The Management of Technological Innovation - Mark Dodgson 2008-02-07

"By explaining the innovation process the book reveals the broad scope of MTI and its importance for company survival, growth and sustainability. It describes how MTI has to be managed strategically and how this is successfully achieved by formulating and implementing strategy and delivering value. Chapters provide frameworks, tools and techniques, and case studies on managing: innovation strategy, communities, and networks, R&D, design and new product and service development, operations and production, and commercialization." "This new edition has been fully revised and updated to reflect the latest teaching and research, and to ensure its continuing relevance to the contemporary world of MTI. It will be an important resource for academics, students, and managers throughout the world, is a recommended text for students of innovation and technology management at

postgraduate and undergraduate level, and is particularly valuable for MBA courses."--BOOK JACKET.

Strategic Management of Technology and Innovation - Garry D. Bruton 2011

THE STRATEGIC MANAGEMENT OF TECHNOLOGY AND INNOVATION, 2e, International Edition explores the fundamental connections linking core business strategy, technology, and innovation. The book illustrates how these functions intertwine to play a central role in process layout, systems, structural design, and product development, as well as supporting an organization's overall success. An integrated approach and reader-friendly style make the material accessible for readers of all backgrounds, and the book strikes an ideal balance between essential business theory and extensive practical insights and real-world applications. In addition, the Second Edition has been thoroughly updated to incorporate the latest trends and research, abundant current

examples and cases, and a useful set of new tools you can use to support effective strategic decision-making.

Research on Technological Innovation, Management and Policy - Richard S. Rosenbloom 1987

Volume 6 of Research on Technological Innovation, Management and Policy contains five papers on strategic change in firms and industries. All five discuss aspects of the interrelationships between technology strategy, competitive strategy, and organization and management. The first two address these at a level of the industry; the next two at firm level; in the final chapter, the level of analysis is primarily the technology. These five chapters are illustrative of themes in current research that are shaping the field of strategic management technology and innovation. They build well on earlier work in the field and thereby support its further empirical and theoretical development. They also provide useful insights for practicing

managers faced with the challenges of changing technologies and a rapid rate of innovation.

Strategic Management of Technology and Innovation - Robert A. Burgelman 2004

The 4th Edition of Strategic Management of Technology and Innovation by Burgelman, Christensen, and Wheelwright continues its unmatched tradition of market leadership, by using a combination of text, readings, and cases to bring to life the latest business research on these critical business challenges. New co-author Clay Christensen provides his insights on innovation management and new market entries through several new cases. Approximately 40% of the cases are entirely new to this edition. Strategic Management of Technology and Innovation takes the perspective of the general manager at the product line, business unit, and corporate levels. The book not only examines each of these levels in some detail, but also addresses the interaction between the different levels of general management - for example, the

fit between product strategy and business unit strategy, and the link between business and corporate level technology strategy. Each part of the book starts with an introductory chapter laying out an overall framework and offering a brief discussion of key tools and findings from existing literature. The remainder of each part offers a selected handful of seminar readings and case studies. Almost all of the cases deal with recent events and situations, including several that are concerned with the impact of the Internet. A few "classics" have been retained, however, because they capture a timeless issue or problem in such a definitive way that the historical date of their writing is irrelevant.

Global Perspectives on Technological

Innovation ~ VOL. 1 - Bing Ran 2013-03-01

Managing technological innovations and related policy and strategy issues have been a central focus of the new millennium. This book series presents an interdisciplinary scholarship and

dialogue on the management of innovation and technological change in a global context from a variety of perspectives, including strategic, managerial, behavioral, and policy issues. Papers selected in this volume have four prominent themes: the wide spread interests and the global application of the technological innovation; the practicality of the research on technological innovation implementation to foster success and financial growth; the socio-technical challenges behind innovation and creativity that might outweigh the benefits; and the new principles/practices/perspectives on our understanding of the technological innovation. Contributed by prominent scholars and practitioners from around the world in innovation, management and policy area, this book will become a very useful read for anyone who is interested in learning the most contemporary perspectives on the subject.

