Impact of Culture on Human Interaction - Hede Helfrich 2008

Will cultural diversity inevitably result in a "clash" (antagonism) between cultural groups, or can we rise to the "challenge" of applying global standards of thought and behavior across diverse cultures? This is the main question examined in this unique book. Based on experiences and research in the context of the political, social, and economic reconstruction of the former Soviet Union, the book focuses on the risks and opportunities of intercultural cooperation and cultural diversity. The first part examines the administrative and political reforms in contemporary Russia from a comparative viewpoint. Capturing the polarities between governmental centralization and social self-organization, the contributions diagnose the roots of social conflicts in Russia and other countries and try to identify societal characteristics that may provide opportunities for mutual transfer of knowledge between East and West. The second part analyzes universal versus culture-specific aspects of human resource management. It addresses similarities and differences in values, work motivation, and decision-making in different cultures. As well as outlining future trends of cultural divergence and cultural convergence, possible means of promoting cultural synergy and concrete examples of this in the fields of economics and education are presented and evaluated. The uniqueness of the book lies in its interdisciplinary and international perspectives: Experts in the fields of sociology, philosophy, economics, psychology, political science, and administration from Russia, Moldavia, Germany, The Netherlands, USA, China, South Korea, and Japan help to bridge the gap between different disciplines as well as between different countries. Providing new theoretical insights as well as practical advice, this volume is of interest for a wide audience, including researchers and students of the above fields, as well as managers in business, administration, and education.

The Clash of Cultures on the Medieval Baltic Frontier - Alan V. Murray 2016-12-05

The conversion of the lands on the southern and eastern shores of the Baltic Sea by Germans, Danes and Swedes in the period from 1150 to 1400 represented the last great struggle between Christianity and paganism on the European continent, but for the indigenous peoples of Finland, Livonia, Prussia, Lithuania and Pomerania, it was also a period of wider cultural conflict and transformation. Along with the Christian faith came a new and foreign culture: the German and Scandinavian languages of the crusaders and the Latin of their priests, new names for places, superior military technology, and churches and fortifications built of stone. For newly baptized populations, the acceptance of Christianity encompassed major changes in the organization and practice of political, religious and social life, entailing the acceptance of government by alien elites, of new cultic practices, and of new obligations such as taxes, tithes and military service in the armies of the Christian rulers. At the same time, as the Western conquerors carried their campaigns beyond pagan territory into the principalities of north-western Russia, the Baltic Crusades also developed into a struggle between Roman Catholicism and Orthodoxy. This collection of sixteen essays by both established and younger scholars explores the theme of clash of cultures from a variety of perspectives, discussing the nature and ideology of crusading in the medieval Baltic region, the struggle between Catholicism and Orthodoxy, and the cultural confrontation that accompanied the process of conversion, in subjects as diverse as religious observation, political structures, the practice of warfare, art and music, and perceptions of the landscape.

Clash of Cultures - Brian M. Fagan 1998

Clash of Cultures, Second Edition, is a captivating exploration of the Age of Discovery, when Western civilization first came into contact - and conflict - with all the other peoples of the world. Internationally known archeologist Brian Fagan draws on original sources and scholarly writing from dozens of academic disciplines to chart the tragic effects of first contact, illuminating the resulting racism, ethnocentrism, and ever-growing chasm between industrial nations and traditional societies. This seminal book includes case studies covering a wide variety of societies, including the Khoikhoi of South Africa, the Aztecs of Mexico, and the Tahitians. Special attention is paid to the Hurons of Canada, the natives of the American Northwest, and the Tasmanians and Maori of New Zealand. The second edition includes a new introduction, chapters on early Japan and the effects of epidemic disease, and a revised guide to further reading. *Clash of Cultures* is an ideal text for students studying the background of the modern world.

Proceedings of an international conference, held in Jerusalem, which focused on the role of adult education in multicultural societies in view of the unexpected revival of nationalism, xenophobia and racism in the post-perestroika era. Anxiety was expressed about rising violence against foreigners and interethnic conflict in hitherto liberal West-European communities. The issues raised were: the challenge of education vis-a-vis contemporary political, social, economic and technical realities; how to promote democratic values; how to encourage unity against diversity; how to ensure basic human rights; defusing tensions between ethnic, cultural and religious communities, between majorities and minorities

and between antagonistic nations.

