

The Mrcpch Clinical Exam Made Simple Oxford Speciality Training

Thank you for downloading **The Mrcpch Clinical Exam Made Simple Oxford Speciality Training** . Maybe you have knowledge that, people have look numerous times for their favorite books like this The Mrcpch Clinical Exam Made Simple Oxford Speciality Training , but end up in harmful downloads.

Rather than enjoying a good book with a cup of tea in the afternoon, instead they juggled with some malicious virus inside their desktop computer.

The Mrcpch Clinical Exam Made Simple Oxford Speciality Training is available in our digital library an online access to it is set as public so you can download it instantly.

Our book servers saves in multiple locations, allowing you to get the most less latency time to download any of our books like this one.

Kindly say, the The Mrcpch Clinical Exam Made Simple Oxford Speciality Training is universally compatible with any devices to read

The Hands-on Guide to Practical Paediatrics - Rebecca Hewitson

2014-02-05

Winner of the Paediatrics category at the BMA Book Awards 2015 About to start a paediatrics rotation? Working with children for the first time? Thinking about a career in paediatrics? The Hands-on Guide to Practical Paediatrics is the ultimate practical guide for medical students encountering paediatrics for the first time, junior doctors thinking about working with children, and new paediatric trainees. It's full of vital information on practical procedures, prescribing for young patients, and communicating with children and young people, as well as guidance on the paediatric training programme and paediatrics as a career. Full of clinical tips, and covering key information on developmental stages, common paediatric emergencies and ethical dilemmas, and child protection, The Hands-on Guide to Practical Paediatrics is also supported by online resources including practice prescribing scenarios and video content at www.wileyhandsonguides.com/paediatrics Take the stress out of paediatrics with The Hands-on Guide!

MCQs in Travel Medicine - Dom Colbert 2012-12-20

Specifically written for those preparing for examinations and

practitioners in travel medicine, MCQs in Travel Medicine contains over 600 multiple choice questions with detailed explanations which both teach and challenge the reader. Questions are group by topic which is ideal for revision, enabling you to focus on specific areas including adventure travel, travellers' diarrhoea, malaria, sexually transmitted disease, and drugs used in travel medicine. The style and format of the questions mirror the format of the exam questions, and the book includes a self-test to aid revision. This easy-to-read comprehensive book is ideally suited for those in busy day-to-day practices and those preparing for examinations in travel medicine including the Certificate Exam of the International Society of Travel Medicine.

Down Syndrome - Mark Selikowitz 2008-05-29

Down syndrome is a genetic condition which causes varying degrees of learning disability as well as other health problems. Nearly one baby in every 1000 born in the UK has the condition. Parents are often frightened and confused by the birth of a baby with Down syndrome, and they need reassurance as well as up-to-date information regarding the condition. The new edition of this highly regarded book for parents of children with Down syndrome covers a number of important new

developments in research and clinical practice that have occurred in the field in recent years. These include several newly recognised medical conditions that are known to occur more commonly in patients with Down syndrome, for example, glaucoma, gastrointestinal malformations, feeding difficulties, gastro-oesophageal reflux, coeliac disease, and diabetes. This expanded edition also includes new recommendations regarding routine health checks in line with those of the UK Down Syndrome Medical Interest Group (UKDSMIG). Additionally the book covers new prenatal screening methods which have been developed to identify Down syndrome during pregnancy.

Chamberlain's Symptoms and Signs in Clinical Medicine, An Introduction to Medical Diagnosis - Andrew R Houghton 2010-05-28

A classic text, Chamberlain's Symptoms and Signs in Clinical Medicine has been providing students and professionals with a detailed and well-illustrated account of the symptoms and signs of diseases affecting all the body systems since the first edition published in 1936. Now completely rewritten by a new team of authors selected for their experience

The MRCPC Clinical Exam Made Simple - Stanley Tamuka Zengeya 2011-09-08
DVD.

