Twentieth-Century Building Materials - Thomas C. Jester 2014-08-01

Over the concluding decades of the twentieth century, the historic preservation community increasingly turned its attention to modern buildings, including bungalows from the 1930s, gas stations and diners from the 1940s, and office buildings and architectural homes from the 1950s. Conservation efforts, however, were often hampered by a lack of technical information about the products used in these structures, and to fill this gap Twentieth-Century Building Materials was developed by the U.S. Department of the Interior's National Park Service and first published in 1995. Now, this invaluable guide is being reissued—with a new preface by the book's original editor. With more than 250 illustrations, including a full-color photographic essay, the volume remains an indispensable reference on the history and conservation of modern building materials. Thirty-seven essays written by leading experts

offer insights into the history, manufacturing processes, and uses of a wide range of materials, including glass block, aluminum, plywood, linoleum, and gypsum board. Readers will also learn about how these materials perform over time and discover valuable conservation and repair techniques. Bibliographies and sources for further research complete the volume. The book is intended for a wide range of conservation professionals including architects, engineers, conservators, and material scientists engaged in the conservation of modern buildings, as well as scholars in related disciplines.

Icons and Idiots - Bob Lutz 2014-09-30

When Bob Lutz retired from General Motors in 2010, after an unparalleled forty-seven-year career in the auto industry, he was one of the most respected leaders in American business. He had survived all kinds of managers over those decades: tough and timid, analytical and irrational, charismatic and antisocial, and some who seemed to shift frequently among all those traits. His experiences made him an expert on leadership, every bit as much as he was an expert on cars and trucks. Now Lutz is revealing the leaders—good, bad, and ugly—who made the strongest impression on him throughout his career. *Icons and Idiots* is a collection of shocking and often hilarious true stories and the lessons Lutz drew from them. From enduring the sadism of a Marine Corps drill instructor, to working with a washed-up alcoholic, to taking over the reins from a convicted felon, he reflects

on the complexities of all-too-human leaders. No textbook or business school course can fully capture their idiosyncrasies, foibles and weaknesses - which can make or break companies in the real world. Lutz shows that we can learn just as much from the most stubborn, stupid, and corrupt leaders as we can from the inspiring geniuses. He offers fascinating profiles of icons and idiots such as... Eberhard von Kuenheim. The famed CEO of BMW was an aristocrat-cum-street fighter who ruled with secrecy, fear, and deft maneuvering. Harold A. "Red" Poling: A Ford CEO and the ultimate bean counter. If it couldn't be quantified, he didn't want to know about it. Lee Iacocca: The legendary Chrysler CEO appeared to be brilliant and bold, but was often vulnerable and insecure behind the scenes. G. Richard "Rick" Wagoner: The perfect peacetime CEO whose superior intelligence couldn't save GM from steep decline and a government bailout. As Lutz writes: We'll examine bosses who were profane, insensitive,

totally politically incorrect, and who "appropriated" insignificant items from hotels or the company. We'll visit the mind of a leader who did little but sit in his office. We'll look at another boss who could analyze a highly complex profit-and-loss statement or a balance sheet at a glance, yet who, at times, failed to grasp the simplest financial mechanisms—how things actually worked in practice to create the numbers in the real world. The result is a powerful and entertaining guide for any aspiring leader.
