Pediatric Gender Assignment - Stephen A. Zderic 2003-01-31

This book represents the proceedings from a conference that took place in Dallas in the spring of 1999 which was entitled "Pediatric Gender Assignment - A Critical Reappraisal". Some participants rightfully argued that the conference really focused on the issue of pediatric gender assignment, and that reassignment was not applied in most cases. Their comments were reflected in the title of this monograph. This multidisciplinary meeting was sponsored by a conference grant from the National Institutes of Health, and a broad inquiry into this complex topic took place from many points of view. Basic scientists offered insight into mechanisms of sexual differentiation of the gonads, physical phenotype

and imprinting of the central nervous system. Endocrinologists reviewed their experience in diagnosis and management, surgeons described traditional as well as innovative approaches, and there was strong representation from the ethical and behavioral sciences. In putting together such a panel, it was essential that we identify a cast of speakers who could address their viewpoints with strong convictions, and yet not let their passions render the meeting counter productive. We were not disappointed. While many differing points of view were firmly expressed by the panelists and audience, all viewpoints were accorded the respect they deserved. The concept behind the meeting and this book really originated in 1997 shortly after Diamond and Sigmundson published their long term follow up study of the John/Joan case.

Sevasadan - Munshi Premchand 2017-01-11

'Sevasadan' is one of the most representative novels of Munshi Premchand. Soon after it was published, the novel kicked up national debates on such pertinent social issues as prostitution and the place of women in the Indian society. Social taboos dominated the scenario as much as reformers' zeal to tight the rot in the social value system. The story oscillates round a glamour-struck young girl's life. who was brought up with utmost love and care but whose father had to suffer

ignominy at the hands of his adversaries for taking a once-in-lifetime bribe and being jailed for that. Her prospective engagement was broken because her mother, now made a destitute with her daughters, failed to meet the demand of dowry from the bridegroom's family. Hapless and stranded, she, along with her mother and sibling sister, was under care of her maternal-uncle. gets married to a middle-aged pauper and pushed to life-long poverty. She failed to get what she had been dreaming for since her childhood. She fought continual battles between aspiration for a respected prosperous lifestyle, and the existing value system which forced her to live with poverty. By the turns of events she ends up into a life of a tawaif, hatefully tries to come out of the nuisance but the irony of fate makes her the centre-point of all debates on how prostitutes could be rescued and rehabilitated. 'Sevasadan' exposes the time Premchand lived in. It also reflects how seriously the author had waged a battle, which is being fought in the Indian society even today.

A New Idea of India - Harsh Gupta Rajeev Mantri 2020-09-21

Adventures in Two Worlds - A.J. Cronin 2013-08-29

Adventures in Two Worlds - an autobiographical novel by A J Cronin, creator of television's Dr Finlay and author of The Citadel and many other bestsellers. A master storyteller, A J Cronin presents possibly his most fascinating tale. Taking material directly from his own life, he tells of the early struggles of a poor medical student in Scotland, the cruel crushing of all hopes of becoming a surgeon, the years as a ship's doctor and, later, life in the country practice that was the real Tannochbrae. There are many strange twists and turns - not the least of them the dramatic move from the world of medicine into that of literature when a novel 'written despairingly on twopenny exercise books, thrown out and rescued from the rubbish heap' was accepted by a publisher. And with Hatter's Castle a new career was born.

Solidification and Crystallization - Dieter M. Herlach 2006-03-06

Current interest in research of solidification of melts is focussed to understand crystal nucleation and crystal growth. They determine the solidified product with its physical properties. A detailed description of

these processes lead to the development and validation of physical models, which may form the basis of quantitative modelling of solidification routes in e.g. casting and foundry processes in order to develop a predictive capability in the design of materials during solidification. This book, based on a symposium held at EUROMAT 2003 aims to give an overview on current developments in the research of solidification and crystallisation of liquids. The materials of interest range from metals and their alloys over semiconductors and isolators to organic substances.
