Scars, Marks & Tattoos - Jacqueline Caruso
2021-03-31

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Room 555 - Cristy Wilson 2019-01-29

Fourteen-year-old Roonie loves hip-hop almost as much as she loves her grandmother. She cannot wait to compete in her school's dance

competition. But as her grandmother's health deteriorates, Roonie becomes more and more reluctant to visit her in the care home. These feelings of guilt and frustration cause Roonie to mess things up with her hip-hop dance partner and best friend, Kira. But while doing some volunteer hours in the hospital geriatric ward, Roonie meets an active senior recovering from a bad fall. Their shared love of dance and the woman's zest for life help Roonie face her fears, make amends with Kira and reconnect with Gram before it's too late.

Innovation Policy Challenges for the 21st Century - Deborah Cox 2013-01-25

As the economies of western countries move from primarily resource-based to knowledge-

based, and trade liberalization limits what governments can do through direct action, the landscape of innovation is changing and policymakers must react accordingly. This exciting new book examines the challenges that policy makers face in responding to a new environment. The book addresses how governments are now seeking to drive innovation through new forms of R&D policies, through public procurement, skills development, entrepreneurship and innovation culture to name but a few of the approaches. *Innovation Policy Challenges for the 21st Century* explores these and other contemporary issues in innovation, reviewing the state of the art literature and consolidating current thinking at the frontiers of innovation. The volume debates and presents scattered and anonymous material in a coherent way, with a particular focus is on 'hot topics' in the field of innovation studies that have been previously under-researched. The book is divided into four key themes: government as a key actor in the innovation process, entrepreneurs as innovators, skills and competences required to maintain and improve innovation performance in Europe and finally, the wider context in which innovation policy develops.

When Rabbit Howls - Truddi Chase 1990-04-01

A woman diagnosed with dissociative identity disorder reveals her harrowing journey from abuse to recovery in this #1 New York Times bestselling autobiography written by her own multiple personalities. Successful, happily married Truddi Chase began therapy hoping to find the reasons behind her extreme anxiety, mood swings, and periodic blackouts. What emerged from her sessions was terrifying: Truddi's mind and body were inhabited by the

Troops—ninety-two individual voices that emerged to shield her from her traumatizing childhood. For years the Troops created a world where she could hide from the pain of the ritualized sexual abuse she suffered at the hands of her own stepfather—abuse that began when she was only two years old. It was a past that Truddi didn't even know existed, until she and her therapist took a journey to where the nightmare began... Written by the Troops themselves, *When Rabbit Howls* is told by the very alter-egos who stayed with Truddi Chase, watched over her, and protected her. What they reveal is a spellbinding descent into a personal hell—and an ultimate, triumphant deliverance for the woman they became.

The Animals Reader - Linda Kalof 2020-11-26

The Animals Reader brings together key classic and contemporary writings from philosophy, ethics, sociology, cultural studies, anthropology, environmental studies, history, law and science. Providing a framework for understanding the state of the multidisciplinary field of animal studies, the second edition contains updated content reflecting the developments in research and theory in the field that have emerged in the ten years since publication of the first edition. With new chapters from Peter Singer, Carol Gigliotto, Jacques Derrida and Irus Braverman, and new topics covered including the connection between animal abuse and interpersonal violence and human-animal relations, this book is the go-to resource for students of animal studies. Extracts are from academic texts and more popular texts alike as readers are given a sense of how human-animal relations have been understood and critiqued through time. Helpful pedagogical features specific to this edition include: - an explanatory updated Editors Introduction - updated introductions to each extract, with details about the author of that piece and the context of their writing - further reading suggestions at the end of each section, updated to reflect new scholarship. With favourite chapters from the first edition preserved, this second edition has all the required new content to bring *The Animals Reader* fully up to date.

The Day the President Was Shot - Bill O'Reilly

2016-06-21

The year was 1981. Just two months into his presidency, Ronald Reagan was shot after leaving a speaking engagement in Washington, D. C. The quick action of the Secret Service and medical professionals saved the president's life. Mere days after his near-death experience, Reagan's personal strength propelled him back into his presidential duties. Adapted from Bill O'Reilly's historical thriller *Killing Reagan*, with characteristically gripping storytelling, this story explores the events of the day Reagan was shot. From the scene of the shooting and the dramatic action of the Secret Service, to the FBI's interrogation of the shooter, the life-saving measures of the medical professionals and the president's extraordinary recovery, this is a page-turning account of an attempted assassination and its aftermath. This title has Common Core connections.