Management of Innovation and Product

Development - Marco Cantamessa 2015-08-25

Presenting an integrated and holistic perspective on innovation management and product design and development, this monograph offers a unique and original understanding of how these two perspectives are interconnected. This book explores these themes in a scientifically rigorous manner, associating academic findings with examples from business. It provides readers with the conceptual and decision-making tools required to understand and manage the process of innovation at different levels, from the analysis of industry-wide phenomena to the formulation of a strategy and from the planning of operations to the management of technical choices. Chapters cover innovation as an economic and social phenomenon, the formulation of innovation strategy, the management of product development processes and projects and the technical design of products and services. Offering an invaluable resource to postgraduate students in economics, business and

engineering, this book is also intended for managers and entrepreneurs. *Executive Strategy* - Frederick Betz 2002-04-24 A modern theory of executive strategy for the information age The information revolution has radically transformed virtually every aspect of business today. Yet, no book has fully addressed its impact on strategic management-until now. In *Executive Strategy: Strategic Management and Information Technology*, Frederick Betz builds on his pioneering work concerning the management of technical innovation to explore the powerful relationship between traditional strategic management and today's computer and communications technologies. By adapting established strategy-related concepts and processes to the strategic management challenges faced by companies in the information age, this book offers readers the background they need to guide processes ranging from the creation of strategic business models and the development of comprehensive

planning scenarios to the strategic management of business diversification and the formulation of information strategy. Concepts are developed with a survey of the older business literature on strategy and the newer information strategy literature, and illustrated by a wealth of new technology and e-commerce-related case studies. The case studies, presented in the book and on its accompanying Web site (www.execstrat.com), are drawn from leading companies such as Apple Computer, Pixar, AOL Time Warner, and Amazon.com. From the Internet and e-commerce to the role of computer-aided tools such as inventory control and project management software, the world of information technology is filled with innovations that have crucial ramifications for the strategic management of every business. This book equips present and future engineering and business professionals with the road map they need to help steer the modern organization skillfully through the twists and turns of this new and

exciting business landscape.

Global Financialization and Corporate Innovation Strategy - Hwan Joo Seo 2022

"Technological innovation is a core aspect of corporate and national competitiveness and it is not only complex-requiring cooperation and coordination among many stakeholders-but it also involves high risk due to uncertainty. Financial markets are a key to successful technological innovation. This book looks at how traditional financing and non-traditional ones transform corporate innovation strategy. This book reviews Korean companies to illustrate the impact of financialization on technological innovation through the relationships among financialization, managerial myopia and short-termism of innovation strategy. It does so by conducting an empirical study using Korean firm and USPTO data from the period of 1980 to 2017. By analyzing the innovation capabilities of Korean companies and presenting indicators of technological competitiveness, it offers insights

into how financialization has influenced organizational behaviour, causing them to shift strategy formulation, decision making for production, investment and technological innovation away from a long-term perspective to short-term one. This concise book will be of interest to those interested in strategy and entrepreneurship innovation, especially policy makers focusing on financialization or national level innovation strategies"--

Technology and Innovation for Marketing -

Eleonora Pantano 2018-08-28

Marketers have recently witnessed an explosion

of technology-based innovation that has profoundly affected their management and strategy. This technology can be a gift - enabling them to get closer to their customers and their needs - or a poisoned chalice, should they fail to keep up with technology innovation and find themselves, or their products, irrelevant. In this book, Eleonora Pantano, Clara Bassano and Constantinos-Vasilios Priporas describe this phenomenon as the 'consumer pull vs technology push' that forces marketing strategists to innovate to survive and thrive. It is a guide to the emerging approaches to marketing prompted by the impact of innovation and technology, in order to help students, scholars and practitioners work innovation and change to their best advantage. Including a wealth of empirical and theoretical contributions, models, approaches methods, tools and case studies, this book is essential reading for marketing strategy, digital marketing, and innovation students, as well as marketing practitioners.

Strategic Management of Technological Innovation - Melissa A. Schilling 2020

Strategic Management of Technology and Innovation - Robert A. Burgelman 2001
Burgelman, Maidique, and Wheelwright have written the market leading text for a course in technology and innovation. This text covers the latest research by using a combination of text, readings, and cases. Based on reviewer response to a survey, the authors have updated many of the cases and instructors found outdated or lacking. As in the current edition, the book has a strong case foundation at Harvard and Stanford. Classic cases such as Claire McCloud have been kept, while newer cases such as Intel Corporation in 1999 have been added. There is also a strong set of readings from sources such as Harvard Business Review, California Management Review, and Sloan Management Review.

