The Anglosphere - Ben
Wellings 2020-01-18
The Anglosphere - a

transnational imagined
community consisting of the
USA, Canada, Australia, New

Zealand and the UK - came to international prominence in the wake of Brexit. The Anglosphere's origins lie in the British Empire and the conflicts of the 20th century. It encompasses an extensive but ill-defined community bonded by language, culture, media, and 'civilisational' heritage founded on the shared beliefs and practices of free-market economics and liberal democracy. Supporters of the Anglosphere argue that it provides a better 'fit' for English-speaking countries at a time when global politics is in a state of flux and under strain from economic crises, conflict and terrorism, and humanitarian disasters. This edited volume provides the first detailed analyses of the Anglosphere, bringing together leading international academic experts to examine its historical origins and contemporary political, social, economic, military, and cultural manifestations. They reveal that the Anglosphere is underpinned by a range of continuities and discontinuities

which are shaped by the location of its five core states. The volume reveals that although the Anglosphere is founded on a common view of the past and the present, it continually seeks to realise a shared future which is never fully attained. The volume thus makes an important contribution to debates about the future of the UK outside of the EU, and the potential for the English-speaking peoples to shape the 21st century.

Permanent Crisis - Paul Reitter
2023-04-05

Leads scholars and anyone who cares about the humanities into more effectively analyzing the fate of the humanities and digging into the very idea of the humanities as a way to find meaning and coherence in the world. The humanities, considered by many as irrelevant for modern careers and hopelessly devoid of funding, seem to be in a perpetual state of crisis, at the mercy of modernizing and technological forces that are driving universities towards academic pursuits that pull in

grant money and direct students to lucrative careers. But as Paul Reitter and Chad Wellmon show, this crisis isn't new—in fact, it's as old as the humanities themselves. Today's humanities scholars experience and react to basic pressures in ways that are strikingly similar to their nineteenth-century German counterparts. The humanities came into their own as scholars framed their work as a unique resource for resolving crises of meaning and value that threatened other cultural or social goods. The self-understanding of the modern humanities didn't merely take shape in response to a perceived crisis; it also made crisis a core part of its project. Through this critical, historical perspective, *Permanent Crisis* can take scholars and anyone who cares about the humanities beyond the usual scolding, exhorting, and hand-wringing into clearer, more effective thinking about the fate of the humanities. Building on ideas from Max Weber and Friedrich Nietzsche to Helen Small and Danielle

Allen, Reitter and Wellmon dig into the very idea of the humanities as a way to find meaning and coherence in the world. ,

Europe - Peter Rietbergen
2020-10-30

Fully revised, updated and extended to include the momentous developments of 2020, this fourth edition of Peter Rietbergen's highly acclaimed *Europe: A Cultural History* is a major and original contribution to the study of Europe. The book examines the structures of culture in this part of Eurasia from the beginnings of human settlement on to the genesis of agricultural society, of greater polities, of urban systems, and the slow transitions that resulted in a (post-)industrial society and the individualistic mass culture of the present. Using both economic and socio-political analytical concepts, the volume outlines cultural continuity and change in Europe through the lenses of literature, the arts, science, technology and music, to show the continent's ever-changing

identities. In a highly readable style, it expertly contextualizes such diverse and wide-ranging topics as Celtic society, the Roman legal system, the oppositions between 'elite' and 'popular' culture in pre-industrial Europe, Michelangelo's world-view, the interaction between the Enlightenment and Romanticism, the growth of a society of time and money, the appeal of fascism and other totalitarian ideologies, and the ways the songs of Sting express late twentieth-century thinking. Structured both chronologically and thematically, the text is distinctive in the attention consistently paid to the many ways Europe has been formed through its contacts with non-European cultures, especially those of Asia and the Americas. This edition concludes with an epilogue that discusses the ways Europe's recent past - including the long-term efforts at further unification, and the various forms of opposition against it - has been both interpreted and

misinterpreted; the importance of globalization; and the major challenges facing Europe in the present, amongst which are the consequences of the pandemic of 2020. With a wide selection of illustrations, maps, excerpts from primary sources and even lyrics from contemporary songs to support its arguments, the text remains the definitive cultural history of Europe for both the general reader and students of European history and culture.