SAQs for the Final FRCA - James Shorthouse 2011-06-02

A concise, exam-orientated revision text that helps candidates prepare for the notoriously difficult SAQ paper for the Fellowship of the Royal College of Anaesthetists (FRCA) Final examination.

Clinical SAQs for the Final FRCEM - Ashis Banerjee 2019-10-01

Clinical SAQs for the Final FRCEM offers a tailored solution to any person wishing to succeed in the clinical SAQ exam. Featuring over 200 Short Answer Questions mapped to the Royal College of Emergency Medicine curriculum, this comprehensive guide ensures high quality preparation. Designed specifically to reflect the examination format, each question presents clinical cases with diagnostic test results and, where relevant, imaging. Detailed model answers act as both a high yield revision guide and as a template for answering similar questions on exam

day. 50 questions are illustration based including radiology, ultrasound, and ECGs allowing candidates to practice typical questions in this clinical exam. Further reading directs candidates to guidelines and articles for additional preparation. Written by a team including successful candidates and a senior consultant, Clinical SAQs for the Final FRCEM holds the key to passing the exam.

The Pocketbook for PACES - Rupa Bessant 2012-05-31

This book provides an easily portable yet comprehensive guide to the PACES examination. It includes all of the most relevant clinical information for the PACES exam supplemented by tips supplied by the highly experienced chapter authors. The main aim of the book is to consolidate candidates' theoretical knowledge and help them apply it to the clinical examination scenario. In addition the book forms an excellent pocket reference for trainees in acute medicine, accident and emergency medicine, anaesthetics and critical care and general practice.

Oxford Textbook of the Newborn - Michael Obladen 2021-08-11

Well into the 20th century, one in four newborns failed to survive their first year of life. It was after World War II that medicine "discovered" the newborn as a human being entitled to medical treatment and prioritised care. Since its definition by Alexander Schaffer in 1960, neonatology has evolved into a mature, innovative, and ethical field. A large number of medical professionals' care for neonates, yet no definitive medical history of the newborn has been available until now. The Oxford Textbook of the Newborn: A Cultural and Medical History offers readers a unique and authoritative resource on the 3000-year history of the newborn within Western societies. Written by Professor Michael Obladen, a leading voice in neonatology, this book reflects on our perception of newborns, from the earliest days of human thought, through to the traces that remained in medieval life and persist today. It unearths ideas and evidence of societies' perceptions of newborns through a beautifully illustrated, impressive and often never-seen-before set of historical sources from libraries, archives, churches, excavation fields, and hospital charts around the world. Split into 8 sections which each cover aspects of the natural lifecycle of a neonate, this book demonstrates the impact of

religion, law, ethics, philosophy and culture on newborns' quality of life, and covers fascinating topics such as the rites of passage for the newborn, infanticide, opium use, breastfeeding, and artificial feeding. Each chapter is written in an accessible style and includes high-quality historical illustrations which really bring the subject to life.

250 Questions for the MRCPCH - James Lake Robertson 2006-01-01

This title is directed primarily towards health care professionals outside of the United States. Written for trainee paediatricians preparing for MRCPCH exam, it includes over 250 questions and explanatory answers, in the new exam format, covering data and photographic interpretation and using clinical scenarios. The book is well illustrated with charts and tables similar to what candidates will see in the exam, and has a popular feature called 'helpful hints' for each series of questions. Over 250 varied types of questions includes 'helpful hints' for candidates updated to match the new exam format for MRCPCH part 2 part of the successful 'Pass Paediatrics' series

Communication Scenarios for the MRCPCH and DCH Clinical Exams - Rebecca Casans 2011

Revised and expanded aid for clinical MRCPCH and DCH examination candidates, and for paediatric trainees in their day-to-day clinical encounters.

