The Power to Transform - Stephanie Pace Marshall 2006-03-10

In this important new book, Stephanie Pace Marshall argues that by focusing on reforming the contents of schooling and not transforming the context and conditions of learning, we have created false proxies for learning and eroded the potentially vibrant intellectual life of our schools. Finishing a course and a textbook has come to mean achievement. Listening to a lecture has come to mean understanding. Getting a high score on a standardized test has come to mean proficiency. Credentialing has come to mean competence. To educate our children wisely requires that we create generative learning communities, by design. Such learning communities have their roots in meaning, not memory; engagement, not transmission; inquiry, not compliance; exploration, not acquisition; personalization, not uniformity; interdependence, not individualism; collaboration, not competition; and trust, not fear.

Ultimate Paper Airplanes for Kids - Andrew Dewar 2015-12-01

****Winner of the 2016 Creative Child Magazine Product of the Year Award**** Kids will love to fold and fly these sturdy, aerodynamic paper airplanes! In this brand new origami book with folding papers, paper airplane expert Andrew Dewar presents his ultimate collection of easy-to-fold, high-performance planes for kids who are fascinated by paper or origami airplanes. These planes are brightly colored and designed to fly beautifully each and every time. The book opens with a fascinating primer to the principles of flight so kids can learn about the forces that enable a plane to fly and affect the performance of their planes. They'll have fun coaxing the planes through their paces: doing loops, barrel rolls, glides and dives. The sky is the limit once they understand how planes interact with the atmosphere! This paper airplanes kit contains: 12 innovative designs 48 pre-cut paper airplane models Detailed instructions for each paper plane Special durable lightweight cardstock Printed folding lines for perfect folds Colorful and realistic designs A pull-out airport runway for landing maneuvers

Creating Vibrant Public Spaces - Ned Crankshaw 2008-10-15

Public space and street design in commercial districts can dictate the success or failure of walkable community centers. Instead of focusing our efforts on designing new "compact town centers," many of which are located in the suburbs, we should instead be revitalizing existing authentic town centers. This informative, practical book describes methods for restoring the health and vibrancy of the streets and public spaces of our existing commercial districts in ways that will make them positive alternatives to suburban sprawl while respecting their historic character. Clearly written and with numerous photos to enhance the text, *Creating Vibrant Public Spaces* uses examples from communities across the United States to illustrate the potential for restoring the balance provided by older urban centers between automobile access and "walkability." In advice that can be applied to a variety of settings and scales, Crankshaw describes the tenets of contemporary design theory, how to understand the physical evolution of towns, how to analyze existing conditions, and how to evaluate the feasibility of design recommendations. Good design in commercial centers, Crankshaw contends, facilitates movement and access, creates dynamic social spaces, and contributes to the sense of a "center"—a place where social, commercial, and institutional interaction is more vibrant than in surrounding districts. For all the talk of creating new "green" urban spaces, the ingredients of environmentally aware design, he points out, can often be found in the deteriorating cores and neighborhoods of towns and cities across the United States. With creativity, planning, and commitment, these centers can thrive again, adding to the quality of local life and contributing to the local economy, too.

Writing to Explore - David Somoza 2010

In *Writing to Explore*, David and Peter demonstrate how to teach adventure writing, which integrates nonfiction and fiction and motivates students to write with imagination, curiosity, and a hunger to learn everything about their topic. The book starts with a solid foundation in the basics of good writing: setting descriptions, writing atmosphere, and character development. The authors then explore the specific elements of adventure writing—from setting the stage to conducting research; from combining history and geography to effectively utilizing technology. The result is an adventure-based paper that is "rooted in real places, supported by facts, and developed with detailed description of images from real locations." Teachers will find handouts, sample activities, student writing examples, research sources, and tips to help them create a nonfiction writing program based around the adventure writing model. Research papers don't have to be boring to read or to write. This book will show you how to get vibrant papers from your students—papers that teach both reader and writer something new.