Metaphors of Confinement -
Monika Fludernik 2019-08-13
Metaphors of Confinement: The Prison in Fact, Fiction, and Fantasy offers a historical survey of imaginings of the prison as expressed in carceral metaphors in a range of texts about imprisonment from Antiquity to the present as well as non-penal situations described as confining or restrictive. These imaginings coalesce into a 'carceral imaginary' that determines the way we think about prisons, just as social debates about punishment and criminals feed into the way carceral imaginary develops over time. Examining not only English-language prose fiction but also poetry and drama from the Middle Ages to postcolonial, particularly African, literature, the book juxtaposes literary and non-literary contexts and contrasts fictional and

nonfictional representations of (im)prison(ment) and discussions about the prison as institution and experiential reality. It comments on present-day trends of punitivity and foregrounds the ethical dimensions of penal punishment. The main argument concerns the continuity of carceral metaphors through the centuries despite historical developments that included major shifts in policy (such as the invention of the penitentiary). The study looks at selected carceral metaphors, often from two complementary perspectives, such as the home as prison or the prison as home, or the factory as prison and the prison as factory. The case studies present particularly relevant genres and texts that employ these metaphors, often from a historical perspective that analyses development through different periods.

Women in European Culture and Society - Deborah

Simonton 2017-09-19

Women in European Culture

and Society: A Sourcebook includes a range of transnational sources which encompass the history of women in Europe from the beginning of the eighteenth century right up to the present day. Including documents from across Europe, from France and Germany to Estonia, Spain and Russia, organized in a broad chronological spread, the diversity of the sources included in the book is unique – including many never translated into English before. Deborah Simonton offers detailed interpretive introductions that analyse and contextualize the sources. A central feature is its exploration of how women operated within gendered worlds and used their skills and abilities to shape and claim their own identities and to engage with how they contributed as practitioners to shaping European culture and society. With over 200 sources, the book allows us to ‘hear’ women’s voices as they articulate their understandings of their worlds and helps

capture a sense of women's motivations, options and choices as they understood them - allowing readers to focus on either a period or a theme and providing a comparative resource. Ideal for use on its own or as a companion volume to Simonton's other major work, *Women in European Culture and Society: Gender, Skill and Identity since 1700*, this sourcebook is an invaluable collection offering vivid first-hand accounts of women's lives.

Re-orienting Cuisine - Kwang Ok Kim 2015-02-01

Foods are changed not only by those who produce and supply them, but also by those who consume them. Analyzing food without considering changes over time and across space is less meaningful than analyzing it in a global context where tastes, lifestyles, and imaginations cross boundaries and blend with each other, challenging the idea of authenticity. A dish that originated in Beijing and is recreated in New York is not

necessarily the same, because although authenticity is often claimed, the form, ingredients, or taste may have changed. The contributors of this volume have expanded the discussion of food to include its social and cultural meanings and functions, thereby using it as a way to explain a culture and its changes.

After Extinction - Richard Grusin 2018-03-20

A multidisciplinary exploration of extinction and what comes next What comes after extinction? Including both prominent and unusual voices in current debates around the Anthropocene, this collection asks authors from diverse backgrounds to address this question. *After Extinction* looks at the future of humans and nonhumans, exploring how the scale of risk posed by extinction has changed in light of the accelerated networks of the twenty-first century. The collection considers extinction as a cultural, artistic, and media event as well as a biological one. The authors treat extinction in relation to a

variety of topics, including disability, human exceptionalism, science-fiction understandings of time and posthistory, photography, the contemporary ecological crisis, the California Condor, systemic racism, Native American traditions, and capitalism. From discussions of the anticipated sixth extinction to the status of writing, theory, and philosophy after extinction, the contributions of this volume are insightful and innovative, timely and thought provoking. The Persistence of Race -
Lara Day 2017-10-01

Race in 20th-century German history is an inescapable topic, one that has been defined overwhelmingly by the narratives of degeneracy that prefigured the Nuremberg Laws and death camps of the Third Reich. As the contributions to this innovative volume show, however, German society produced a much more complex variety of racial representations over the first part of the century. Here, historians explore the hateful depictions of the Nazi period

alongside idealized images of African, Pacific and Australian indigenous peoples, demonstrating both the remarkable fixity race had as an object of fascination for German society as well as the conceptual plasticity it exhibited through several historical eras.

