Close to Shore - Michael Capuzzo 2002-06-25

Combining rich historical detail and a harrowing, pulse-pounding narrative, *Close to Shore* brilliantly re-creates the summer of 1916, when a rogue Great White shark attacked swimmers along the New Jersey shore, triggering mass hysteria and launching the most extensive shark hunt in history. In July 1916 a lone Great White left its usual deep-ocean habitat and headed in the direction of the New Jersey shoreline. There, near the towns of Beach Haven and Spring Lake--and, incredibly, a farming community eleven miles inland--the most ferocious and unpredictable of predators began a deadly rampage: the first shark attacks on swimmers in U.S. history. Capuzzo interweaves a vivid portrait of the era and meticulously drawn characters with chilling accounts of the shark's five attacks and the frenzied hunt that ensued. From the unnerving inevitability of the first attack on the esteemed son of a prosperous Philadelphia physician to the spine-tingling moment when a farm boy swimming in Matawan Creek feels the sandpaper-like skin of the passing shark, *Close to Shore* is an undeniably gripping saga. Heightening the drama are stories of the resulting panic in the citizenry, press and politicians, and of colorful personalities such as Herman Oelrichs, a flamboyant millionaire who made a bet that a shark was no match for a man (and set out to prove it); Museum of Natural History ichthyologist John Treadwell Nichols, faced with the challenge of stopping a mythic sea creature about which little was known; and, most memorable, the rogue Great White itself moving through a world that couldn't conceive of either its destructive power or its moral right to destroy. Scrupulously researched and superbly written, *Close to Shore* brings to life a breathtaking, pivotal moment in American history. Masterfully written and suffused with fascinating period detail and insights into the science and behavior of sharks, *Close to Shore* recounts a breathtaking, pivotal moment in American history with startling immediacy.

Blue Meridian - Peter Matthiessen 2012-05-31

In 1969 Peter Matthiessen set out with the expedition led by Peter Gimbel, whose aim was to find and film underwater for the first time the most dangerous of all sea creatures - the great white shark. Acting as the expedition's chronicler and spare hand (both on the surface and below),

Matthiessen accompanied the crew from the Caribbean to the whaling grounds off the Durban coast, to various islands in the Indian Ocean, to Ceylon, and finally to success off the bleak south coast of Australia. Blue Meridian records the awesome experience of swimming in open water among hundreds of sharks, the beauties of strange seas and landscapes and the camaraderie, humour and tension of people who live in close proximity and risk their lives day by day.

The Murder Room - Michael Capuzzo 2010-08-10

Thrilling, true tales from the Vidocq Society, a team of the world's finest forensic investigators whose monthly gourmet lunches lead to justice in ice-cold murders. Three of the greatest detectives in the world--a renowned FBI agent turned private eye, a sculptor and lothario who speaks to the dead, and an eccentric profiler known as "the living Sherlock Holmes"--were heartsick over the growing tide of unsolved murders. Good friends and sometime rivals William Fleisher, Frank Bender, and Richard Walter decided one day over lunch that something had to be done, and pledged themselves to a grand quest for justice. The three men invited the greatest collection of forensic investigators ever assembled, drawn from five continents, to the Downtown Club in Philadelphia to begin an audacious quest: to bring the coldest killers in the world to an accounting. Named for the first modern detective, the Parisian eugène François Vidocq--the flamboyant Napoleonic real-life sleuth who inspired Sherlock Holmes--the Vidocq Society meets monthly in its secretive chambers to solve a cold murder over a gourmet lunch. The Murder Room draws the reader into a chilling, darkly humorous, awe-inspiring world as the three partners travel far from their Victorian dining room to hunt the ruthless killers of a millionaire's son, a serial killer who carves off faces, and a child killer enjoying fifty years of freedom and dark fantasy. Acclaimed bestselling author Michael Capuzzo's brilliant storytelling brings true crime to life more realistically and vividly than it has ever been portrayed before. It is a world of dazzlingly bright forensic science; true evil as old as the Bible and dark as the pages of Dostoevsky; and a group of flawed, passionate men and women, inspired by their own wounded hearts to make a stand for truth, goodness, and justice in a world gone mad.

Man in a Grey Suit - Glenn Orgias 2012-07-02

One twilight, Glenn Orgias was surfing at Bondi Beach when the worst happened: he was attacked by a shark, a 'man in a grey suit', as surfers call them. Although it suddenly released him, Glenn still thought his life was over - he was 80 metres from shore with one almost severed arm, losing blood and strength fast, and the great white shark was somewhere below. All he could think about was his wife, Lisa, who was four months pregnant. Man in a Grey Suit is a powerful memoir about overcoming life's obstacles, large and small. It's the story of how surfing helped Glenn find some release from the anger and anxiety he felt growing up, and how something that so nearly killed him actually helped turn his life around. This is a brave, honest and moving account of how an ordinary man dealt with an extraordinary event. 'He frankly and fiercely taps into Australians' deepest fear.' Robert Drewe 'Sometimes we all wonder if we could cope with the worst that life could throw at us. Glenn Orgias has been there, and has come through. His strength of character lies not in what he lost, but in what he's always had.' Malcolm Knox 'In crisp, punchy prose, he shows us why his life is fuller now than before.' Fiona Capp, The Age 'This moving and utterly gripping true story is a testament to the bravery and guts that human beings can display when truly pushed to the brink.' Herald Sun

