Human Error in Aviation - R.Key Dismukes
2017-07-05

Most aviation accidents are attributed to human error, pilot error especially. Human error also greatly effects productivity and profitability. In his overview of this collection of papers, the editor points out that these facts are often misinterpreted as evidence of deficiency on the

part of operators involved in accidents. Human factors research reveals a more accurate and useful perspective: The errors made by skilled human operators - such as pilots, controllers, and mechanics - are not root causes but symptoms of the way industry operates. The papers selected for this volume have strongly influenced modern thinking about why skilled

experts make errors and how to make aviation error resilient.

uses numerous examples, problems, and real-world case studies to help readers master the knowledge and the skills required to succeed in service engineering.

Ghost in the Headlights - Lindsey Duga

2021-03-02

In this modern-day retelling of "The Legend of Sleepy Hollow," an angry ghost haunts a small-town road in search of revenge... When Brianna Jenson agreed to move in with her cruel uncle Shane in rural Pennsylvania, she didn't expect to find herself in the middle of a terrifying town legend. Every afternoon on her walk home from school, as the sun begins to set behind the overhanging branches of Shadowrun Road, Brianna hears footsteps following her -- footsteps that belong to no one. Then there's the car that races along the narrow country road with blinding lights and almost runs her over! That's when Brianna realizes... there's no one driving. It's almost as if someone -- or something -- is trying to get her attention. As Brianna

investigates what happened on Shadowrun Road, she discovers a town tragedy that has never been resolved. Can Brianna get to the bottom of this ghostly mystery before it's too late?

Management and Cost Accounting - Colin Drury
1997

The market-leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of today's student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision-making purposes within an organisation, however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real-

world mini cases, the text brings home the relevance of the subject matter to the real world of business.

Facilities Staffing Requirements for the Veterans Health Administration - "Resource Planning and Methodology for the Future" - National Academies of Sciences, Engineering, and Medicine 2020-04-30

The Veterans Health Administration (VHA) is America's largest integrated health care system, providing care at 1,243 health care facilities, including 172 medical centers and 1,063 outpatient sites of care of varying complexity, serving 9 million enrolled Veterans each year. In addition, VHA has opened outpatient clinics and established telemedicine and other services to accommodate a diverse veteran population and continues to cultivate ongoing medical research and innovation. Facilities specific to VHA fulfill clinical, operational, research laboratory, and administrative functions. Each site is designed to serve a geographical location with specific

health care needs. VHA's building inventory has sites of different ages, and often there is a mix of building size and age at each site or campus. At the request of the VHA, this study presents a comprehensive resource planning and staffing methodology guidebook for VHA Facility Management Programs by reviewing the tasks of VHA building facilities staff and recommending actions for the VHA to meet the mission goals of delivering patient care, research, and effective operations.

Fourier Integrals in Classical Analysis -

Christopher D. Sogge 2017-04-27

This advanced monograph is concerned with modern treatments of central problems in harmonic analysis. The main theme of the book is the interplay between ideas used to study the propagation of singularities for the wave equation and their counterparts in classical analysis. In particular, the author uses microlocal analysis to study problems involving maximal functions and Riesz means using the so-called half-wave operator. To keep the treatment self-contained, the author begins with a rapid review of Fourier analysis and also develops the necessary tools from microlocal analysis. This second edition includes two new chapters. The first presents Hörmander's propagation of singularities theorem and uses this to prove the Duistermaat–Guillemin theorem. The second concerns newer results related to the Keakeya conjecture, including the maximal Keakeya

estimates obtained by Bourgain and Wolff.

Principles of Cost Accounting - Christo Hurter
2018

Principles of Cost Accounting offers a solid theoretical foundation in cost accounting aligned with the curricula of the professional bodies Chartered Institute of Management Accountants (CIMA), Association of Chartered Certified Accountants (ACCA) and Association of Accounting Technicians (AAT). The Role of Human Factors in Home Health Care - National Research Council 2010-11-14

The rapid growth of home health care has raised many unsolved issues and will have consequences that are far too broad for any one group to analyze in their entirety. Yet a major influence on the safety, quality, and effectiveness of home health care will be the set of issues encompassed by the field of human factors research-the discipline of applying what is known about human capabilities and limitations to the design of products, processes, systems, and work environments. To address these challenges, the National Research Council began a multidisciplinary study to examine a diverse range of behavioral and human factors issues resulting from the increasing migration of medical devices, technologies, and care practices into the home. Its goal is to lay the groundwork for a thorough integration of human

factors research with the design and implementation of home health care devices, technologies, and practices. On October 1 and 2, 2009, a group of human factors and other experts met to consider a diverse range of behavioral and human factors issues associated with the increasing migration of medical devices, technologies, and care practices into the home. This book is a summary of that workshop, representing the culmination of the first phase of the study.

Applying IFRS Standards - Ruth Picker

2019-06-24

Understanding the main concepts of IFRS

Standards The fourth edition of Applying IFRS Standards explains the core principles of International Financial Reporting (IFRS) Standards. It also addresses the skills needed to apply the standards in business environments. The book begins with an overview of the International Accounting Standards Board (IASB) and how it establishes accounting standards. The general book topics are then covered in detail and include: income taxes, financial instruments, fair value measurement, property, inventories, employee benefits and more. Discussion questions, exercises and references are provided throughout the book.

Standard Costing - Colin Drury 1998-05
Standard costing is the foundation upon which much management accounting and budgetary practice rests, yet it is often misunderstood. In this book Colin Drury sets out the nature and scope of standard costing whilst clearly identifying its limitations. The calculation and interpretation of the full range of cost

accounting variances is covered, together with the formal analysis of the decision to investigate variances. The way in which standard costing information is recorded in the accounts is also dealt with in depth, as this step is essential to a full appreciation of the role of standard costing. Finally, the usefulness of traditional standard costing techniques in a modern production environment is assessed.