Continuity and Change in Communication Systems - Georgette Wang 1984

The growth of developmental and intercultural communication in recent years has prompted scholars to focus their attention on communication systems in non-Western nations, especially those in the Third World. This volume advocates and demonstrates the need to consider continuity and change as the fundamental principle in the development of communication systems. It constitutes the first attempt to critically review the use of indigenous communication systems, as continuing from the past, for planned change.

Mortuary Dialogues - David Lipset 2016-06-01

Mortuary Dialogues presents fresh perspectives on death and mourning across the Pacific Islands. Through a set of rich ethnographies, the book examines how funerals and death rituals give rise to discourse and debate about sustaining moral personhood and community amid modernity and its enormous transformations. The book's key concept, "mortuary dialogue," describes the different genres of talk and expressive culture through which people struggle to restore individual and collective order in the aftermath of death in the contemporary Pacific.

The Church-State Debate -

Emma Long 2012-03-29

The Establishment Clause of the First Amendment governs the relationship between the institutions of the church and those of the state; the Supreme Court, as arbiter of the Constitution, has, since 1947, sought to determine where the line between the two should be drawn. This book shows how and why the Court drew the line in particular cases and how and why the lines that were drawn by the Court had an impact on the relationship between institutions of government and the Church, shaping US politics and society. Using the Supreme Court's cases as a framework, the book shows how the constitutional underpinnings of church-state debates shaped the political, economic, and social debate on the issue, and explores broader debates about religion and American society. This book maintains that the Court cases cannot be

understood separately from the context from which they arose and that legal factors are only part of a broader picture for a historical understanding of the Court and Establishment Clause cases.

Culture and Explosion - Juri Lotman 2009

Demonstrates, with copious examples, how culture influences the way that humans experience 'reality'. This work is suitable for students and researchers in semiotics, cultural/literary studies and Russian studies worldwide, as well as anyone with an interest in understanding contemporary intellectual life.

Asian Popular Culture - Anthony Y.H. Fung 2013-05-29

This book examines different aspects of Asian popular culture, including films, TV, music, comedy, folklore, cultural icons, the Internet and theme parks. It raises important questions such as - What are the implications of popularity of Asian popular culture for globalization? Do regional forces impede the globalizing of cultures? Or does

the Asian popular culture flow act as a catalyst or conveying channel for cultural globalization? Does the globalization of culture pose a threat to local culture? It addresses two seemingly contradictory and yet parallel processes in the circulation of Asian popular culture: the interconnectedness between Asian popular culture and western culture in an era of cultural globalization that turns subjects such as Pokémon, Hip Hop or Cosmopolitan into truly global phenomena, and the local derivatives and versions of global culture that are necessarily disconnected from their origins in order to cater for the local market. It thereby presents a collective argument that, whilst local social formations, and patterns of consumption and participation in Asia are still very much dependent on global cultural developments and the phenomena of modernity, yet such dependence is often concretized, reshaped and distorted by the local media to cater for the local market.

Theorizing Cultural Work -

Mark Banks 2014-04-11

In recent years, cultural work has engaged the interest of scholars from a broad range of social science and humanities disciplines. The debate in this 'turn to cultural work' has largely been based around evaluating its advantages and disadvantages: its freedoms and its constraints, its informal but precarious nature, the inequalities within its global workforce, and the blurring of work-life boundaries leading to 'self-exploitation'. While academic critics have persuasively challenged more optimistic accounts of 'converged' worlds of creative production, the critical debate on cultural work has itself leant heavily towards suggesting a profoundly new confluence of forces and effects. Theorizing Cultural Work instead views

cultural work through a specifically historicized and temporal lens, to ask: what novelty can we actually attach to current conditions, and precisely what relation does cultural work have to social precedent? The contributors to this volume also explore current transformations and future(s) of work within the cultural and creative industries as they move into an uncertain future. This book challenges more affirmative and proselytising industry and academic perspectives, and the pervasive cult of novelty that surrounds them, to locate cultural work as an historically and geographically situated process. It will be of interest to students and scholars of sociology, cultural studies, human geography, urban studies and industrial relations, as well as management and business studies, cultural and economic policy and development, government and planning.