Shark Attacks - Blake Chapman 2017-11

Humans spend more time in or on the water than ever before. We love the beach. But for many people, getting in the water provokes a moment's hesitation. Shark attacks are big news events and although the risk of shark attack on humans is incredibly low, the fact remains that human lives are lost to sharks every year. Shark Attacks explores the tension between risk to humans and the need to conserve sharks and protect the important ecological roles they play in our marine environments. Marine biologist Blake Chapman presents scientific information about shark biology, movement patterns and feeding behaviour. She discusses the role of fear in the way we think about sharks and the influence of the media on public perceptions. Moving first-hand accounts describe the deep and polarising psychological impacts of shark attacks from a range of perspectives. This book is an education in thinking through these emotive events and will help readers to navigate the controversial issues around mitigating shark attacks while conserving the sharks themselves.

Shark Attacks of the Twentieth Century - Ralph S. Collier 2003

This is the single most historically valuable book ever written on the subject of Pacific Coast shark attacks. Through bone-chilling accounts in victims' own words, never before published photographs, and detailed maps and charts of attack locations, this book accurately chronicles every known unprovoked shark attack that occurred along the Pacific Coast of North America during the entire Twentieth Century. The author's examination of wound characteristics, recurring locations, and the curious phenomenon of attacks on inanimate objects afford astonishing insights into why sharks attack. These insights form the foundation for his safety recommendations to specific ocean user groups. Based on 40 years' of research, this book will be of inestimable value to scientists, researchers and educators, as well as anyone that might venture into the waters off the Pacific Coast. The understanding gained from this book will temper fears with knowledge and provide the reader with clear and specific information that may easily make the difference between life and death.

What the Eyes Don't See - Mona Hanna-Attisha 2018-06-19

A NEW YORK TIMES NOTABLE BOOK • The dramatic story of the Flint water crisis, by a relentless physician who stood up to power. "Stirring . . . [a] blueprint for all those who believe . . . that 'the world . . . should be full of people raising their voices.'"—The New York Times "Revealing, with the gripping intrigue of a Grisham thriller." —O: The Oprah Magazine Here is the inspiring story of how Dr. Mona Hanna-Attisha, alongside a team of researchers, parents, friends, and community leaders, discovered that the children of Flint, Michigan, were being exposed to lead in their tap water—and then battled her own government and a brutal backlash to expose that truth to the world. Paced like a scientific thriller, *What the Eyes Don't See* reveals how misguided austerity policies, broken democracy, and callous bureaucratic indifference placed an entire city at risk. And at the center of the story is Dr. Mona herself—an immigrant, doctor, scientist, and mother whose family's activist roots inspired her pursuit of justice. *What the Eyes Don't See* is a riveting account of a shameful disaster that became a tale of hope, the story of a city on the ropes that came together to fight for justice, self-determination, and the right to build a better world for their—and all of our—children. Praise for *What the Eyes Don't See* "It is one thing to point out a problem. It is another thing altogether to step up and work to fix it. Mona Hanna-Attisha is a true American hero."—Erin Brockovich "A clarion call to live a life of purpose."—The Washington Post "Gripping . . . entertaining . . . Her book has power precisely because she takes the events she recounts so personally. . . . Moral outrage present on every page."—The New York Times Book Review "Personal and emotional. . . She vividly describes the effects of lead poisoning on her young patients. . . . She is at her best when recounting the detective work she undertook after a tip-off about lead levels from a friend. . . . 'Flint will not be defined by this crisis,' vows Ms. Hanna-Attisha."—The Economist "Flint is a public health disaster. But it was Dr. Mona, this caring, tough pediatrician turned detective, who cracked the case."—Rachel Maddow

Forced to step in, Ford finds himself involved in a story of intrigue and revenge that becomes more dangerous with every turn—and some of them hit pretty close to home. Add to that a Bahamian relative he never knew he had, a letter leading to a treasure that may or may not exist, and some past history that becomes very alarmingly present, and his life has suddenly become very complicated. The Devil's Teeth - Susan Casey 2006-05-30