Learning Targets - Connie M. Moss 2012-07-02

In Learning Targets, Connie M. Moss and Susan M. Brookhart contend that improving student learning and achievement happens in the immediacy of an individual lesson--what they call "today's lesson"—or it doesn't happen at all. The key to making today's lesson meaningful? Learning targets. Written from students' point of view, a learning target describes a lesson-sized chunk of information and skills that students will come to know deeply. Each lesson's learning target connects to the next lesson's target, enabling students to master a coherent series of challenges that ultimately lead to important curricular standards. Drawing from the authors' extensive research and professional learning partnerships with classrooms, schools, and school districts, this practical book - Situates learning targets in a theory of action that students, teachers, principals, and central-office administrators can use to unify their efforts to raise student achievement and create a culture of evidence-based, results-oriented practice. - Provides strategies for designing learning targets that promote higher-order thinking and foster student goal setting, self-assessment, and self-regulation. - Explains how to design a strong performance of understanding, an activity that produces evidence of students' progress toward the learning target. - Shows how to use learning targets to guide summative assessment and grading. Learning Targets also includes reproducible planning forms, a classroom walk-through guide, a lesson-planning process guide, and guides to teacher and student self-assessment. What students are actually doing during today's lesson is both the source of and the yardstick for school improvement efforts. By applying the insights in this book to your own work, you can improve your teaching expertise and dramatically empower all students as stakeholders in their own learning.

Educating One and All - National Research Council 1997-06-27

In the movement toward standards-based education, an important question stands out: How will this reform affect the 10% of school-aged children who have disabilities and thus qualify for special education? In Educating One and All, an expert committee addresses how to reconcile common learning for all students with individualized education for "one"the unique student. The book makes recommendations to states and communities that have adopted standards-based reform and that seek policies and practices to make reform consistent with the requirements of special education. The committee explores the ideas, implementation issues, and legislative initiatives behind the tradition of special education for people with disabilities. It investigates the policy and practice implications of the current reform movement toward high educational standards for all students. Educating One and All examines the curricula and expected outcomes of standards-based education and the educational experience of students with disabilitiesand identifies points of alignment between the two areas. The volume documents the diverse population of students with disabilities and their school experiences. Because approaches to assessment and accountability are key to standards-based reforms, the committee analyzes how assessment systems currently address students with disabilities, including testing accommodations. The book addresses legal and resource implications, as well as parental participation in children's education.

Simply K - Carrie Bailey 2019-07-20

Too often, our littlest learners are expected to achieve, despite not having reached critical levels of readiness. It is so important that they are taught with an approach that assesses and addresses their stage of development. This course includes helpful tips, games, a biblical focus on lessons from God's Word and how we can live for Him, ideas for extended learning, and activities, all based on skills developed through play and interaction.

Wingbeats - Scott (Editor) 2012-02-15

Wingbeats: Exercises & Practice in Poetry is an exciting collection from poets who teach both in and outside academia. Fifty-eight poets in various stages of their careers have contributed sixty-one exercises ranging from quick and simple to involved and multi-layered. In seven chapters, ranging from "Springboards to Imagination" to "Chancing the Accidental" to "Complicating the Poem," each exercise includes not only clear step-by-step instructions, but numerous poems that exemplify the successful completion of the exercise. Wingbeats, edited by Scott Wiggerman and David Meischen, includes exercises for working in pairs and/or groups, for incorporating research and/or the Internet, for writing outdoors, for creating a hands-on experience. Of course, traditional poetic techniques covering metaphor, persona, forms, and revision are also included. Wingbeats is destined to become a standard instructional book in every poet's library. Vibrant and Healthy Kids - National Academies of Sciences, Engineering, and Medicine 2019-12-27

Children are the foundation of the United States, and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes, despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods, and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity builds upon and updates research from Communities in Action: Pathways to Health Equity (2017) and From Neurons to Neighborhoods: The Science of Early Childhood Development (2000). This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions, and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