Paediatric Radiology for MRCPCH and FRCR, Second Edition -

Christopher Schelvan 2020-10-29

Radiology plays a fundamental role in the diagnosis and management of childhood diseases. This is reflected in both paediatric and radiology postgraduate exams, where candidates are expected to have a working knowledge of paediatric pathology, clinical manifestations and appropriate radiological investigations. Building on the great success of the first edition, Paediatric Radiology for MRCPCH and FRCR retains the popular preexisting structure of the book, but presents an improved variety of clinical cases as well as updated text in-keeping with advances in medical practice and technology. There is more emphasis on cross-sectional imaging, as candidates are increasingly encountering these sophisticated imaging tests in postgraduate exams. Images have been

updated, and all the clinical information has been reviewed and revised accordingly. Contains over 100 clinical cases, presented in exam format, with answers overleaf. Includes a wide range of common and rare paediatric conditions with supplementary images to illustrate additional points. Uses classic examination images, with salient radiological and clinical summaries of each condition - the "hot lists". Carries specific information for paediatricians and radiologists for each case. An introductory chapter on the basic concepts of imaging aims to provide the reader with an approach to radiological imaging and an awareness of the different modalities available, with new sections on non-accidental injury and radiation protection.

The Ethics of Pediatric Research - David Wendler 2010-03

Background -- Evaluating the worry -- Proposed justifications -- Human interests and human causes -- Our connection to our contribution -- The value of passive contributions -- Implications -- Objections and the potential for abuse.

Short Cases for the MRCPCH - Angela Thomson 2005

This book presents 100 of the most common short cases in the format that the candidate would be expected to use in the exam setting. It will also include examples of questions which examiners frequently ask and sample answers, as well as a one-page aide memoire to clinical examination of each body system.

Parenting Made Complicated - David Rettew 2021

"Parenting Made Complicated: A One Size Does Not Fit All Look at What Science Really Knows about Early Parenting's Biggest Dilemmas" addresses many of the longstanding parenting controversies that new mothers and fathers face. These include topics related to screens, daycare, praise, sleep training, spanking and time-outs, helicopter versus "old school" parenting, and others. Each chapter is devoted to a different parenting controversy and, a synthesis of what is known scientifically about each topic is presented, written in a non-technical and conversational style. Parenting Made Complicated, however, doesn't assume that the "correct" answer for each parenting dilemma is the same for each child and instead provides a roadmap for how the best

approach may vary according to a child's temperament or other important factors. Many case vignettes and boxed practical suggestions are provided. Accounts are also given regarding how scientific information on a particular topic is applied and sometimes manipulated toward political aims. The book is written by child psychiatrist Dr. David Rettew, an expert in child temperament who has conducted research in child development and worked clinically with families for over 20 years"--

Essential Revision Notes in Paediatrics for the MRCPCH - Mark Beattie 2006

Suitable for candidates preparing for the MRCPCH exam, this title includes 24 specialty-based chapters that provide concise information in an accessible format.

Examination Paediatrics - Wayne Harris 2002-01

Designed primarily to assist candidates in passing clinical examinations in paediatrics, particularly at the postgraduate level. All long and short cases have been extensively rewritten in this new edition. More comprehensive background notes and management guidelines are also included.

Manual of Childhood Infections - Mike Sharland 2011-04-07

This manual gives information on the causative organisms, epidemiology and clinical features of all important childhood infections. It includes guidance on the clinical management of the infections and on steps to be taken to prevent future cases.