A journalist's obsession brings her to a remote island off the California coast, home to the world's most mysterious and fearsome predators—and the strange band of surfer-scientists who follow them. Susan Casey was in her living room when she first saw the great white sharks of the Farallon Islands, their dark fins swirling around a small motorboat in a documentary. These sharks were the alphas among alphas, some longer than twenty feet, and there were too many to count; even more incredible, this congregation was taking place just twenty-seven miles off the coast of San Francisco. In a matter of months, Casey was being hoisted out of the early-winter swells on a crane, up a cliff face to the barren surface of Southeast Farallon Island—dubbed by sailors in the 1850s the "devil's teeth." There she joined Scot Anderson and Peter Pyle, the two biologists who bunk down during shark season each fall in the island's one habitable building, a haunted, 135-year-old house spackled with lichen and gull guano. Two days later, she got her first glimpse of the famous, terrifying jaws up close and she was instantly hooked; her fascination soon yielded to obsession—and an invitation to return for a full season. But as Casey readied herself for the eight-week stint, she had no way of preparing for what she would find among the dangerous, forgotten islands that have banished every campaign for civilization in the past two hundred years. *The Devil's Teeth* is a vivid dispatch from an otherworldly outpost, a story of crossing the boundary between society and an untamed place where humans are neither wanted nor needed.

The Children's Blizzard - David Laskin 2009-10-13

"David Laskin deploys historical fact of the finest grain to tell the story of a monstrous blizzard that caught the settlers of the Great Plains utterly by surprise. . . . This is a book best read with a fire roaring in the hearth and a blanket and box of tissues near at hand." — Erik Larson, author of *The Devil in the White City* "Heartbreaking. . . . This account of the 1888

blizzard reads like a thriller." — Entertainment Weekly The gripping true story of an epic prairie snowstorm that killed hundreds of newly arrived settlers and cast a shadow on the promise of the American frontier. January 12, 1888, began as an unseasonably warm morning across Nebraska, the Dakotas, and Minnesota, the weather so mild that children walked to school without coats and gloves. But that afternoon, without warning, the atmosphere suddenly, violently changed. One moment the air was calm; the next the sky exploded in a raging chaos of horizontal snow and hurricane-force winds. Temperatures plunged as an unprecedented cold front ripped through the center of the continent. By the next morning, some five hundred people lay dead on the drifted prairie, many of them children who had perished on their way home from country schools. In a few terrifying hours, the hopes of the pioneers had been blasted by the bitter realities of their harsh environment. Recent immigrants from Germany, Norway, Denmark, and the Ukraine learned that their free homestead was not a paradise but a hard, unforgiving place governed by natural forces they neither understood nor controlled. With the storm as its dramatic, heartbreaking focal point, *The Children's Blizzard* captures this pivotal moment in American history by tracing the stories of five families who were forever changed that day. David Laskin has produced a masterful portrait of a tragic crucible in the settlement of the American heartland. The P.S. edition features an extra 16 pages of insights into the book, including author interviews, recommended reading, and more.

Flaws - Christopher L. Pepin-Neff 2019-02-20

This book examines the policymaking process following highly emotional events. It focuses on the politics of shark "attacks" by looking at policy responses to tragic shark bites in Florida, Australia, and South Africa. The book reviews these cases by identifying the flaws in the human-shark relationship, including the way sharks are portrayed as the enemy, the way shark bites are seen as intentional, and how policy responses appear to be based on public safety. *Flaws* identifies politicians as the true sharks of this story for their manipulation of tragic circumstances to protect their own interests. It argues that shark bites are ungovernable accidents of nature, and that we are "in the way, not on the menu."

Sharks in the Shallows - W. Clay Creswell 2021-06-14

A detailed account of over one hundred shark-related incidents on the coast of the Carolinas from a shark-bite investigator. Powerful and mysterious, sharks inspire both fascination and fear. Worldwide, oceans are home to some five-hundred species, and of those, fifty-six are known to reside in or pass through the waters off the coast of both North and South Carolina. At any given time, waders, swimmers, and surfers enjoying these waters are frequently within just one-hundred feet of a shark. While it's unnerving to know that sharks often swim just below the surface in the shallows, W. Clay Creswell, a shark-bite investigator for the Shark Research Institute's Global Shark Attack File, explains that attacks on humans are extremely rare. In 2019 the International Shark Attack File confirmed sixty-four unprovoked attacks on humans, including three in North Carolina and one in South Carolina. While acknowledging that they pose real dangers to humans, Creswell believes the fear of sharks is greatly exaggerated. During his sixteen-year association with the Shark Research Institute, he has investigated more than one hundred shark-related incidents and has maintained a database of all shark-human encounters along the Carolina coastlines back to 1817. Creswell uses this data to expose the truth and history of this often-sensationalized topic. Beyond the statistics related to attacks in the Carolina waters, *Sharks in the Shallows* offers a history of shark-human interactions and an introduction to the world of shark attacks. Creswell details the conditions that increase a person's chances of an encounter, profiles the three species most often involved in attacks, and reveals the months and time of day with the highest probability of an encounter. With a better understanding of sharks' responses to their environment, and what motivates them to attack humans, he hopes people will develop a greater appreciation of the invaluable role sharks play in our marine environment.