Lancashire Lass - Anna Jacobs 2001-02-01
'Another riveting book from Anna Jacobs' - 5-star reader review
Seventeen-year-old Liza is happy working as a lady's maid - until her employers decide to emigrate and her father makes up his mind that she is to wed an older widower whom she detests. Determined to avoid a loveless marriage, Liza plans to run away. But when the widower rapes her to force her to marry him, she flees back to the family for whom she worked. She feels she has no choice but to go with them to Australia, and they all set out on the long voyage. On board ship, Liza discovers to her horror that she has fallen pregnant. Even if she can survive the journey, the demanding life of a settler in 1850s Western Australia will be made even harder by an illegitimate child. But Liza is to find that in addition to deprivation of the worst sort, Australia will offer her opportunities she could never have dreamt of back home in Lancashire. *****

Personalized Machine Learning - Julian McAuley 2022-01-31

Every day we interact with machine learning systems offering individualized predictions for

our entertainment, social connections, purchases, or health. These involve several modalities of data, from sequences of clicks to text, images, and social interactions. This book introduces common principles and methods that underpin the design of personalized predictive models for a variety of settings and modalities. The book begins by revising 'traditional' machine learning models, focusing on adapting them to settings involving user data, then presents techniques based on advanced principles such as matrix factorization, deep learning, and generative modeling, and concludes with a detailed study of the consequences and risks of deploying personalized predictive systems. A series of case studies in domains ranging from e-commerce to health plus hands-on projects and code examples will give readers understanding and experience with large-scale real-world datasets and the ability to design models and systems for a wide range of applications.

Development Through the Lifespan - Laura E. Berk 2013-08-05

Laura Berk's *Development Through the Lifespan* is relied upon in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, cutting-edge consideration of the interrelationships between heredity and environment, rich examples, and long-standing commitment to presenting the most up-to-date scholarship. This new edition continues to offer students research-based practical applications that they can relate to their personal and professional lives. Laura Berk, renowned professor and researcher, has revised the text with new pedagogy, a heightened emphasis on the interplay between heredity and environment, and an enhanced focus on many social policy issues, while emphasizing the lifespan perspective throughout. The latest theories and findings in the field are made accessible to students in a manageable and relevant way. Berk's signature storytelling style invites students to actively learn beside the text's "characters." Students are provided with an especially clear and coherent understanding of the sequence and underlying processes of human development, emphasizing the interrelatedness of all domains-physical, cognitive, emotional, social-throughout the text narrative and in special features. Berk also helps

students connect their learning to their personal and professional areas of interest. Her voice comes through when speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called to intelligently approach the responsibility of understanding and responding to the needs and concerns of both young and old. While carefully considering the complexities of human development, Berk presents classic and emerging theories in an especially clear, engaging writing style, with a multitude of research-based, real-world, cross-cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent scholarship, representing the changing field of human development. Twelve Years a Slave - Solomon Northup
2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Biomarkers of Human Aging - Alexey Moskalev
2019

This book collects and reviews, for the first time, a wide range of advances in the area of human aging biomarkers. This accumulated data allows researchers to assess the rate of aging processes in various organs and systems, and to individually monitor the effectiveness of therapies intended to slow aging. In an introductory chapter, the editor defines biomarkers of aging as molecular, cellular and physiological parameters that demonstrate reproducible changes - quantitative or qualitative - with age. The introduction recounts a study which aimed to create a universal model of biological age, whose most predictive parameters were albumin and alkaline phosphatase (indication liver function), glucose (metabolic syndrome), erythrocytes (respiratory function) and urea (renal function). The book goes on to describe DNA methylation, known as the "epigenetic clock," as currently the most comprehensive predictor of total mortality. It is also useful for predicting mortality from cancer and cardiovascular diseases, and for analyzing

the effects of lifestyle factors including diet, exercise, and education. Individual contributions draw additional insight from research on genetics and epigenetic aging markers, and immunosenescence and inflammaging markers. A concluding chapter outlines the challenge of integrating of biological and clinical markers of aging. Biomarkers of Human Aging is written for professionals and practitioners engaged in the study of aging, and will be useful to both advanced students and researchers.

