It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." Star Map - Lewis Vaughn 2017-05-02

Star Map: A Journey of Faith, Doubt, and Meaning is a touching and deeply personal philosophical memoir about a young man's wrestling match with fanatical faith and his frantic search for truth and meaning. Against the backdrop of pressing social issues of the 1960s such as the Vietnam War and the civil rights movement, Lewis Vaughn's journey transforms him from a young Christian fundamentalist to a disillusioned agnostic to an atheist seeker of meaning in a godless world. A single horrifying moment begins the breakdown of his faith, and the following examination of his faith's tenets eventually erodes it completely. But the struggle to survive the ravages of doubt is only half the tale. After the collapse of his religious beliefs and the sense of purpose it imparted, he feverishly sets out to discover whether there could be any meaning in life at all without religion. Along the way he stumbles on the strongest empirical argument against the reliability of faith as a source of knowledge, and sees that life does indeed have meaning without religion. In the end, he never regains the faith he lost, but finds something better.

Pain Management and the Opioid Epidemic - National Academies of Sciences, Engineering, and Medicine 2017-10-28

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.