Oxford Textbook of Palliative Care for Children - Richard Hain 2021-03-24

The importance of palliative care for children facing life threatening illness and their families is now widely acknowledged as an essential part of care, which should be available to all children and families, throughout the child's illness and at the end of life. The new edition of the Oxford Textbook of Palliative Care for Children brings together the most up to date information, current knowledge, evidence, and developments of clinical practice in the field. The book is structured into four sections. 'Foundations of Care' describes core issues, the foundations on which paediatric palliative care is based. 'Child and Family Care' looks at

different aspects of psychological, social, and cultural care for the sick child or young person, and their family. These chapters cover the time course of the illness, around the time of death and support for the bereaved family. 'Symptom Care' focuses on the uses of medication, specific symptoms, and their management. Finally, 'Delivery of Care' examines practical approaches to care in different environments and the needs of clinicians. Two new editors join the team from Canada and South Africa, reflecting our aims to contribute towards the development of care for children across the world, and to be a resource for both experienced clinicians and those new to the field. Comprehensive in scope, exhaustive in detail, and definitive in authority, this third edition has been thoroughly updated to cover new practices, current epidemiological data, and the evolving models that support the delivery of palliative medicine to children. This includes two new chapters, looking in detail at 'Decision Making' and 'Perinatal Care', and a new section highlighting the emerging importance of 'Palliative Care for Children in Humanitarian Crises'. This book is an essential resource for anyone who works with children worldwide.

OSCE Revision for the Final FRCEM - Rachel Goss 2021-09-17

A comprehensive guide to the Final FRCEM examination, OSCE Revision for the Final FRCEM covers over 100 topics in emergency medicine. It is mapped to the curriculum for the Royal College of Emergency Medicine, and is structured by the domains in the syllabus. Ideal for helping you practice in pairs or groups, each topic starts with a clinical situation for the candidate, instructions for an actor or revision buddy, and a mark sheet so you can score yourself effectively against the FRCEM criteria. Each question contains a pie chart to demonstrate how the marks will be assigned so you know where to focus your efforts. Topics include learning points so you can learn about the nuances of the stations and improve your answer next time. References to guidelines or evidence-based rules are included to further your study. Written by a team of authors who have successfully passed their FRCEM examination, OSCE Revision for the Final FRCEM will give you all the essential tips, insights, and guidance you need for thorough exam preparation.

Clinical Medicine for the MRCP PACES - Gautam Mehta 2010-07-15
A book of 75 cases which mimic the style and approach of the MRCP PACES exam. The book will equip the candidate attempting the MRCP PACES examination, but will also provide an overview of evidence-based medicine for competency-based training.

SBAs and EMQs for the MRCOG Part 2 - Tahir Mahmood 2015
Specifically designed for the MRCOG exam part 2, SBAs and EMQs for MRCOG Part 2 will offer 500 questions mapped closely to the Royal College of Obstetrics and Gynaecology curriculum to help candidates prepare for the newly adapted exam. This book features 250 Single Best Answers multiple choice questions and 250 extended matching questions with explanations and sources for further reading, ensuring effective self-assessment of knowledge and preparation for exam conditions. Providing a thorough assessment of the reader's knowledge of Obstetrics and Gynaecology this revision book will give candidates up to date and realistic preparation for the MRCOG exam part 2.

Illustrated Textbook of Paediatrics - Tom Lissauer 2017-02-09
Thoroughly revised and updated, the fifth edition of this prize-winning title retains the high level of illustration and accessibility that has made it so popular worldwide with medical students and trainees approaching clinical specialty exams. Illustrated Textbook of Paediatrics has been translated into eight languages over its life. Case studies. Summary boxes. Tips for patient education. Highly illustrated with 100s of colour images. Diseases consistently presented by Clinical features; Investigations; Management; Prognosis; and, where appropriate, Prevention. Separate chapters on Accidents Child protection Diabetes and endocrinology Inborn Errors of Metabolism New chapter on Global child health New co-editor, Will Carroll, Chair of MRCPCH Theory Examinations.