Exploring Masculinities - C.

J. Pascoe 2015-07-01

Exploring Masculinities:

Identity, Inequality, Continuity, and Change is a comprehensive and contemporary reader for the growing field of men's and masculinities studies. It takes a conceptual approach by covering the wide range of scholarship being done on masculinities beyond the model of hegemonic masculinity. C.J. Pascoe and Tristan Bridges extend the boundaries of the field and provide a new framework for understanding masculinities studies. Rather than taking a topics-based approach to masculinity, *Exploring Masculinities* offers an innovative conceptual approach that enables students to study a given phenomenon from a variety of perspectives. It divides up the field in ways that provide accessible introductions to complex debates and key intra- and interdisciplinary distinctions. The book provides a portable set of conceptual tools on which scholars and students can rely to analyze masculinities in different contexts, time periods, and embodiments.

Early Modern Court Culture

- Erin Griffey 2021-11-29

Through a thematic overview of court culture that connects the cultural with the political, confessional, spatial, material and performative, this volume introduces the dynamics of power and culture in the early modern European court.

Exploring the period from 1500 to 1750, Early Modern Court Culture is cross-cultural and interdisciplinary, providing insights into aspects of both community and continuity at

courts as well as individual identity, change and difference. Culture is presented as not merely a vehicle for court propaganda in promoting the monarch and the dynasty, but as a site for a complex range of meanings that conferred status and virtue on the patron, maker, court and the wider community of elites. The essays show that the court provided an arena for virtue and virtuosity, intellectual and social play, demonstration of moral authority and performance of social, gendered, confessional and dynastic identity. Early Modern Court Culture moves from political structures and political players to architectural forms and spatial geographies; ceremonial and ritual observances; visual and material culture; entertainment and knowledge. With 35 contributions on subjects including gardens, dress, scent, dance and tapestries, this volume is a necessary resource for all students and scholars interested in the court in early modern Europe.

Globalization and the Humanities - David Leiwei Li

2003-12-01

This is the most comprehensive collection to date on how economic globalization transforms contemporary humanistic inquiries on matters of fundamental cultural and political significance. Against the tyranny of the worldwide free market that naturalizes the aggregation of power for the increasingly few, the contributors to this volume at once advocate an egalitarian model of global distributive justice and cultivate a cosmopolitan communal consciousness. Writing from their diverse specialties and theoretical perspectives, the group of scholars assembled here has made the humanities a productive forum to articulate an alternative form of globalization based on universal human rights. As such, this collaborative effort counters the hegemony of neoliberal privatization and holds the promise of intellectual agency for an equitable reproduction of cultural capital in the global

era. Globalization and the Humanities will be of great use for scholars and students interested in the intellectual and ideological developments of the humanities in the past three decades. It clearly anchors the debates on the canon, the inclusion of third world and minority authors, of popular cultural genres and new media forms in an emerging globalization paradigm. The anthology will prove essential for students of undergraduate and graduate levels as well for scholars in the academy.

Children and Childhood in Western Society Since 1500

- Hugh Cunningham

2014-07-10

This book investigates the relationship between ideas about childhood and the actual experience of being a child, and assesses how it has changed over the span of five hundred years. Hugh Cunningham tells an engaging story of the development of ideas about childhood from the Renaissance to the present, taking in Locke, Rousseau,

Wordsworth and Freud, revealing considerable differences in the way western societies have understood and valued childhood over time. His survey of parent/child relationships uncovers evidence of parental love, care and, in the frequent cases of child death, grief throughout the period, concluding that there was as much continuity as change in the actual relations of children and adults across these five centuries. For undergraduate courses in History of the Family, European Social History, History of Children and Gender History.