When the plane landed in the airport, I still could not believe that I was in a Western country. Putting my feet on a foreign country's soil, and specially a Western one; seeing people from so many different places, races and languages, and so many other new experiences which were happening to me just within 24 hours, and this was too much for me. I was dizzy and confused and at the same time flying over the moon. By then, I had always seen the same people with the same race and color and the same language and culture for the whole my life, and now everything was so different. For a moment, I thought I was in another planet! But it was not, it was the West!

Clash! - Hazel Rose Markus 2014-06-24

"If you fear that cultural, political, and class differences are tearing America apart, read this important book." —Jonathan Haidt, Ph.D., author of *The Righteous Mind* Who will rule in the twenty-first century: allegedly more disciplined Asians, or allegedly more creative Westerners? Can women rocket up the corporate ladder without knocking off the men? How can poor kids get ahead when schools favor the rich? As our planet gets smaller, cultural conflicts are becoming fiercer. Rather than lamenting our multicultural worlds, Hazel Rose Markus and Alana Conner reveal how we can leverage our differences to mend the rifts in our workplaces, schools, and relationships, as well as on the global stage. Provocative, witty, and painstakingly researched, *Clash!* not only explains who we are, it also envisions who we could become.

A Clash of Cultures - Robert M. Utley 2005-01-01

On September 8, 1886, soldiers and Indians gathered on the parade ground of a frontier post nestled amid cactus-studded hills. A cordon of blueclad troopers formed around a train of open wagons loaded with Indian families. As a military band drawn up at the base of the flagstaff played "Auld Lang Syne," the procession moved out of the fort and headed north. The post was Fort Bowie, Arizona, for a quarter of a century a lonely bastion in Apache Pass, the heart of Apacheria. The Indians were Geronimo and his band of Chiricahua Apaches, for more than a decade scourges of the southwestern frontier. Now the warfare had ended, and with a touch of musical irony the victors bade farewell as the vanquished were escorted to the railroad cars that would bear them eastward to an uncertain future. Today the gaunt ruins of Fort Bowie, set in an environment otherwise uncluttered by man's works, recall a dramatic and significant phase of the American past—the struggle of a dynamic and aggressive people to conquer the wilderness, and the struggle of a proud and independent people to retain the wilderness and the way of life they had known.

The Clash of Civilizations and the Remaking of World Order -

Samuel P. Huntington 2007-05-31

The classic study of post-Cold War international relations, more relevant than ever in the post-9/11 world, with a new foreword by Zbigniew Brzezinski. Since its initial publication, *The Clash of Civilizations and the Remaking of World Order* has become a classic work of international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it "has earned a place on the shelf of only about a dozen or so truly enduring

works that provide the quintessential insights necessary for a broad understanding of world affairs in our time." Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross-civilization cooperation is to restoring peace. As ideological distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts—and new cooperation—have replaced the old order of the Cold War era. *The Clash of Civilizations and the Remaking of World Order* explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly "universal" Western ideals, and intensify intercivilization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy. The Muslim population surge has led to many small wars throughout Eurasia, and the rise of China could lead to a global war of civilizations. Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex, multipolar, multicivilizational world.

Clash of Cultures - Gerald M. Haslam 1984

The Fear of Barbarians - Tzvetan Todorov 2010-10-15

The relationship between Western democracies and Islam, rarely entirely comfortable, has in recent years become increasingly tense. A growing immigrant population and worries about cultural and political assimilation—exacerbated by terrorist attacks in the United States, Europe, and around the world—have provoked reams of commentary from all parts of the political spectrum, a frustrating majority of it hyperbolic or even hysterical. In *The Fear of Barbarians*, the celebrated intellectual Tzvetan Todorov offers a corrective: a reasoned and often highly personal analysis of the problem, rooted in Enlightenment values yet open to the claims of cultural difference. Drawing on history, anthropology, and politics, and bringing to bear examples ranging from the murder of Theo van Gogh to the French ban on headscarves, Todorov argues that the West must overcome its fear of Islam if it is to avoid betraying the values it claims to protect. True freedom, Todorov explains, requires us to strike a delicate balance between protecting and imposing cultural values, acknowledging the primacy of the law, and yet strenuously protecting minority views that do not interfere with its aims. Adding force to Todorov's arguments is his own experience as a native of communist Bulgaria: his admiration of French civic identity—and Western freedom—is vigorous but non-nativist, an inclusive vision whose very flexibility is its core strength. The record of a penetrating mind grappling with a complicated, multifaceted problem, *The Fear of Barbarians* is a powerful, important book—a call, not to arms, but to thought.