Training in Paediatrics - Mark Gardiner 2009-09-10
The complete guide to specialty training in paediatrics. Designed in conjunction with the syllabus and structure of the MRCPCH exams
Paediatrics at a Glance - Lawrence Miall 2016-04-29
Paediatrics at a Glance provides an introduction to paediatrics and the

problems encountered in child health as they present in primary, community and secondary care, from birth through to adolescence. Thoroughly updated to reflect changes in understanding of childhood illness over the last 5 years, the 4th edition of this best-selling textbook diagrammatically summarises the main differential diagnoses for each presenting symptom, while accompanying text covers important disorders and conditions as well as management information. Paediatrics at a Glance: • Is an accessible, user-friendly guide to the entire paediatric curriculum • Features expanded coverage of psychological issues and ethics in child health • Includes more on advances in genetics, screening and therapy of childhood illness • Contains new videos of procedures and concepts on the companion website • Includes a brand new chapter on Palliative Care - an emerging area in the specialty • Features full colour artwork throughout • Includes a companion website at www.ataglanceseries.com/paediatrics featuring interactive self-assessment case studies, MCQs, videos of the procedures and concepts covered in the book, and links to online resources Paediatrics at a Glance is the ideal companion for anyone about to start a paediatric attachment or module and will appeal to medical students, junior doctors and GP trainees as well as nursing students and other health professionals.

Clinical Medicine for the MRCP PACES - Gautam Mehta 2010-07-15
A book of over 150 cases which mimic the style and approach of the MRCP PACES exam. The book will equip the candidate attempting to pass the MRCP examination, and will also provide an overview of evidence-based medicine for competency-based training.
Paediatrics and Child Health - Mary Rudolf 2011-11-18
Paediatrics and Child Health is the perfect textbook to prepare you for clinical practice - providing a comprehensive and practical guide to paediatric disorders as they present to the practitioner, and grouped together by system for easy navigation. From birth through to adolescence, the emphasis is on common and important paediatric problems. This is the only book that takes each symptom and walks you through history taking and physical examination step-by-step. Each section concludes with characteristics and features of the symptoms

covered, allowing you to reach differential diagnoses in a logical, highly-structured way. A unique feature are the videos, accessible via your desktop edition, that accompany the book. Designed to enhance your clinical skills and help you in OSCEs, they show you how to examine children correctly. This third edition has been substantially updated throughout and includes new chapters on cardiac conditions and social paediatrics. Beautifully presented, with many new illustrations and photographs, favourite features such as 'at a glance' and 'clues to the diagnosis' boxes are back, with new 'red flag' boxes to signal the crucial information you need. The self-assessment section allows you to check your knowledge and prepare for paediatrics exams. Paediatrics and Child Health is the perfect resource for a course on paediatrics, and is accompanied by a FREE enhanced Wiley Desktop Edition - the interactive digital version of the book with downloadable text and images, highlighting and note-taking facilities, book-marking, cross-referencing, in-text searching, and linking to references and glossary terms. Paediatrics and Child Health is also supported by fully downloadable figures and illustrations at www.wiley.com/go/rudolf/paediatrics.

General Pediatrics Board Review - Shahram Yazdani 2020-02-24

General Pediatrics Board Review is a comprehensive guide for recent residency graduates and re-certifiers preparing for the American Board of Pediatrics (ABP) board exam. The text consists of over 1000 multiple-choice questions, organized into 25 chapters covering pediatrics topics such as fetal and neonatal care, adolescent and young adult medicine, genetics, child maltreatment, pediatric infectious diseases, gastrointestinal disorders, and more. Chapters include questions, answers with detailed explanations and references to primary or landmark articles to help better navigate a standardized exam. Questions are written in a case-based format that emulates the ABP board exam, and are supplemented by figures, tables, and boxes. A Quick Facts section rounds out the text for ease of reference.

