**How Learning Works** - Susan A. Ambrose  
2010-04-16

Praise for How Learning Works "How Learning Works is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning." —Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, *Tools for Teaching* "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching." —Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my colleagues." —Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about

each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously share it with you in this organized and readable book." —From the Foreword by Richard E. Mayer, professor of psychology, University of California, Santa Barbara; coauthor, *e-Learning and the Science of Instruction*; and author, *Multimedia Learning Teaching Collocation* - Michael Lewis 2000-01 TEACHING COLLOCATION provides further follow-up to THE LEXICAL APPROACH. It contains papers by a number of teachers and theoreticians interested in the practical classroom implications of incorporating collocation into everyday classroom teaching. [Strategic Theory for the 21st Century: The Little Book on Big Strategy](#) - Dr. Harry R. Yarger 2006 Strategy for the nation-state is neither simple nor easy. Good strategy demands much of the military professional whether he is formulating, articulating, evaluating, or executing strategy. Few do it well. It requires the professional to step out of the planning mind set and adopt one more suited for the strategic environment. This is particularly true in periods of great change and turmoil when a successful military strategy must be closely integrated with and may depend on other national strategies of the interagency community. A theory of strategy helps in this transition by educating the professional and disciplining his thinking in any of his roles. This monograph advances a theory of strategy that

provides essential terminology and definitions, explanations of the underlying assumptions and premises, and substantive hypotheses that explain the nature of the strategic environment and the role and expectations of strategy. The environment is explained in theoretical and practical terms, and the implications for strategic thinking are developed with a distinction being made between strategy and planning mind sets. The typical problems practitioners have in formulating and articulating strategy are discussed. Strategy formulation is recognized as both an art and science, and the U.S. Army War College strategy model of ends, ways, and means is expounded on and advocated as a methodology for articulating strategies.

*A Grammar of the Seneca Language* - Wallace Chafe 2015-01-01

The Seneca language belongs to the Northern Iroquoian branch of the Iroquoian language family, where its closest relatives are Cayuga, Onondaga, Oneida, Mohawk, and Tuscarora. Seneca holds special typological interest because of its high degree of polysynthesis and fusion. It is historically important because of its central role in the Longhouse religion and its place in the pioneering linguistic work of the 19th century missionary Asher Wright. This grammatical description, which includes four extended texts in several genres, is the culmination of Chafe's long term study of the language over half a century.

*Grammar Nonsense and What To Do about It* - Hugh Dellar  
Do you hate teaching some aspects of grammar? Do you ever feel frustrated that your students

just don't get it? Well, in *Grammar Nonsense*, Andrew Walkley and Hugh Dellar argue that you shouldn't really blame yourself. The fault lies largely with the way grammar rules and methods have been passed down through training and published material and become established as the way of doing things: a straightjacket that we need to escape from. Through an entertaining series of rants and meditations on all things grammatical, from the use of the word grammar to the horror of teaching verb patterns, they aim to pull apart rules which we give without thinking and to question approaches to practice that are seen as a must. Along the way, you'll not only learn how published materials get written and about ideas such as the transformation fallacy and grammar olives, but you'll also get plenty of practical suggestions as to what to do about all this nonsense.

*Teaching Tenses* - Rosemary Aitken 2021-12-01  
This book is intended to help you, as a teacher of English as a Foreign language (E F L), to teach common verb tenses and patterns more efficiently and clearly. Some of the material in the book may surprise you. To begin with, the explanations and commentary may seem self-evident, or the phonetic realisations may seem unnecessary. If this is so, please try to bear with me. The material in the book is designed to be of help to several groups: the experienced native speaker seeking a possible new approach to add to his armoury, the novice teacher, who speaks English with native speaker intuition, but has not yet fully analysed what it is that she does know, or why she says what she says, and also

the non-native E F L teacher abroad, who speaks English excellently, and yet wishes to understand the subtler differences in usage and idiom which the native speaker takes for granted. Rosemary Aitken

**Multi-word Verbs in Early Modern English** - Claudia Claridge 2000

In a revision of her doctoral thesis (no date or institution cited), which itself grew out of the project to compile the database Lampeter Corpus of Early Modern English Tracts (1640-1740), Claridge looks at the use of such multi-word verbs as get clear, wish for, and make merry as they appear in the database. She considers both syntax and semantics, which she shows merge to some extent, but takes semantics to be the primary and thus the more important level because people know how they are going to say something before they know

what they are going to say. **Ethnic Subjectivity in Intergenerational Memory Narratives** - Mónica Fodor 2019-11-05

In this interdisciplinary study, Mónica Fodor explores how intergenerational memory narratives embedded in the speaker's own stories impact ethnic subjectivity construction. Working with thematically selected life experiences from interviews conducted with second- and late-generation European Americans, Fodor demonstrates how the storytellers position themselves in a range of social, cultural, and political discourses to claim or disclaim ethnicity as part of their subjectivity. Tying narrative content, structural, and performance analysis to the sociological and sociolinguistic concepts of "symbolic capital" and "investment," Fodor unpacks the changing levels of identifying with one's ancestral ethnic heritage and its potential to carry meaning for late-generation descendants. In doing so, she reveals the shared features of identification among individuals through narrative meaning-making, which may be the basis of real or imagined, heterolocal discourse community formation and sustained ethnic subjectivity. The narrative analysis demonstrates how the cohesive force among members of the

community is the shared knowledge of story frames and the personalized retelling of these. *Ethnic Subjectivity in Intergenerational Memory Narratives* draws on inherited, often moving, personal experiences that offers new insights into the so far largely unexplored terrain of the narrative structure of intergenerationally transferred memory retellings, that will be of great interest to students and scholars of ethnic studies, migration and identity studies.
