Electric Words - Yorick Wilks 1996

One of the underlying messages of the book is that current research should be guided by both computational and theoretical tools and not only by statistical techniques - that matters have gone far beyond counting to encompass the

difficult province of meaning itself and how it can be formally expressed.

**Conceptual Structures: Leveraging Semantic Technologies** - Sebastian Rudolph  
2009-07-25

This book constitutes the refereed proceedings of the 17th International Conference on Conceptual Structures, ICCS 2009, which took place in Moscow, Russia, on July 26-31, 2009. The 18 papers presented together with 5 invited contributions were carefully reviewed and selected from approximately 50 submissions. Originally centered around research on knowledge representation and reasoning with conceptual graphs, over the years ICCS has broadened its scope to include innovations from a wider range of theories and related practices, among them other forms of graph-based formalisms like RDF or existential graphs, formal concept analysis, semantic Web technologies, ontologies, concept mapping and more.

[The Words of Selves](#) - Denise Riley 2000

In this extended meditation on the language of the self within contemporary social politics, the author ponders the question: What does it matter what you say about yourself? She studies why the requirement to be a something-or-other should be so hard to satisfy in a manner that rings true in the ears of its own subject.

*Afroasiatic Studies in Memory of Robert Hetzron*  
- Charles G. Häberl 2009-05-27

Robert Hetzron first organized the North American Conference on Afroasiatic Linguistics (NACAL) at the University of California, Santa Barbara in 1973 and passed away only six

months after it had completed a quarter century of annual meetings. He would undoubtedly have been pleased to know that NACAL is still going strong, and that ten years after his passing it attracted no fewer than thirty-six scholars from the United States, Canada, and eight other countries, who presented on topics near and dear to his heart such as phonology, morphology, syntax, language contact, classification, subgrouping, and the history of scholarship, in languages such as Amharic, Arabic, Aramaic, Egyptian, Hebrew, Omotic, and others, as well as the groups to which they pertain. Since he established it, NACAL has served a unique role among the meetings of learned societies in North America. Only a handful of organizations worldwide hold annual meetings dedicated to Afroasiatic linguistics, and NACAL is one of a very small number of venues where linguists from all sub-disciplines and schools of thought meet to share their research. NACAL is also an academic nexus, a

unique node at which graduate students at the beginning of their careers rub shoulders with the native speakers of the languages which they study and with the titans of their fields, men and women of an almost legendary stature such as Hetzron himself. This volume contains sixteen contributions from these scholars, on a broad cross-section of topics within the field of Afroasiatic linguistics.

**Engineering Documentation Control Practices & Procedures** - Elaine Monahan

*Hanging Out* - Ruth Garner 2002

There has been a huge increase in government and foundation funding for after-school programs, but there is very little published research on processes and outcomes (what is available is single-program analysis, often in the form of reports to funding agencies). This collection provides data on the operation of many programs and takes community contexts into account, showing what children actually like and how programs can attract and retain them.

*College Writing Skills with Readings* - John Langan 2003

*College Writing Skills with Readings*, Third Canadian Edition will help students master the traditional five-paragraph essay and variations on this essay structure. It is a very practical book with a number of special features to aid instructors and their students. Four principles are presented as keys to effective writing -- unity, support, coherence, and effective sentence skills. Activities and assignments are

numerous and varied; nearly two hundred activities and tests are included. The emphasis on logic and the pursuit of ideas and explanations in a sequential manner starts in the first chapter. Students are introduced to the two principles that are the bases of clear thinking and writing: making a point and providing support to back up that point. Each section of the book deals with a distinct aspect of writing. Instructors can therefore turn quickly and easily to the skills they want to present.

**Archives, Documentation, and Institutions of Social Memory** - Francis Xavier Blouin

2007-08-02

As sites of documentary preservation rooted in various national and social contexts, artifacts of culture, and places of uncovering, archives provide tangible evidence of memory for individuals, communities, and states, as well as defining memory institutionally within prevailing political systems and cultural norms. By assigning the prerogatives of record keeper to the archivist, whose acquisition policies, finding aids, and various institutionalized predilections mediate between scholarship and information, archives produce knowledge, legitimize political systems, and construct identities. Far from being mere repositories of data, archives actually embody the fragments of culture that endure as signifiers of who we are, and why. The essays in Archives, Documentation, and Institutions of Social Memory conceive of archives not simply

as historical repositories but as a complex of structures, processes, and epistemologies situated at a critical point of the intersection between scholarship, cultural practices, politics, and technologies.