Pedagogical Psychology: Beyond the 21st Century - Gretchen M. Reevy

2015-07-22

Frontiers in Psychology is introducing a new research topic, Pedagogical Psychology: Beyond the 21st Century, which will be released as an online journal issue in summer 2014. The purpose of Beyond the 21st Century will be to publish goal-oriented articles leading to improvement of teaching and learning at all levels of psychology education. Until perhaps 20 years ago, educational approaches to teaching were largely informed by a "Stand and Deliver" pedagogical attitude. The psychology of this approach has often invested unrealistic and unrealizable responsibilities in both teachers and students. With the emergence of electronic data sharing (e.g., the Internet) and global cooperation/competition, newer approaches to teaching have begun to supplement and sometimes replace the older model of teaching. These newer approaches have simultaneously taken advantage of technological advances, global changes, and an evolving understanding of successful student-mentor relationships. As the pedagogical models driven by these changes evolve into the 22nd century and beyond, what seems groundbreaking today will, in hindsight, be seen as hidebound. Thus, the major goal of Beyond the 21st Century will be to publish manuscripts which imaginatively, but realistically anticipate future trends in teaching undergraduate psychology. Types of manuscripts which are appropriate for Pedagogical Psychology should be visionary, yet empirically and/or theoretically based. We welcome manuscripts in all domains of pedagogical psychology, with a special interest on topics that are new, or expected to evolve rapidly. Such innovative topics include, but are not limited to: Online and hybrid teaching; Massive Open Online Courses (MOOCs). How has student success improved with the introduction of online/distance education? Are there dangers associated with online/distance education, especially MOOCs? How can student success be improved as technology evolves beyond the MOOC concept? What technological advances will make psychology education available and useful for more, and more diverse students? How can the physical classroom be transformed into a student centered, effective, virtual environment? Using the internet as resources for classes (e.g., stat tutorials, etc.) Uses of technology, such as social media (e.g., Facebook, Twitter), wikis, and clickers in the classroom The challenge of teaching particular courses online, such as psychology laboratory courses or practicums Seeking effective user feedback (i.e., regarding user friendliness, teaching effectiveness) for online courses, including MOOCs The Wikipedia initiative of the Association for Psychological Science Teaching "Generation Me;" anticipating changing generational needs Teaching international students Teaching non-traditional-age students Undergraduate research projects Integrating multiculturalism into all courses Infusing social justice issues into psychology courses Creating opportunities for interdisciplinary learning Teaching techniques for psychology courses which are often offered as electives rather than core curriculum (e.g., evolutionary psychology, psychology and the law, cross-cultural psychology, health psychology, positive psychology) Assessing institutional student learning objectives across the curriculum Contingent faculty/adjunct faculty/lecturers in psychology departments Working with changing legislative & accreditation constraints and unpredictable budgets Co-Hosts of Pedagog

Five Hundred and One Critical Reading Questions - 2004

The critical reading section on standardized tests, especially the SAT 1 exam, is often cited as a trouble section for even the best test-takers. Examinees get test-targeted reading comprehension practice questions to score better with LearningExpress' series, Skill Builder in Focus. This specialized drill book provides the focused practice necessary for test-taking success. Plus, all answers are explained, using terms that clarify context, main ideas, themes, and critical thinking skills for effective studying and positive reinforcement. Almost every standardized test in verbal skills, including civil service exams, contains reading comprehension questions. Each practice consists of several passages followed by questions and answer explanations.

All God's Children Got A Song - Whitney Covalle 2022

The three papers in this dissertation are conceptualized around the topic of urban music education. At the foundation of each paper lies an aim to analyze music teachers' engagement with students in urban settings. What connects these three projects is the exploration of voices and perspectives that can strengthen our understanding of music teacher education to meet the unique needs of students in urban settings and address complexities within urban contexts. First, I examine my own journey leaving a predominantly White institution (PWI) twenty years ago to enter urban settings and teach music where I found myself unequipped in musical and nonmusical ways. I describe my journey

