Masterminding the Deal - Peter Clark 2013-08-03

Following a quiet period in global M&A activity, a new boom seems to be underway, but in an age where two-thirds of all merger deals can be said to fail (where deals fall short of the minimum required financial returns to the acquiring company), how can future success be guaranteed? And what can acquirers, and their shareholders and advisers, do to improve the chances of success? *Masterminding the Deal* looks at performance in two critical areas - merger segmentation (the identification of critical characteristics and attributes separating more successful mergers from the rest) and category-specific synergy diagnosis (the differentiation of synergy benefits - expenses, revenues, tax - to ensure maximum rewards). Through this in-depth analysis, the book provides the managers and advisers of acquiring firms with concise and actionable frameworks to improve and enhance merger performance. *Masterminding the Deal* will help you to identify and apply the key components of merger success.

Transnational Accounting - Dieter Ordelheide 2016-02-17

Considerable effort has been made over the last ten years by such institutions as the EU, OECD, UNO and the IASC towards the harmonisation of accounting standards. It is recognised though that uniformity and true compatibility of financial instruments cannot be achieved while accounting operates in individual national economic and legal environments. A knowledge of national accounting standards and practice continues to be indispensable for the analysis of financial statements. *Transnational Accounting* is a unique comparative study of accounting standards of fourteen major economic powers, plus the regimes of the IASC and EU. Each chapter is standardised for easy comparison and written by a recognised expert in his or her country. The Editor, The Late Dieter Ordelheide, was Professor of Business Economics at the Johann Wolfgang Goethe-Universität, Frankfurt am Main. This groundbreaking work enables the reader to develop a thorough practical understanding of national accounting practices and be fully at home with financial statements in an international context. Each volume includes a detailed reference matrix listing approximately 100 key accounting subjects and their treatment across all regulatory and accounting regimes.