Achtung-Panzer! - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War.

Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Videogames and Education - Harry J. Brown
2014-12-18

Video games challenge our notions of identity, creativity, and moral value, and provide a powerful new avenue for teaching and learning. This book is a rich and provocative guide to the role of interactive media in cultural learning. It searches for specific ways to interpret video games in the context of human experience and in the field of humanities research. The author shows how video games have become a powerful form of political, ethical, and religious discourse, and how they have already influenced the way we teach, learn, and create. He discusses the major trends in game design, the public controversies surrounding video games, and the predominant critical positions in game criticism. The book speaks to all educators, scholars, and

thinking persons who seek a fuller understanding of this significant and video games cultural phenomenon.

Geriatric Palliative Care - R. Sean Morrison
2003-05-08

Geriatric Palliative Care covers a broad spectrum of issues characterizing care near the end of life for older adults. Beginning with the social and cultural context of old age and frailty, this volume details specific aspects of palliative care relevant to particular disorders (e.g. cancer, strokes, dementia, etc.) as well as individual symptoms (e.g., pain, fatigue, anxiety, etc.). Communication between care-givers and patients, in a variety of settings, is also discussed. The theme of this book is that palliative care is the best approach to the care of chronically ill and frail elderly because of its focus on: quality of life; support for functional independence; and the centrality of the patient's values and experiences in determining the goals of medical care. Indeed, Geriatric Palliative Care provides a comprehensive medical reference for all clinicians who care for older adults.

Christ in the Passover - Rose Publishing
2008-02-21

Christ in the Passover - Celebrate a Christian Passover Seder. The Passover is the Old Testament feast that celebrates and remembers God's liberation of Israel from Egypt. It also foreshadows Christ's sacrifice on the cross. In just 14 pages, you will learn the history of this special day and the symbolism in the Passover that points to Jesus Christ. Christ in the Passover also includes a Christian Passover Seder script that can be used by Christians year round. Christ in the Passover is an excellent Bible study topic at anytime, but especially near Easter. The Christian Passover Seder script is a touching worship experience for Sunday school classes and lessons on Moses and the Exodus. This pamphlet even includes the Passover Seder recipes. 14 panels, fits inside most Bibles, 8.5 x 5.5 inches, unfolds to 38 inches long Christians celebrate the Passover as a holiday that commemorates God's miraculous rescue of Israel from Egyptian captivity. The Lord instituted the Passover feast nearly 3,500 years ago to remind his people of how much he loved them. The Passover is meaningful to Christians today because it is packed with symbolism that points to Jesus Christ. The messianic symbolism in the Passover is a powerful message of salvation in Christ. Christ in the Passover shows six ways that the Passover in the Old Testament points to Jesus, who was called the "Lamb of God." This [Passover] is a day to remember. Each year, from generation to generation, you must celebrate it as a special festival to the LORD. This is a law for all time. Exodus 12:14, The Holy Bible Christ in the Passover gives hundreds of facts at a glance, including: The Passover story from the Bible - celebrating the Exodus from Egypt The parallels between the Passover in the Old Testament and the work of Jesus Christ as the perfect Passover lamb in the New Testament. This is a good way of explaining the Jewish roots of Christianity. The symbolism of the perfect lamb The similarities between Passover and the Lord's Supper A Christian Passover Seder script, with everything you will need, including the recipes. Our staff held a

seder and it was very meaningful to everyone. It takes only 30 minutes and is good for all ages. Children have fun finding the hidden matzah bread that symbolizes Jesus. The Christian Seder can be used at home, in a small group, a classroom or a Bible study. Why is the Passover story important for Christians today? At some point, you will face hard times, tough problems, and unfair circumstances. It's good to know that when times are tough, God loves you and watches out for you. Passover is a reminder of God's control over earthly events and ultimate victory over sin and death. Christ in the Passover will increase your faith in God as you learn that Jesus was sent to earth to become the Passover Lamb for all humanity.