toward musical and cultural competency over many years as I worked to learn to teach and engage with music that I had not been prepared to teach, in classrooms of students with whom I did not share a cultural background. As an impetus from that journey of both musical and cultural understanding, the second paper represents a deep exploration of Black Gospel music teaching as defined by three experts. Once again, while the study's findings may offer musical insights in Black Gospel music, the greater lessons are the cultural components that inform Black music. In the last project, I study two urban school music programs that engaged community arts partners and music educators who learned musical and nonmusical lessons about the liberatory praxis of Black music. Emerging themes across these three projects reflect a need for rigorous and vibrant music teacher education reform that resonantly and responsively meet the needs of students in urban settings. In all three projects, participants (a) cited a need for music teacher education to move beyond content and include the intersection of race and teaching music; (b) discussed the centering of Western Art Musics (WAMs) in the academy; (c) encountered adolescent, high school age beginners in their music classes requiring a need for approachable, accessible, relevant tools to make music outside of traditional Choir, Orchestra, Band models; (d) found liberatory Black musical forms including Hip Hop, song-writing, Drumline, loop-based composition through digital audio workstations (DAWs), and Black Gospel music served beginners successfully; and (e) engaged or participated as culture bearers and/or experts on teaching unfamiliar Black musical forms and culturally competent communication across diverse groups. Given the themes across these three papers, I argue that critical reflection on the academy and music teacher preparation is necessary to enact reform that works against stagnancy and exclusion and moves toward inclusive musics and teaching for liberation available in Black music. I interrogate the three papers through the lens of Critical Race Theory (CRT) as a theoretical framework through which I view, interpret, reflect, and find greater meaning to inform the preparation to teach music teaching and learning in urban settings. Visible across findings in all papers are examples of foundational tenets of CRT, whiteness as property and the permanence of racism, as participants felt unprepared to teach music outside of Eurocentric musical practices and cited the need for music teacher education to include the intersection of race and teaching. To make conclusions and suggest possibilities for reform in music education, I frame findings through the connection of two additional CRT tenets: interest convergence and counterstorytelling. Given the realities suggested in the first CRT tenets, I relied on the CRT theory of interest convergence to make recommendations for reform to music education. Theorizing that meaningful change is impossible without including interests of the dominant group, I propose "All God's Children Got a Song" as a call for interest convergence wherein systems and actors in music education work harder to include the 80% of students who currently do not participate in music. In naming areas for change, I suggest the use of counterstorytelling as a way to frame possibility for changing the narrative in music education in four areas that were common findings across papers: (a) to promote music education as approachable, age appropriate, and accessible for adolescent beginners, possible through curricula including but not limited to open, participatory, liberatory, and "family"-oriented forms of Black music including Hip Hop, song-writing, Drumline and loop-based composition using music technology, Black Gospel music, and choir; (b) to reimagine the concept of music literacy wherein students experience viewing music without navigating a written page; (c) to foster community capital whereby partnerships emerge with culture bearers who model and provide musical and cultural models of unfamiliar ways of making music alongside cultural and musical competence in communicating across diverse groups; and (d) to develop and implement comprehensive preservice education for future urban music educators that builds racial literacy skills to support content and pedagogy. Keywords: Urban Music Education, Gospel Music, Community.

How School Leaders Contribute to Student Success - Kenneth Leithwood 2017-03-15

While considerable evidence indicates that school leaders are able to make important contributions to the success of their students, much less is known about how such contributions are made. This book provides a comprehensive account of research aimed at filling this gap in our knowledge, along with guidelines about how school leaders might use this knowledge for their own school improvement work. Leadership

practices known to be effective for improving student success are outlined in the first section of the book while the remaining sections identify four "paths" along which the influence of those practices "flow" to exercise an influence on student success. Each of the Rational, Emotional, Organizational and Family paths are populated by conditions or variables known to have relatively direct effects on student success and also open to influence by effective leadership practices. While the Four Path framework narrows the attention of school leaders to a still-considerable number conditions known to contribute to student success, it leaves school leaders the autonomy to select, for improvement efforts, the sub-set of conditions that make the most sense in their own local circumstances. The approach to leadership described in this book provides evidence-based guidance on what to lead and flexibility on how to lead for purposes of improving student learning.

Writing Research Papers - James D. Lester 2014-01-26

The definitive research paper guide, *Writing Research Papers* combines a traditional and practical approach to the research process with the latest information on electronic research and presentation. This market-leading text provides students with step-by-step guidance through the research writing process, from selecting and narrowing a topic to formatting the finished document. *Writing Research Papers* backs up its instruction with the most complete array of samples of any writing guide of this nature. The text continues its extremely thorough and accurate coverage of citation styles for a wide variety of disciplines. The fourteenth edition maintains Lester's successful approach while bringing new writing and documentation updates to assist the student researcher in keeping pace with electronic sources.

