## **Rusch to Glory** - Rebecca Rusch 2014-10-01

Rebecca Rusch is one of the great endurance athletes of our time. Known today as the Queen of Pain for her perseverance as a relentlessly fast runner, paddler, and mountain bike racer, Rusch was a normal kid from Chicago who abandoned a predictable life for one of adventure. In her new book *Rusch to Glory: Adventure, Risk & Triumph on the Path Less Traveled*, Rusch weaves her fascinating life's story among the exotic locales and extreme conditions that forged an extraordinary athlete from ordinary roots. Rusch has run the gauntlet of endurance sports over her career as a professional athlete-- climbing, adventure racing, whitewater rafting, cross-country skiing, and mountain biking--racking up world championships along the way. But while she might seem like just another superhuman playing out a fistful of aces, her empowering story proves that anyone can rise above self-doubt and find their true potential. First turning heads with her rock climbing and paddling skills, Rusch soon found herself spearheading adventure racing teams like Mark Burnett's Eco-Challenge series. As she fought her way through the jungles of Borneo, raced camels across Morocco, threaded the rugged Tian Shan mountains, and river-boarded the Grand Canyon in the dead of winter, she was forced to stare down her own demons. Through it all, Rusch continually redefined her limits, pushing deep into the pain cave and emerging ready for the next great challenge. At age 38, Rusch faced a tough decision: retire or reinvent herself yet again. Determined to go for broke, she shifted her focus to endurance mountain bike racing and rode straight into the record books at a moment when most athletes walk away. *Rusch to Glory* is more than an epic story of adventure; it is a testament to the rewards of hard work, determination, and resilience on the long road to personal and professional triumph.

A worldwide survey of innovative work, ranging from makers of functional ceramic objects such as teapots and tableware to those who explore the possibilities of clay as an artistic medium. Over the last decade the narrowing of the gulf that traditionally existed between the realms of fine art and craft has resulted in a shift in perception of what ceramics can be and can mean. All areas of ceramic practice have been revitalized as a result—the creative possibilities that artists, lured by the plastic and tactile qualities of clay, have brought with them into ceramics have influenced ceramists of all backgrounds. Analyzing work from the last ten years, this book covers every aspect of contemporary ceramic practice and includes work of all sizes—from a few inches to large-scale installations. It is organized into five main chapters: Beyond Utility: original yet functional ceramics Defining Space: wheel-thrown shapes, slip-cast forms, and hand-built structures Mind the Gap: sculptural work from precise and mechanical to freely modeled forms A Sense of Space: installations, both site-specific and environmental The Line of Beauty: collaborations between art and industry that result from advances in technology Contemporary Ceramics also includes biographies of the featured ceramists and a directory of museums and galleries.

What Is Art For? - Ellen Dissanayake 2015-09-01

Every human society displays some form of behavior that can be called "art," and in most societies other than our own the arts play an integral part in social life. Those who wish to understand art in its broadest sense, as a universal human endowment, need to go beyond modern Western elitist notions that disregard other cultures and ignore the

human species' four-million-year evolutionary history. This book offers a new and unprecedentedly comprehensive theory of the evolutionary significance of art. Art, meaning not only visual art, but music, poetic language, dance, and performance, is for the first time regarded from a biobehavioral or ethical viewpoint. It is shown to be a biological necessity in human existence and fundamental characteristic of the human species. In this provocative study, Ellen Dissanayake examines art along with play and ritual as human behaviors that "make special," and proposes that making special is an inherited tendency as intrinsic to the human species as speech and toolmaking. She claims that the arts evolved as means of making socially important activities memorable and pleasurable, and thus have been essential to human survival. Avoiding simplism and reductionism, this original synthetic approach permits a fresh look at old questions about the origins, nature, purpose, and value of art. It crosses disciplinary boundaries and integrates a number of diverse fields: human ethology; evolutionary biology; the psychology and philosophy of art; physical and cultural anthropology; "primitive" and prehistoric art; Western cultural history; and children's art. The final chapter, "From Tradition to Aestheticism," explores some of the ways in which modern Western society has diverged from other societies--particularly the type of society in which human beings evolved--and considers the effects of the aberrance on our art and our attitudes toward art. This book is addressed to readers who have a concerned interest in the arts or in human nature and the state of modern society.

Slave Stealers - Timothy Ballard 2018-09-04

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia

and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
