Over the next week, Pindar introduces Joe to a series of “go-givers:” a restaurateur, a CEO, a financial adviser, a real estate broker, and the “Connector,” who brought them all together. Pindar’s friends share with Joe the Five Laws of Stratospheric Success and teach him how to open himself up to the power of giving. Joe learns that changing his focus from getting to giving—putting others’ interests first and continually adding value to their lives—ultimately leads to unexpected returns. Foster's classic guide—a lively and entertaining introduction to literature and literary basics, including symbols, themes, and contexts—that shows you how to make your everyday reading experience more rewarding and enjoyable. Ranging from major themes to literary models, narrative devices, and form, Thomas C. Foster provides us with a broad overview of literature—a world where a road leads to a quest, a shared meal may signify a communion, and rain, whether cleansing or destructive, is never just a shower—and shows us how to make our reading experience more enriching, satisfying, and fun. This revised edition includes new chapters, a new preface, and a new epilogue, and incorporates updated teaching points that Foster has developed over the past decade.

Are They Really Reading? - Jodi Crum Marshall 2002

All too often the poorest readers learn that if they keep quiet during sustained silent reading (SSR), they're doing okay--no reading required. This is especially true in middle school where class sizes are large and instructional emphasis is on content rather than reading. In *Are They Really Reading?*, Jodi Crum Marshall discusses how to find out if your students are using SSR time wisely and what to do about it if they're not. Her book describes how to support middle-grade readers who need it the most, while embracing a research-proven need to increase independent, self-selected reading time for students. Jodi shares lessons and anecdotes from her classroom and from her experience as a reading specialist implementing her model schoolwide. She expands the traditional concepts of SSR to include read-alouds, writing, and accountability to scaffold struggling middle-grade students. Bolstered by these additional supports, Jodi's students dramatically increased their interest and ability in reading through a program they named Supporting Student Literacy (SSL). Classroom teachers will appreciate the clear direction on how and why to implement an SSR program. Administrators will appreciate the guidance for establishing a schoolwide literacy block that substantially improves student motivation and learning. *Are They Really Reading?* answers the following important questions: Why should I start an SSR

program? How do I build a classroom library? Where do I get funding for books and other materials? How do I prepare the students for SSR? How do I motivate students to read? What is the role of the teacher? How do I assess SSR? If you don't currently use a sustained silent reading program, this book will help you get started on the right track. If you worry that some of your students aren't really reading during SSR or if you want to enhance your program, here is a roadmap that is instructionally sound and flexible enough to fit your students' needs.

The 3rd Edition of Literacy & Learning in the Content Areas helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.

[The Book of Isaiah, Chapters 1-39](#) - John N. Oswalt 1986-07-25
The first of John N. Oswalt's two-part study of the book of Isaiah for the NICOT series, this commentary on chapters 1-39 combines theological acumen, literary sensitivity, philological expertise, and historical knowledge to present a faithful and accurate reading of one of the Old Testament's most important books. In the introduction to this work, Oswalt considers Isaiah's background, unity of composition, date and authorship, canonicity, Hebrew text, theology, and problems of interpretation, and he offers a select bibliography for further research. Oswalt also provides substantial discussions of several issues crucial to the book of Isaiah. He notes, for example, that scholars often divide Isaiah into three divisions, with chapters 1-39 addressing Isaiah's

contemporaries in the eighth century B.C., chapters 40-55 presupposing the exile of the sixth century, and chapters 56-66 presupposing the eventual return from exile. While taking this scholarship into account Oswalt defends the unity of the prophetic book and argues convincingly that the whole book can be attributed to the Isaiah of the eighth century. The commentary proper, based on Oswalt's own translation of the Hebrew text, provides pastors, scholars, and students with a lucid interpretation of the book of Isaiah in its ancient context as well as an exposition of its message for today.

How People Learn II - National Academies of Sciences, Engineering, and Medicine 2018-09-27

There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on

the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.