A Paper Life - Tatum O'Neal 2005-10-04

A real Hollywood-style tell-all, this is the extremely candid and highly explosive autobiography of one of the movie industry's most talented and troubled young stars. At age ten, Tatum O'Neal became the youngest Oscar winner in history for her performance in the film classic *Paper Moon*. As the sidekick to her father, the flamboyant star and man-about-town Ryan O'Neal, she became a fixture at the most glamorous Hollywood parties and counted celebrities ranging from Cher to Stanley Kubrick among her childhood friends. Yet behind the glittering façade of Tatum's life lay heartbreak: abandonment, abuse, neglect, and drug addiction. She reveals the most intimate secrets of her dysfunctional relationships with her father, Ryan O'Neal, and stepmother, Farrah Fawcett, as well as her alcoholic mother, Joanna Moore, and ex-husband, tennis pro John McEnroe. After the collapse of her marriage and with no real family to turn to, Tatum succumbed to the demons of her past that would nearly kill her. Now she has emerged clean and sober, rediscovering herself as an actress, mother, and wonderfully vibrant woman in what she considers the prime of her life.

50 Successful Harvard Medical School Essays - Staff of the Harvard Crimson 2020-05-05

Fifty all-new essays that got their authors into Harvard Medical School, including MCAT scores, showing what worked, what didn't, and how you can do it too. Competition to get into the nation's top medical schools has never been more intense. Harvard Medical School in particular draws thousands of elite applicants from around the world. As admissions departments become increasingly selective, even the best and brightest need an edge. Writing a personal statement is a daunting part of the application process. In less than 5,300 characters, applicants must weave together experiences and passions into a memorable narrative to set them apart from thousands of other applicants. While there is no magic formula for writing the perfect essay, picking up this book will put them on the right track. *50 Successful Harvard Medical School Essays* is the first in a new line of books published by the Staff of the Harvard Crimson. It includes fifty standout essays from students who successfully secured a spot at Harvard Medical School. Each student has a unique set of experiences that led them to medicine. Each essay includes analysis by Crimson editors on essay qualities and techniques that worked, so readers can apply them to their own writing. This book will aid applicants in composing essays that reveal their passion for medicine and the discipline they will bring to this demanding program and profession. It will give them the extra help they need to get into the best medical school programs in the world.

Advanced Problems in Mathematics: Preparing for University - Stephen

Siklos 2016-01-25

This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. *Advanced Problems in Mathematics* is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics.

Twenty Questions - J. D. McClatchy 1998

In *Twenty Questions*, one of America's finest poet-critics leads readers into the mysteries of poetry: how it draws on our lives, and how it leads us back into them. In a series of linked essays progressing from the autobiographical to the critical -- and closing with a remarkable translation of Horace's *Ars Poetica* unavailable elsewhere -- J. D. McClatchy's latest book offers an intimate and illuminating look into the poetic mind. McClatchy begins with a portrait of his development as a poet and as a man, and provides vibrant details about some of those who helped shape his sensibility -- from Anne Sexton in her final days, to Harold Bloom, his enigmatic teacher at Yale, to James Merrill, a wise and witty mentor. All of these glimpses into McClatchy's personal history enhance our understanding of a coming of age from ingenious reader to accomplished poet-critic. Later sections range through poetry past and present -- from Emily Dickinson to Seamus Heaney and W. S. Merwin -- with incisive criticism generously interspersed with vivid anecdotes about McClatchy's encounters with other poets' lives and work. A critical unpacking of Alexander Pope's "Epistle to Miss Blount" is interwoven with compassionate psychological portrait of a brilliant poet plagued by both romantic longings and debilitating physical deformities. There are surprising takes on the literary imagination as well: a look at Elizabeth Bishop through her letters, and a tribute to the Broadway lyrics of Stephen Sondheim and the tradition of light verse. The questions McClatchy poses of poems prompt a fresh look and the last word. Free of scholarly pretension, elegantly and movingly written, *Twenty Questions* is a bright, open window onto a public and private experience of poetry, to be appreciated by poets, readers, and critics alike.

Pain Management and the Opioid Epidemic - National Academies of Sciences, Engineering, and Medicine 2017-10-28

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Reading, Learning, Teaching Ralph Ellison - Paul Lee Thomas 2008

Our English classrooms are often only as vibrant as the literature that we teach. This book explores the writing of African American author Ralph Ellison, who offers readers and students engaging fiction and non-fiction that confront the reader and the world. Here, teachers will find an introduction to Ellison's works and an opportunity to explore how to bring them into the classroom as a part of the reading and writing curriculum. This book attempts to confront what we teach and how we teach as instructors of literature through the vivid texts Ellison offers his readers.

The Image of the City - Kevin Lynch 1964-06-15

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new

criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.