Living with Dementia - Dementia Alliance
2017-01-30

There are many resources available about the cognitive changes and impairments associated with dementia, including Alzheimer's. Little has been written, however, about LIVING with, what for many will be, a long-term condition. This handbook provides information and insights provided by people living with dementia and their care partners to help family and friends better understand living with early and moderate symptoms of dementia, and how to best support someone you care about.

Mental Health Atlas 2005 - World Health Organization. Department of Mental Health and Substance Abuse 2005

This atlas is aimed at collecting, compiling and disseminating information on mental health resources in the world. It presents updated and expanded information from 192 countries with analyses of global and regional trends as well as individual country profiles. Newly included in this volume is a section on epidemiology within the profiles of all low and middle income countries. It shows that mental health resources within most countries remain inadequate despite modest improvements since 2001. Availability of mental health resources across countries and between regions remains substantially uneven, with many countries having few resources. The atlas reinforces the urgent need to enhance mental health resources within countries.

Maintain Your Brain - Michael J. Valenzuela
2011

You CAN take practical steps to avoid dementia - and this book from an Australian expert shows you how. Within twenty years, dementia is set to overtake heart disease as the number one cause of death in Australia. Recent studies show that almost half our adult population already have a family member or friend with the illness. Those statistics seem rather grim, but there is GOOD NEWS! We don't need to accept dementia as an inevitable part of ageing. The main forms of dementia affecting people today are not inherited, and there are practical steps you can take right now that will not only help prevent

dementia but also improve the overall health of your mind and body. In *MAINTAIN YOUR BRAIN*, leading Australian expert Dr Michael Valenzuela addresses all the common (and not-so-common) questions people have about dementia, and explains complex cutting-edge medical discoveries in a way that is clear and easy to understand. His practical advice is based on years of first-hand research and experience, and covers everything from blood pressure, diet and cholesterol to mental activity and physical exercise. Featuring plenty of simple tips, summaries and even recipes, this book is essential reading for anyone who wants to enjoy a healthy, active and happy life well into old age.

Organized Crime, Corruption and Crime Prevention - Stefano Caneppele 2013-10-30

This volume collects new contributions to research on mafias, organized crime, money laundering, and other forms of complex crimes, gathering some of the most authoritative and well-known scholars in the field. The chapters for this volume are original pieces written in honor of the retirement of Dr. Ernesto U. Savona, highlighting his research and legacy. Throughout his academic career, Professor Ernesto U. Savona has investigated complex crimes ranging from organized crime, to economic crime, to money laundering. In his work, he has tried to bring together academics, policy makers, and practitioners to bring understanding for crime problems and innovative solutions. His passion towards the practical application of the findings of scientific research led him to found Transcrime in 1994, which is today among the most important criminological think-tanks in Europe. This important book is aimed at scholars studying criminal policy and research, particularly in the areas of criminal networks, organized crime, white collar crime, the history of criminology.

Thinking about Dementia - Annette Leibing 2006

Cultural responses to most illnesses differ; dementia is no exception. These responses, together with a society's attitudes toward its elderly population, affect the frequency of dementia-related diagnoses and the nature of treatment. Bringing together essays by nineteen respected scholars, this unique volume approaches the subject from a variety of angles, exploring the historical, psychological, and philosophical implications of dementia. Based on solid ethnographic fieldwork, the essays employ a cross-cultural perspective and focus on questions of age, mind, voice, self, loss, temporality, memory, and affect. Taken together, the essays make four important and interrelated contributions to our understanding of the mental status of the elderly. First, cross-cultural data show the extent to which the aging process, while biologically influenced, is also very much culturally constructed. Second, detailed ethnographic reports raise questions about the behavioral criteria used by health care professionals and laymen for defining the elderly as demented. Third, case studies show how a diagnosis affects a patient's treatment in both clinical and familial settings.; Finally, the collection highlights the gap that separates current biological understandings of aging from its cultural meanings. As Alzheimer's disease and other forms of dementia continue to command an ever-increasing amount of attention in medicine and psychology, this book will be essential reading for anthropologists, social scientists, and health care professionals.