Health for all Children - Alan Emond 2019-02-21

The foundations of health and wellbeing are laid down in pregnancy and

the early years. Health for all Children takes a life course approach to child health, starting in pregnancy and extending to the age of seven to include transition into school, and to cover the foundation years in education. This new edition summarizes the evidence supporting preventive health care and health promotion; providing an effective, community-based response to the needs of families and children. Each chapter summarizes evidence of effectiveness in the topic area, in health promotion, and in universal and selective interventions. The fifth edition starts in pregnancy and runs until age seven taking into account Government policies and different models of delivery of the child health programme. Evidence from all over the world is critically appraised and referenced to UK policy and practice. Health for all Children summarizes the evidence about 'why' and 'what works' in health promotion and health surveillance with children and families, providing guidance on how to implement and quality assure a programme, and the competencies needed. Each chapter includes 'learning links' to online training materials and e-learning for health, or to resources freely available to practitioners. This established, evidence-based book continues to be essential reading for all health professionals who work with children. It will also provide vital background knowledge for those charged with the responsibility of planning, commissioning, and monitoring child health.

Get Through DCH Clinical 2E - Andrew Papanikitas 2012-01-27

With a heavily revised format in consideration of the recent DCH clinical examination changes, this new edition of the comprehensive revision guide provides the candidate with a definitive, one-stop revision resource. Familiarise yourself with the revised format of the examination, including revised timings. Learn your revision needs through plentiful scenarios and worked examples. Study using the wealth of detailed revision guidance, exam tips, diagrams, and practice cases. Written by an experienced author team with extensive knowledge of the exam through its role teaching DCH courses, this title is currently the only revision guide that is focused on the clinical part of the DCH examination. Get Through DCH Clinical is essential reading and revision

material for postgraduate candidates preparing for the clinical part of the DCH examination.

Paediatric Nephrology - Lesley Rees 2012-06-28

Rev. ed. of: Paediatric nephrology / Lesley Rees, Nicolas J.A. Webb, Paul A. Brogan. 2007.

MRCPCH Clinical - Simon J. Bedwani 2011

Updated focusing on the learning needs of the new format MRCPCH Clinical examination. To maximise revision time, 3 parts represent the Clinical exam stations: Part 1 History Taking & Management Planning; Part 2 Communication Skills; Part 3 Clinical Stations. Written by paediatricians with experience of teaching and helping to run previous exams.

Mental Retardation and Developmental Delay - Moyra Smith 2006
Introduction. 1. Science, Society, and Mental Retardation, A History. 2. Neurogenesis, Neuronal Migration, Maturation, and Function: Insights into Learning and Memory. 3. Structural Brain Anomalies and Neural Tube Defects. 4. Mental Retardation Associated with Dysmorphology, Growth Retardation, or Overgrowth. 5. Mental Retardation Associated with Other Neurological Defects. 6. Mental Retardation that Develops After a Period of Normal Cognition. 7. Nonsyndromic Mental Retardation, Autism, and Language Deficits. 8. Genomics, Functional Genomics, and Epigenetics: Relevance to Mental Retardation. 9.

Orthopaedic Practical Examination Made Easy - Nitin P. Jaiswal 2019-02-28

Step wise approach to history taking, examination, investigation and treatment of each and every possible case in orthopaedics. Colour photographs demonstrating proper methods of clinical examination. Relevant clinical photographs, X-rays and MRI. Table/flow charts for treatment, especially brachial plexus and peripheral nerve injuries. Summary of Deformity around Hip joint, Bone Tumors and some important definition in orthopaedics. Check list before going to Exam.

A Practical Guide for Medical Teachers - John Dent 2017-04-26

The Fifth Edition of the highly praised Practical Guide for Medical Teachers provides a bridge between the theoretical aspects of medical

education and the delivery of enthusiastic and effective teaching in basic science and clinical medicine. Healthcare professionals are committed teachers and this book is an essential guide to help them maximise their performance. This highly regarded book recognises the importance of educational skills in the delivery of quality teaching in medicine. The contents offer valuable insights into all important aspects of medical education today. A leading educationalist from the USA joins the book's editorial team. The continual emergence of new topics is recognised in this new edition with nine new chapters: The role of patients as teachers and assessors; Medical humanities; Decision-making; Alternative medicine; Global awareness; Education at a time of ubiquitous information; Programmatic assessment; Student engagement; and Social accountability. An enlarged group of authors from more than 15 countries provides both an international perspective and a multi-professional approach to topics of interest to all healthcare teachers.

