Theorizing Cultural Work - Mark Banks 2014-04-11

In recent years, cultural work has engaged the interest of scholars from a broad range of social science and humanities disciplines. The debate in this 'turn to cultural work' has largely been based around evaluating its advantages and disadvantages: its freedoms and its constraints, its informal but precarious nature, the inequalities within its global workforce, and the blurring of work-life boundaries leading to 'self-exploitation'. While academic critics have persuasively challenged more optimistic accounts of

'converged' worlds of creative production, the critical debate on cultural work has itself leaned heavily towards suggesting a profoundly new confluence of forces and effects. Theorizing Cultural Work instead views cultural work through a specifically historicized and temporal lens, to ask: what novelty can we actually attach to current conditions, and precisely what relation does cultural work have to social precedent? The contributors to this volume also explore current transformations and future(s) of work within the cultural and creative industries as they move into an uncertain future. This book challenges more affirmative and proselytising industry and academic perspectives, and the pervasive cult of novelty that surrounds them, to locate cultural work as an historically and geographically situated process. It will be of interest to students and scholars of sociology, cultural studies, human geography, urban studies and industrial relations, as well as management and

business studies, cultural and economic policy and development, government and planning.

East Asian Capitalism -

Andrew Walter 2012-07-26

This volume analyses developments in East Asian capitalism since the 1980s, focussing on three main areas: business systems, financial structures, and labour markets.

Asian Popular Culture -

Anthony Y.H. Fung 2013-05-29

This book examines different aspects of Asian popular culture, including films, TV, music, comedy, folklore, cultural icons, the Internet and theme parks. It raises important questions such as - What are the implications of popularity of Asian popular culture for globalization? Do regional forces impede the globalizing of cultures? Or does the Asian popular culture flow act as a catalyst or conveying channel for cultural globalization? Does the globalization of culture pose a threat to local culture? It addresses two seemingly contradictory and yet parallel processes in the circulation of Asian popular culture: the interconnectedness between

Asian popular culture and western culture in an era of cultural globalization that turns subjects such as Pokémon, Hip Hop or Cosmopolitan into truly global phenomena, and the local derivatives and versions of global culture that are necessarily disconnected from their origins in order to cater for the local market. It thereby presents a collective argument that, whilst local social formations, and patterns of consumption and participation in Asia are still very much dependent on global cultural developments and the phenomena of modernity, yet such dependence is often concretized, reshaped and distorted by the local media to cater for the local market.

Graphing Culture Change in North American Archaeology -

R. Lee Lyman 2021-06-10

Documentation, analysis, and explanation of culture change have long been goals of archaeology. Scientific graphs facilitate the visual thinking that allow archaeologists to determine the relationship between variables, and, if well designed, comprehend the processes implied by the relationship. Different graph types suggest different ontologies and theories of change, and particular techniques of parsing temporally continuous morphological variation of artefacts into types influence graph form. North American archaeologists have grappled with finding a graph that effectively and efficiently

displays culture change over time. Line graphs, bar graphs, and numerous one-off graph types were used between 1910 and 1950, after which spindle graphs displaying temporal frequency distributions of specimens within each of multiple artefact types emerged as the most readily deciphered diagram. The variety of graph types used over the twentieth century indicate archaeologists often mixed elements of both Darwinian variational evolutionary change and Midas-touch like transformational change. Today, there is minimal discussion of graph theory or graph grammar in introductory archaeology textbooks or advanced texts, and elements of the two theories of evolution are still mixed. Culture has changed, and archaeology provides unique access to the totality of humankind's cultural past. It is therefore crucial that graph theory, construction, and decipherment are revived in archaeological discussion.

Written around Henry Sayre's belief that students learn best by remembering stories rather than memorizing facts, it captures the voices that have shaped and influenced human thinking and creativity throughout our history. With a stronger focus on engaging students in the critical thinking process, this new edition

encourages students to deepen their understanding of how cultures influence one another, how ideas are exchanged and evolve over time, and how this collective process has led us to where we stand today. With several new features, this second edition helps students to understand context and make connections across time, place, and culture.

Continuity and Change in Brunei Darussalam - Victor T. King 2020-10-30

This book analyses the processes of social and economic change in Brunei Darussalam. Drawing on recent studies undertaken by both locally based scholars and senior researchers from outside the state, the book explores the underlying strengths, characteristics, and uniqueness of Malay Islamic Monarchy in Brunei Darussalam in a historical context and examines these in an increasingly challenging regional and global environment. It considers events in Brunei's recent history and current socio-

cultural transformations, which give expression to the traumatic years of decolonisation in Southeast Asia. A wide range of issues focus on foreign, non-Bruneian narratives of Brunei as against insider or domestic accounts of the sultanate, the status of minority ethnic groups in Brunei and the concept of 'Brunei society', as well as changes in the character and composition of the famous 'water village', Kampong Ayer, as the cultural heartland of Brunei Malay culture and the socio-cultural and economic effects of the resettlement of substantial segments of the population from a 'life on water' to a 'life on land'. A timely and very important study on Brunei Darussalam, the book will be of interest to anthropologists, sociologists, historians, geographers, and area studies specialists in Southeast Asian Studies and Asian Studies.
