics within applied languages / linguistics or TESOL programmes.

[English in Medical Education](#) - Peih-ying Lu 2012-08-13

This book addresses recent developments in medical and language education. In both fields, there have been methodological shifts towards 'task-based' and 'problem-based learning'. In addition, both fields have broadened their focus on clinical expertise and linguistic skills to address issues of cultural competence. English in Medical Education responds to these changes by re-imagining the language classroom in medical settings as an arena for the exploration of values and professional identity. The chapters cover topics such as the nature of cultural competence; how to understand spoken discourse in a range of medical settings; the use of tasks and problems in language education for medics; the development of critical skills and the use of literature and visual media in language education for doctors. It will interest everyone teaching English for Medical Purposes.

teachers, of all levels of experience.

[Incorporating Foreign Language Content in Humanities Courses](#) - Priya Ananth 2019-08-09

Incorporating Foreign Language Content in Humanities Courses introduces innovative ways to integrate aspects of foreign language study into courses containing humanities concepts. The edited collection offers case studies from various universities and across multiple languages. It serves as a useful guide to all foreign language faculty with any language expertise (as well as others interested in promoting foreign languages) for the adaptation and development of their own curricula. Infusing foreign language content into English-taught humanities courses helps promote languages as practical and relevant to students. It will be of interest to language educators, including teachers, teachers-in-training, teacher educators, and administrators.

Telecollaboration in Foreign Language Learning - Mark Warschauer 1996

Voices of Fire - Ku'ualoha Ho'omanawanui 2014

Stories of the volcano goddess Pele and her youngest sister Hi'iaka, patron of hula, are most familiar as a form of literary colonialism--first translated by missionary descendants and others, then co-opted by Hollywood and the tourist industry. But far from quaint tales for amusement, the Pele and Hi'iaka literature published between the 1860s and 1930 carried coded political meaning for the Hawaiian people at a time of great upheaval. Voices of Fire recovers the lost and often-suppressed significance of this literature, restoring it to its primary place in Hawaiian culture. Ku'ualoha ho'omanawanui takes up mo'olelo (histories, stories, narratives), mele (poetry, songs), oli (chants), and hula (dances) as they were conveyed by dozens of authors over a tumultuous sixty-eight-year period characterized by population collapse, land alienation, economic exploitation, and military occupation. Her examination shows how the Pele and Hi'iaka legends acted as a framework for a Native sense of community. Freeing the mo'olelo and mele from colonial stereotypes and misappropriations, Voices of Fire establishes a literary mo'okū'auhau, or genealogy, that provides a view of the ancestral literature in its indigenous contexts. The first book-length analysis of Pele and Hi'iaka literature written by a Native Hawaiian scholar, Voices of Fire compellingly lays the groundwork for a larger conversation of Native American literary nationalism.

English Linguistics, Literature, and Language Teaching in a Changing Era - Suwarsih Madya 2019-10-22

This book offers a wide range of topics for the scholar interested in the study of English in this unsettling era of disruption in our lives - from linguistics to literature to language teaching and learning. The chapters present snippets of thoughts and critical reflections, findings from action research and other methodologies, and essays on troubling topics for language teachers. The authors are researchers, experienced teachers, and students engaged in exploratory research. The many ideas and suggestions for further reflection and research will inspire teachers and researchers working in many different contexts, both educational and regional. There is something in this book for everybody.

Evaluation in Foreign Language Education in the Middle East and North Africa - Sahbi Hidri 2016-09-27

This book presents evaluation cases from the Middle East and North Africa (MENA) context, investigating the various facets of evaluation in different parts of the MENA region and beyond. In 19 chapters, it explores cases from Tunisia, Saudi Arabia, Egypt, Sudan, Syria, the UAE, Turkey, Iran and Morocco. The book highlights the impact of evaluation on a range of stakeholders, arguing that it has repercussions at the individual, societal, economic, cultural and political levels, that it also has an ethical dimension, and that it is tailored to people's needs, helping them to remain abreast of the effectiveness and efficiency of programs. Further, the book explores controversial issues concerning different evaluation themes, such as teacher and staff evaluation, assessment practices, text genre analysis evaluation, assessment of productive skills, textbook and ICT evaluation, evaluation of ELT certificates and programs, quality assurance, ESP needs analysis, assessment literacy, and dynamic assessment. It addresses key challenges, such as who the "right people" to implement evaluation are, and the appropriate use of evaluation results to avoid any misuse or harm to any stakeholder. In closing, the book calls for further research venues on the relevance of evaluation, testing and assessment in the MENA context and beyond.

