*Motion in Games* - Arjan Egges 2008-11-19

From June 14-17, 2008, the Center for Advanced Gaming and Simulation (AGS), Utrecht University, in collaboration with the NLGD Festival of Games, organized a Workshop on Motion in Games in Utrecht. Motion plays a crucial role in computer games. Characters move around, objects are manipulated or move due to physical constraints, entities are animated, and the camera moves through the scene. Even the motion of the player nowadays is used as input to games. Motion is currently studied in many different areas of research, including graphics and animation, game technology, robotics, simulation, computer vision, and also physics, psychology, and urban studies. The goal of the Motion in Games workshop was to bring together researchers from this variety of fields to present the most recent results and to initiate collaboration. The MIG 2008 workshop hosted over 30 internationally renowned researchers who all presented their ongoing work on topics such as crowd simulation, motion capture, path planning and facial animation. This volume is a collection of the papers presented during the workshop. Since this volume was published after the workshop, the authors of the papers adapted their content in order to include any discussion that took place during the workshop itself. All contributions were carefully checked by the workshop organizers. The Motion in Games workshop was a very successful event that has set the starting point for interdisciplinary collaborations and for novel research ideas following the interesting discussions that took place. We are very happy with the outcome of the workshop and the excellent contributions by the participants, collected in this volume. August 2008 Arjan Egges Arno Kamphuis Mark Overmars Sponsoring Institutions This workshop was sponsored by the GATE 1 2 project and the NLGD Festival of Games.

**The Uzbek Growth Puzzle** - Mr. Jeronimo Zettelmeyer 1998-09-01

After the break-up of the Soviet Union, Uzbekistan's output fell less than in any other former Soviet Republic, and growth turned positive in 1996/97. Given the country's hesitant and idiosyncratic approach to reforms, this record has surprised many observers. This paper first shows that a standard panel model of growth in transition systematically underpredicts Uzbek growth from 1992-1996, confirming the view that Uzbekistan's performance constitutes a puzzle. It then attempts to resolve the puzzle by appropriately extending the model. The main result is that Uzbekistan's output performance was driven by a combination of low initial industrialization, its cotton production, and its self-sufficiency in energy.

**End Game Strategies** - William L. Peace (Sr.) 2012

Allied forces spent much time planning and preparing for the occupation of the axis countries, obtaining practical experience in North Africa, Sicily and France as they pressed on toward Berlin. Unity of command and unity of effort ensured effective government of Germany, helping to make it a vibrant country today, ranking in the top five countries in many metrics. Iraq has not been as fortunate, and has only started to move forward within the last three to four of the almost nine years of occupation there. The United States did not have as much time to plan for the occupation, and unity of command was not achieved in the beginning, causing a lack of security during the beginning of the occupation. We can take some lessons from these operations and apply them to the future. While we cannot yet know the outcome of Iraq, there is hope that it will become our friend in years to come.

**The New Woman in Uzbekistan** - Marianne Kamp 2011-10-01

Winner of the Association of Women in Slavic Studies Heldt Prize Winner of the Central Eurasian Studies Society History and Humanities Book Award Honorable mention for the W. Bruce Lincoln Prize Book Prize from the American Association for the Advancement of Slavic Studies (AAASS) This groundbreaking work in women's history explores the lives of Uzbek women, in their own voices and words, before and after the Russian Revolution of 1917. Drawing upon their oral histories and writings, Marianne Kamp reexamines the Soviet Hujum, the 1927 campaign in Soviet Central Asia to encourage mass unveiling as a path to social and intellectual "liberation." This engaging examination of changing Uzbek ideas about women in the early twentieth century reveals the complexities of a volatile time: why some Uzbek women chose to unveil, why many were forcibly unveiled, why a campaign for unveiling triggered massive violence against women, and how the national memory of this pivotal event remains contested today.