Medicine for MRCP - Rupa Bessant 2020-08-17

Medicine for MRCP provides a comprehensive review of the material that you need to pass the MRCP Parts 1 and 2 written papers. The twenty-seven chapters mapped out to the RCP syllabus, cover all areas from molecular medicine and genetics, through to medical law and ethics. Written by specialist contributors and educational experts, the content is carefully crafted to build your understanding for both papers. Each chapter begins with the basic science required for Part 1, before covering clinical medicine for Part 1, Part 2 and the PACES examinations. To ensure effective revision, material is presented in short sections with bullet lists, tables, and boxes. Over 150 drawings and photos illustrate key principles and clinical topics making them easier to retain. References to evidence-based protocols and directions to further reading allow for deeper understanding. Candidates can review their progress via the 180 end-of chapter self-assessment questions. Drawing on the authors' expertise, Medicine for MRCP is the ideal companion for the MRCP as well as a useful reference guide for practicing medical doctors.

Essential Clinical Skills in Pediatrics - Anwar Qais Saadoon

2018-09-03

This book is a concise learning guide dedicated to the full scope of pediatric history-taking and clinical examination, for use in OSCEs as well as clinical life. It guides the reader simply and methodically through what to ask when taking a history, and how to perform a comprehensive physical examination. The book contains more than 30 "History Stations" covering the most common pediatric cases, as well as 10 "Examination Stations" covering examinations of the different body system. It provides students and resident doctors worldwide with the necessary core information for pediatric history-taking and clinical examination, all in a brief and interesting format. The book adopts a reader-friendly format through a lecture-note style and the use of Key Points, Clinical Tips, Notes, Tables, and Boxes listing the most important features. It is also richly illustrated, demonstrating the correct way to perform clinical examinations. Written "by a resident, for residents and medical students," this book has been revised, foreworded, and peer-reviewed by fourteen prominent authorities in the field of Pediatrics from various parts of the world (including the United States, United Kingdom, Australia, Italy, Canada, and India), and from different universities (Illinois, Pennsylvania, Washington, Oxford, Edinburgh, Keele, Melbourne, Toronto, Parma, and Florence Universities). These experts recommend this book for medical students, pediatric residents, and pediatric practitioners, as well as pediatricians.

La Langue Des Francais - J. R. Watson 2014-11

NO description available

Circuits for the MRCPCH E-Book - Damian Roland 2007-07-05

This title is directed towards MRCPCH candidates in the UK and other countries where MRCPCH is offered. It provides a complete revision aid for the new OSCE-style MRCPCH clinical exam. It is designed and written to be as close as possible to the actual exam. Each chapter is a 'circuit' and will include all the written stations. The questions are laid out in exactly the same format as the exam, and the answers are written in a friendly style by authors who have recently been through the process and can offer valuable hints and tips. Sample questions mimic exam conditions - there are no clues to the answers, as is usually the case in more traditional system-based books. The fully explanatory answers provide not only clinical information but a framework for answering similar questions - extremely useful on the actual day of the exam. Can be used at the beginning of the revision process - to check progress and highlight weaknesses. Can also be used as a last-minute check right at the end of revision - to be sure all bases have been covered. Ideal for group revision work, especially for the communication and role-play stations.

Essentials of Paediatrics - Nandu Thalange 2012-12-12

2013 BMA Medical Book Awards Highly Commended in Paediatrics! The perfect portable companion for trainees and medical students on clinical placements in paediatrics. Key features: Part of the Kumar & Clark family of revision titles Cases throughout Key points boxes included Includes self-assessment questions Appendices cover resuscitation, practical procedures, prescribing, fluids and electrolytes, and common syndromes Ideal for revision and examination preparation New to this edition: Two new editors Thoroughly updated and revised throughout
