ICE Specification for Piling and Embedded Retaining Walls - 2017

This edition retains the three-part approach of the second edition. Part A is an introduction to the essential concepts necessary to procure a piling or retaining wall contract. Part B is the specification and is still the only part of this document intended for incorporation in contracts. Part C provides guidance for use of the specification and essential background information for specifiers and contractors alike. Unlike the second edition, Part 3 guidance notes immediately follow the relevant Part 2 specification requirements. The three sections provide the reader with a full compendium without being overly prescriptive.

Management in Complex Environments - Brian Ganson 2013-10-25

Companies operating in complex environments require a rigorous understanding of the economic, political, social and conflict dynamics of which they become part. Such insight helps them navigate substantial risks and challenges, grow their business even in unexpected places, work more effectively with local, national and international actors, and make meaningful contributions to stability and development. This book combines expert analysis, company case stories, and reflections from more than 100 business leaders. Drawing on a vast repository of knowledge and experience, it poses essential questions to better understand a particular complex environment and lead the company within it. It concretely demonstrates how leaders can help their companies meet their full range of goals - technical, financial, legal, reputation and social - by addressing the questions set out in this book. It is an invaluable resource for corporate practitioners and others concerned with company operations in complex environments. The book is the result of an intense and fruitful collaboration among the Africa Centre for Dispute Settlement, University of Stellenbosch Business School; the Corporate Engagement and Reflecting on Peace Practice Programs of CDA; the Geneva Peacebuilding Platform; the Institute for Business in the Global Context of The Fletcher School, Tufts University; the IRENE Institute of ESSEC Business School; the International Council of Swedish Industry; and the Stockholm Policy Group. Construction Contracts - David Chappell 2015-03-24

Construction professionals of all kinds frequently need legal advice that is straightforward as well as authoritative and legally rigorous. Building on the success of two previous editions, David Chappell returns to provide answers to 225 FAQs from his experience as Specialist Advisor to the RIBA. With 50 new questions, and thorough updates to address

changes to the law and contracts, this is an invaluable first port of call for any construction law problem. Questions range in content from extensions of time, liquidated damages and loss and/or expense to issues of practical completion, defects, valuation, certificates and payment, architects' instructions, adjudication and fees. Among the new questions are: Is the contractor bound by its price even if there is an error? How do terms about working in a spirit of trust affect other clauses? Can architects lose their rights to certify under JCT 2011 contracts? Every question included has been asked of David Chappell during his career, and he uses his vast experience to provide clear, easy to follow advice in this book. Most were originally asked by architects, but the answers will be of wide interest to everyone involved in construction.

Construction Project Scheduling and Control - Saleh A. Mubarak
2010-10-26

An easy-to-follow guide to the theory and practice of project scheduling and control No matter how large or small the construction project, an efficient, well-thought-out schedule is crucial to achieving success. The schedule manages all aspects of a job, such as adjusting staff requirements at various stages, overseeing materials deliveries and equipment needs, organizing inspections, and estimating time needs for curing and settling—all of which requires a deep understanding on the part of the scheduler. Written by a career construction professional, Construction Project Scheduling and Control, Second Edition has been fully revised with up-to-date coverage detailing all the steps needed to devise a technologically advanced schedule geared toward streamlining the construction process. Solved and unsolved exercises reinforce learning, while an overview of industry standard computer software sets the tone for further study. Some of the features in this Second Edition include: Focus on precedence networks as a viable solution to scheduling, the main part of project control The concepts of Dynamic Minimal Lag, a new CPM technique developed by the author A new chapter on schedule risk management By combining basic fundamentals with advanced techniques alongside the robust analysis of theory to enhance real-world applications, Construction Project Scheduling and Control is an ideal companion for students and professionals looking to

formulate a schedule for a time-crunched industry in need of better ways to oversee projects.

Edible Insects - Arnold van Huis 2013

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Global Age-friendly Cities - World Health Organization 2007

The guide is aimed primarily at urban planners, but older citizens can use it to monitor progress towards more age-friendly cities. At its heart is a checklist of age-friendly features. For example, an age-friendly city has sufficient public benches that are well-situated, well-maintained and safe, as well as sufficient public toilets that are clean, secure, accessible by people with disabilities and well-indicated. Other key features of an age-friendly city include: well-maintained and well-lit sidewalks; public buildings that are fully accessible to people with disabilities; city bus drivers who wait until older people are seated before starting off and priority seating on buses; enough reserved parking spots for people with disabilities; housing integrated in the community that accommodates changing needs and abilities as people grow older; friendly, personalized service and information instead of automated answering services; easy-to-read written information in plain language; public and commercial services and stores in neighbourhoods close to where people live, rather than concentrated outside the city; and a civic culture that respects and includes older persons.