Turkish Language, Literature, and History - Bill Hickman 2015-10-14

The twenty two essays collected in Turkish Language, Literature and History offer insights into Turkish culture in the widest sense. Written by leaders in their fields from North America, Europe and Turkey, these essays cover a broad range of topics, focusing on various aspects of Turkish language, literature and history between the eighth century and the present. The chapters move between ancient and contemporary literature, exploring Sultan Selim's interest in dream interpretation, translating newly uncovered poetry and exploring the works of Orhan Pamuk. Linguistic complexities of the Turkish language and dialects are analysed, while new translations of 16th century decrees offer insight into Ottoman justice and power. This is a festschrift volume published for the leading scholar Bob Dankoff, and the diverse topics covered in these essays reflect Dankoff's valuable contributions to the study of Turkish language and literature. This cross-disciplinary book offers contributions from academics specialising in linguistics, history, literature and sociology, amongst others. As such, it is of key interest to scholars working in a variety of disciplines, with a focus on Turkish Studies.

Language, Literature and the Learner - Ronald Carter 2014-09-25

Language, Literature and the Learner is an edited volume evolving from three international seminars devoted to the teaching of literature in a second or foreign language. The seminars explicitly addressed the interface between language and literature teaching to investigate the ways in which literature can be used as a resource for language growth at secondary, intermediate and upper-intermediate level. This book presents the reader with a practical classroom-based guide to how the teaching of language and literature, until recently seen as two distinct subjects within the English curriculum, can be used as mutually supportive resources within the classroom. Through essays and case studies it reports on the most recent developments in classroom practice and methodology and suggests ways in which the curriculum could be reshaped to take advantage of this integrated approach. The text will be essential reading for students undertaking PGCE, TESOL/MA, UCLES, CTEFLA, RSA and Teachers' Diploma courses worldwide. Students of applied linguistics, those on stylistics courses and undergraduates studying English language will welcome it as accessible supplementary reading.

Global Perspectives on Project-based Language Learning, Teaching, and Assessment - Gulbahar Beckett 2019-10-08

This volume provides a comprehensive account of project-based language learning (PBL) which showcases key theoretical approaches, empirical research, technological tools, and research-based frameworks to help further PBL implementation and research. Taking its cue from the conclusions drawn from project-based learning more broadly, which point to the impact of project-based work on learning and development, discourse socialization, subject engagement, and collaborative skills, the book highlights how these

discussions might be extended and enhanced within the context of language learning. The volume begins with discussions of philosophical and theoretical models of PBL and is followed by case studies from contributors from a range of learning contexts and geographic regions which demonstrate these models in practice, with a focus on the implementation of technology in such instances. The book also introduces resources for aligning projects with government standards in the classroom but also frameworks for researching and assessing PBL. This comprehensive collection is essential reading for students and researchers in language learning and teaching, language education, curriculum design, and applied linguistics.

Creating Effective Blended Language Learning Courses - Daria Mizza 2020-08-31

Blended language courses, which combine face-to-face and online instruction, are becoming increasingly popular due to the need for more flexible yet effective learning opportunities. This book recognizes the associated opportunities and challenges for teachers, and provides the rationale, strategies and tools to design blended learning courses or to guide the transition from fully face-to-face or fully online courses to blended instruction. The authors propose a framework based on four phases, Design, Build, Teach and Evaluate, which facilitates a systematic approach to course development. The volume simplifies the connection between theory and practice, by including examples that readers can relate to and immediately implement as they build or teach a course. Including case studies of successful implementations, and effective instructional strategies and techniques, this book is accessible even for teachers without previous experience in course design, whilst also acting as a reference for more experienced language educators.

Travels in Translation - Ken Frieden 2016-07-25

For centuries before its "rebirth" as a spoken language, Hebrew writing was like a magical ship in a bottle that gradually changed design but never voyaged out into the world. Isolated, the ancient Hebrew ship was torpid because the language of the Bible was inadequate to represent modern life in Europe. Early modern speakers of Yiddish and German gave Hebrew the breath of life when they translated dialogues, descriptions, and thought processes from their vernaculars into Hebrew. By narrating tales of pilgrimage and adventure, Jews pulled the ship out of the bottle and sent modern Hebrew into the world. In *Travels in Translation*, Frieden analyzes this emergence of modern Hebrew literature after 1780, a time when Jews were moving beyond their conventional Torah- and Zion-centered worldview. Enlightened authors diverged from pilgrimage narrative traditions and appropriated travel narratives to America, the Pacific, and the Arctic. The effort to translate sea travel stories from European languages—with their nautical terms, wide horizons, and exotic occurrences—made particular demands on Hebrew writers. They had to overcome their tendency to introduce biblical phrases at every turn in order to develop a new, vivid, descriptive language. As Frieden explains through deft linguistic analysis, by 1818, a radically new travel literature in Hebrew had arisen. Authors such as Moses Mendelsohn-Frankfurt and Mendel Lefin published books that charted a new literary path through the world and in European history. Taking a fresh look at the origins of

modern Jewish literature, Frieden launches a new approach to literary studies, one that lies at the intersection of translation studies and travel writing.
