[Small Electric Vehicles](#) - Amelie Ewert 2021

This edited open access book gives a comprehensive overview of small and lightweight electric three- and four-wheel vehicles with an international scope. The present status of small electric vehicle (SEV) technologies, the market situation and main hindering factors for market success as well as options to attain a higher market share including new mobility concepts are highlighted. An increased usage of SEVs can have different impacts which are highlighted in the book in regard to sustainable transport, congestion, electric grid and transport-related potentials. To underline the effects these vehicles can have in urban areas or rural areas, several case studies are presented covering outcomes of pilot projects and studies in Europe. A study of the operation and usage in the Global South extends the scope to a global scale. Furthermore, several concept studies and vehicle concepts on the market give a more detailed overview and show the deployment in different applications.

The Cars of Harley Earl - David W Temple 2016-05-16

At 6-foot, 3-inches tall, Harley Earl was an imposing figure, but his true stature lies in his towering talent for automotive design and styling. Over his 50-year career, he created as well as collaborated on the most innovative, bold, technologically advanced cars made by General Motors. As a titan of American auto design, the cars he helped create are still celebrated today. And as an enduring legacy, he inspired a generation of engineers, designers, and stylists. Veteran automotive historian David W. Temple has researched and unearthed the complete story of Harley Earl's cars, his notable design achievements, and many accolades. Working as a coachbuilder at his father's Earl Automotive Works in Hollywood, California, the young Earl learned his trade. After styling the 1927 LaSalle for GM president Alfred P. Sloan, Earl rose to prominence and ran the newly created department of Art and Color. Automobile design stagnated during the Depression and World War II, but the number of his contributions to the automotive world in the 1950s is staggering. When the jet age hit, he fully embraced aviation design and infused it into GM cars. The Buick Y-Job and GM Le Sabre featured many firsts in automotive design and hardware. The Y-Job's fender extensions trailing over the doors, disappearing headlamps, flush door handles, a metal cover over the convertible top were a few innovations. When General Motors needed to show off its cars and technology, Harley Earl-designed cars were the stars of the Motorama show that toured the country from 1949 to 1961. He led the team that created the 1953 Corvette, and this iconic American sports car is still going strong today. He was involved in the creation of the 1955-1957 Chevy Bel Air, otherwise known as the Tri-Five Chevy. Harley Earl's drive toward bold and innovative design spurred American car design during the mid-twentieth century. His distinctive designs defined the 1950s finned cars and set American automotive design on the path it has followed into the modern era. With this in-depth examination, you learn the inside story of these remarkable cars and the man behind them. It's an essential addition to any automotive library.

How to Build Brick Cars - Peter Blackert 2017-08-01

How to Build Brick Cars shows you how to build tons of contemporary and classic sports cars entirely out of the world's favorite building block. Ladies and gentlemen, boys and girls, start your engines and bust out

your bricks! How to Build Brick Cars is here for the inner creative person in us all. Featuring over a dozen fully realized builds of classic and contemporary sports cars, race cars, and muscle cars, How to Build Brick Cars features a range of levels to challenge both LEGO newbies and the veteran block-slingers far and wide. Readers will find detailed, full-color illustrations and step-by-step instructions for such classic and contemporary vehicles like: 1932 Ford V-8 Roadster Datsun 240Z 2016 Le Mans Ford racer Ferrari 250 GT California Jaguar E-Type coupe and convertible Ford F150 Raptor Bugatti Veyron Porsche 911 Featuring informative and historical text about each car and designed exclusively by Ford Motor Company vehicle designer Peter Blackert, How to Build Brick Cars will keep you busy from the flip of the first page to the end of the race track!

The Age of Surveillance Capitalism - Shoshana Zuboff 2019-01-15

The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

The Complete Book of American Muscle Supercars - Tom Glatch
2016-10-17

2017 Gold Medal Winner of the International Automotive Media Competition! Uncover the captivating history of the highest-performance cars in America, illustrated with beautiful photography. The American muscle car began not in the factories of the big three automakers, but in the garages and dealerships of a hot-rod subculture bent on making the hottest, highest-performance cars on the street. The Complete Book of American Muscle Supercars catalogs these amazing cars, along with the builders who unleashed them on the American scene. From Michigan's Royal Pontiac dealership and the souped-up Royal Pontiac Bobcats they built and sold, to the new cars from such fabled names as Carroll Shelby, Mr. Norm's Grand Spaulding Dodge, Nickey Chevrolet, Don Yenko, George Hurst, Baldwin-Motion, Calloway, SLP, and Steve Saleen. This gorgeously illustrated book chronicles the outstanding contribution of the tuner/builder to American automotive history through the amazing machines they created. From the oldest of these muscle tuners commanding top dollar at today's classic-car auctions, to the latest vehicles by Ford and Chrysler, with their SVT and SRT divisions, this book gives readers a full and fascinating look at American high-performance in its purest form.