Engaging Government Employees - Robert Lavigna 2013-07-26

With over three decades of experience in public sector HR, Bob Lavigna gives managers the tools they need to leverage the talents of government's most important resource: its people. You know firsthand that your government workers are not underworked, overpaid, or mindless clones just carrying out the morally compromised work that politicians forced through the pipeline. Besides having to daily overcome the persona of being a government employee, your hard-working employees face enormous pressures and challenges every day and are asked to solve some of our country's toughest problems, including unemployment, security, poverty, and education. To be able to return to their desks daily with the passion and commitment required to accomplish these overwhelming duties will require a manager who knows how to leverage talent, improve performance, and inspire passion within these true servants. In *Engaging Government Employees*, you will learn: Why a highly engaged staff is 20 percent more productive How to get employees to deliver "discretionary effort" How to assess the level of engagement Why free pizza and Coke every Friday is not a viable strategy *Engaging Government Employees* rejects the typical one-size-fits-all approach to motivation. Drawing on a wealth of empirical evidence, this indispensable resource shows how America's largest employer can apply the science of engagement to get team members passionate about the agency's mission and committed to its success.

Human Development Report 2020 - United Nations 2021-01-31

Thirty years ago, UNDP created a new way to conceive and measure progress. Instead of using growth in GDP as the sole measure of development, we ranked the world's countries by their human development: by whether people in each country have the freedom and opportunity to live the lives they value. The 2020 Human Development Report (HDR) doubles down on the belief that people's agency and empowerment can bring about the action we need if we are to live in balance with the planet in a fairer world. It shows that we are at an unprecedented moment in history, in which human activity has become a dominant force shaping the planet's key processes - the Anthropocene. These impacts interact with existing inequalities, creating unparalleled threats of human development reversal and exposing weaknesses in social, economic, and political systems. Though humanity has achieved

incredible progress, we have taken the Earth for granted, destabilizing the very systems upon which we rely for survival. COVID-19, which almost certainly sprang to humans from animals, offers a glimpse of our future, in which the strain on our planet mirrors the strain facing societies. How should we react to this new age? Do we choose to strike out on bold new paths striving to continue human development while easing planetary pressures? Or do we choose to try--and ultimately fail--to go back to business as usual and be swept into a dangerous unknown? This Human Development Report is firmly behind the first choice, and its arguments go beyond summarizing well-known lists of what can be done to achieve it.

Rashid's book, now with a new introduction by the author examining some of the crucial political developments since its first publication in 1994, provides entrée to this little-known but geopolitically important region. Rashid gives a history of each country, including its incorporation into Tsarist Russia, to the present day, provides basic socioeconomic information, and explains the diverse political situations. He focuses primarily on the underlying issues confronting these societies: the legacy of Soviet rule, ethnic tensions, the position of women, the future of Islam, the question of nuclear proliferation, and the fundamental choices over economic strategy, political system, and external orientation that lie ahead.

The contributors locate ethnic experiences within a series of common frameworks to shed light on key issues such as: \* the effect of democratization and authoritarian rule on ethnic tensions \* the extent to which ethnicity is constructed as an ideological tool \* whether democracy can only function if all citizens are fully assimilated.

**Regional Connection under the Belt and Road Initiative** - Fanny M. Cheung 2018-10-26

China's Belt and Road Initiative (BRI) is intended to radically increase investment and integration along a series of land and maritime routes. As the initiative involves more than 100 countries or international organizations and huge amounts of infrastructure construction, cooperation between many different markets is essential to its success. Cheung and Hong have edited a collection of essays that, between them, examine a range of practical issues facing the BRI and how those issues are being addressed in a range of countries. Such challenges include managing financing and investment, ensuring infrastructure connectivity, and handling the necessary e-commerce and physical logistics. Emphasizing the role of Hong Kong as an intermediary and enabler in the process, this book attempts to tackle the key practical challenges facing the BRI and anticipate how these challenges will affect the initiative's further development. The book provides a holistic and international approach to understanding the implementation of the BRI and its implications for the future economic integration of this huge region.