Culture Clash 2 - Thomas D. Zweifel 2013-07

Few are prepared for managing across cultures, and the costs of cultural blind spots can spin out of control—from lawsuits to lost opportunities. Forged in the fire of clashing cultures and living on four continents, Dr. Zweifel developed a fool-proof methodology for managing successfully across borders. And post-9/11, the Arab Spring and the BRICS emerging markets, e-commerce and social networks have made this updated and expanded edition of *Culture Clash* indispensable. *Culture Clash 2* is not another Kiss, Bow or Shake Hands. Such protocol-laden works on whether to bring wine to a dinner in Singapore or how many times to kiss in France might have their uses, but non-compliance with local etiquette has rarely been a deal-breaker. What has derailed international business is the inability of managers to see the world from their counterpart's point of view, read between the lines, and decode the mind-set of the other side.

America and Political Islam - Fawaz A. Gerges 1999

This book chronicles the policy debates on Islamism in the United States over the course of time, providing a comprehensive account of the origins of policy followed by a balanced critique and recommendations for change. It then delves deeper into the US political scene to analyze the historical, political, cultural, and security issues that might help explain America's preoccupation with Islam and Muslims. Furthermore, the author sheds much light on the multiplicity of regional and international factors, such as the political decay of the Middle Eastern state and the end of the Cold War, that shape the thinking of US officials about the contemporary Islamist phenomenon. In addition to examining the domestic, regional, and international context of US Islam policy, the book applies and tests the pronouncements of US officials in four representative case studies - Iran, Algeria, Egypt and Turkey. Finally, Gerges addresses the clash of civilizations debate and assesses the relative weight of culture and values in US officials' words and deeds on Islamism.

Clash of Civilizations Over an Elevator in Piazza Vittorio - Amara Lakhous 2008-09-30

The immigrant tenants of a building in Rome offer skewed accounts of a murder in this prize-winning satire by the Algerian-born Italian author (Publishers Weekly). Piazza Vittorio is home to a polyglot community of immigrants who have come to Rome from all over the world. But when a tenant is murdered in the building's elevator, the delicate balance is thrown into disarray. As each of the victim's neighbors is questioned by the police, readers are offered an all-access pass into the most colorful neighborhood in contemporary Rome. With language as colorful as the neighborhood it describes, each character takes his or her turn "giving evidence." Their various stories reveal much about the drama of racial

identity and the anxieties of a life spent on society's margins, but also bring to life the hilarious imbroglis of this melting pot Italian culture. "Their frequently wild testimony teases out intriguing psychological and social insight alongside a playful whodunit plot." —Publishers Weekly

The Clash of the Cultures - John C. Bogle 2012-07-05

Recommended Reading by Warren Buffet in his March 2013 Letter to Shareholders How speculation has come to dominate investment—a hard-hitting look from the creator of the first index fund. Over the course of his sixty-year career in the mutual fund industry, Vanguard Group founder John C. Bogle has witnessed a massive shift in the culture of the financial sector. The prudent, value-adding culture of long-term investment has been crowded out by an aggressive, value-destroying culture of short-term speculation. Mr. Bogle has not been merely an eye-witness to these changes, but one of the financial sector's most active participants. In *The Clash of the Cultures*, he urges a return to the common sense principles of long-term investing. Provocative and refreshingly candid, this book discusses Mr. Bogle's views on the changing culture in the mutual fund industry, how speculation has invaded our national retirement system, the failure of our institutional money managers to effectively participate in corporate governance, and the need for a federal standard of fiduciary duty. Mr. Bogle recounts the history of the index mutual fund, how he created it, and how exchange-traded index funds have altered its original concept of long-term investing. He also presents a first-hand history of Wellington Fund, a real-world case study on the success of investment and the failure of speculation. The book concludes with ten simple rules that will help investors meet their financial goals. Here, he presents a common sense strategy that "may not be the best strategy ever devised. But the number of strategies that are worse is infinite." *The Clash of the Cultures: Investment vs. Speculation* completes the trilogy of best-selling books, beginning with Bogle on Investing: *The First 50 Years* (2001) and *Don't Count on It!* (2011)