Backpacker - 2004-03

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Let Me Sell You a Ferrari - Robert E. Guarino 2021-05-14

The moment in 1958 when a sports car-crazed youth in Massachusetts saw his first Ferrari changed his life. The black 250 GT coupe's seductive lines, purposeful air and already hallowed name seized Robert E. Guarino's imagination; just a few years later, he would be selling such cars. And in 1967, with two partners and an investment of just \$6,000 apiece, he would open a Ferrari-Porsche-Datsun dealership. This memoir follows his lifelong journey with Ferraris and other remarkable automobiles, as an enthusiast and dealer. Highlights include a nonstop drive from Chicago to Boston in a 308 GTB; rides with important figures like Piero Ferrari at Fiorano and Dario Benuzzi at Mugello; visits to the Ferrari, Maserati and Lamborghini factories; the horror of watching a delivery truck crash onto a row of new cars; and time at the wheel of such icons as the 365 GTB/4 "Daytona," 250 GTO, 288 GTO and F40.

Scenes and Monologues from Steinberg/ATCA New Play Award Finalists, 2008-2012 - Bruce Burgun 2013-08-01

Paperback Original

Glamour Road - Tom Dolle 2022-03-28

This highly visual book explores the seldom-told story of how glamour, fashion, design, and styling became the main focus of automotive marketing from the postwar 1940s through the 1970s. With the expansion of the American suburbs after WWII, women suddenly needed cars of their own. By adopting the fashion industry's yearly model changes, as well as hiring many designers and stylists from the fashion industry, the automobile industry made a direct appeal to the rising sophistication and influence of women. By perfecting the fashion-centric concept of planned obsolescence, it became the dominant economic engine of American postwar prosperity. The dramatic photography, elegant fashion, and use of color and materials in midcentury automotive marketing created a groundswell of demand for new cars. Much of the marketing imagery of the period hasn't been published since it first came out, and this book features some of the best.

The Big Book of Tiny Cars - Russell Hayes 2021-11-23

Richly illustrated and entertainingly written, The Big Book of Tiny Cars presents lively profiles of the automotive world's most famous—and infamous—microcars and subcompacts from 1901 to today. From tiny homes to little lending libraries and even tiny food, people everywhere are resetting the premium they put on size. Fact is, the automotive industry has a "tiny" history going back to the car's earliest days. Beginning with the Curved Dash Oldsmobile and continuing through prewar classics such as the Austin Seven and Hanomag Kommissbrot, The Big Book of Tiny Cars is truly international in scope. Witness diminutive cars like the Bond Minicar and the BMWIsetta introduced to fuel-deprived postwar Europe, and continue through the classic 1950s microcars and '70s subcompacts, right up to today's tiny cars and electric vehicles (EVs) from the likes of Smart and Fiat. In addition to iconic curiosities like the frog-like Goggomobil Dart, the futuristic Sebring Vanguard Citicar, and the three-wheeled Reliant Robin, you'll read about more familiar classics like the VW Beetle, MiniCooper, and Crosley Super Sport. Other manufacturers represented include Honda, Datsun, Mitsubishi, Trabant, Heinkel, Renault, and Messerschmitt, to name a few. Each car is profiled with an entertaining and informative history and a fact box. Imagery includes archival photos, period ads, and modern photography. In all, more than 100 cars are included, from the weird to the sublime. Gas, diesel, or electric...tiny cars have a rich and curious heritage reflective of motorists' concerns for their pocketbook, the environment, or both. The Big Book of Tiny Cars is your ultimate collection of microcars, minicars, bubble cars, kei cars, subcompacts, and compacts that have been built, sold, and driven all over the globe for 120 years.

Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

Carroll Shelby - Rinsey Mills 2012-04-26

When Ford wanted to add some spice to its newly introduced Mustang pony car, it turned to former racer Carroll Shelby. The resulting cars proved to be the definitive performance Mustangs of the muscle-car era. The choice made sense. Shelby had proven himself a force to be reckoned with on the racetrack, in the tuning shop, and in the auto industry. By the time Ford hired Shelby to create a racer from its Mustang, the man was already an automotive legend. Early in his career, Shelby's accomplishments as a racecar driver included breaking land speed records at Bonneville and winning Le Mans in 1959 with teammate Roy Salvadori. As a team manager, Carroll was part of the FIA World Grand Touring Championship as well as the Ford GT victories at Le Mans. When his health forced him to give up racing in 1960, Carroll turned his attention to design. He had a vision of a racecar made from a lightweight European chassis with American V-8 power. The result is what is considered to be perhaps the greatest sports car and one of the fastest road cars ever constructed: the Shelby Cobra. The aluminum-bodied 289 and 427 Cobra models and

the subsequent Shelby Mustangs made Shelby a household name in the 1960s. Shelby continues to impact the world of racing and automobile design. His charisma, vision, and ability to know the best person for the job have made him a master organizer and team leader able to produce consistently impressive results. Even today, Ford's premier Mustang carries the Shelby name and iconic snake logo. This book is the complete, authorized biography of Carroll Shelby including images from Shelby's personal collection. It's the story every enthusiast has always wanted to read. Shelby website: www.shelbyautos.com/