Quirky - Melissa A Schilling 2018-02-13

The science behind the traits and quirks that drive creative geniuses to make spectacular breakthroughs What really distinguishes the people who literally change the world--those creative geniuses who give us one breakthrough after another? What differentiates Marie Curie or Elon Musk from the merely creative, the many one-hit wonders among us? Melissa Schilling, one of the world's leading experts on innovation, invites us into the lives of eight people--Albert Einstein, Benjamin Franklin, Elon Musk, Dean Kamen, Nikola Tesla, Marie Curie, Thomas Edison, and Steve Jobs--to identify the traits and experiences that drove them to make spectacular breakthroughs, over and over again. While all innovators possess incredible intellect, intellect alone, she shows, does not create a breakthrough innovator. It was their personal, social, and emotional quirks that enabled true genius to break through--not just once but again and again. Nearly all of the innovators, for example, exhibited high levels of social

detachment that enabled them to break with norms, an almost maniacal faith in their ability to overcome obstacles, and a passionate idealism that pushed them to work with intensity even in the face of criticism or failure. While these individual traits would be unlikely to work in isolation--being unconventional without having high levels of confidence, effort, and goal directedness might, for example, result in rebellious behavior that does not lead to meaningful outcomes--together they can fuel both the ability and drive to pursue what others deem impossible. Schilling shares the science behind the convergence of traits that increases the likelihood of success. And, as Schilling also reveals, there is much to learn about nurturing breakthrough innovation in our own lives--in, for example, the way we run organizations, manage people, and even how we raise our children.

The Management Of Technological Innovation Pb Revised Edition - David M. Gann Mark Dodgson, Ammon Salter 2008-04

The Management of Technological Innovation (MTI) is one of the most important challenges facing businesses today. Innovation has become the fundamental driver of competitiveness for firms of all sizes in virtually all business sectors and nations. The first edition of this book has become one of the most popular texts for students of innovation and technology management. This new edition sees David Gann and Ammon Salter join Mark Dodgson as authors, drawing on their combined experience of 60 years of researching and teaching MTI. It combines the most relevant theoretical analysis with contemporary and historical empirical evidence to provide a comprehensive, yet concise and readable, guide to the challenges of MTI. By explaining the innovation process the book reveals the broad scope of MTI and its importance for company survival, growth and sustainability. It describes how MTI has to be managed strategically and how this is successfully achieved by formulating and

implementing strategy and delivering value. Chapters provide frameworks, tools and techniques, and case studies on managing: innovation strategy, communities, and networks, RandD, design and new product and service development, operations and production, and commercialization. Based on robust analysis, the book provides a wide range of empirical evidence from a huge diversity of case studies, with around fifty case studies newly written for this edition. It analyses MTI in all parts of the world, in companies large and small, and in services, manufacturing, and resource-based business sectors. This new edition has been fully revised and updated to reflect the latest teaching and research, and to ensure its continuing relevance to the contemporary world of MTI. It will be an important resource for academics, students, and managers throughout the world, is a recommended text for students of innovation and technology management at postgraduate and undergraduate level, and is

particularly valuable for MBA courses.

Managing Technological Innovation: Tools And Methods - Daim Tugrul U 2017-03-09

The management of technological innovation is both an art, as well as a science; the process involves the know-how and technological core skills to deliver the functionality on the one hand, and (with an ear on the ground) the ability to identify changes in technologies to come up with new innovations on the other. This requires, as a result, frameworks, system tools, and methodologies to improve the yield in innovations. Managing Technological Innovation provides a set of tools and case studies for R&D managers to effectively manage technological innovations — from the identifying of

technological needs to the launch of the product. The book is divided into five parts. Part 1 addresses the policies and strategies necessary to provide direction to R&D organizations in the management of technological innovation. Part 2 focuses on technological assessment; presenting the methods available to better matching of technologies to strategic directions, supported with case studies to illustrate the evaluation methods. Part 3 covers the development and building of technological portfolios with new products, as well as mitigation strategies. Part 4 focus on the execution phase of built portfolios — the development of new products. And finally, Part 5 rounds up with a study on the factors which impact the diffusion of technological innovations into the market place. This book is a practical guide for R&D professions and designers, as well as a case study reference for graduate students in pursuit of their project work.

Ebook: Strategic Management of Technological Innovation

Bringing Technology and Innovation into the

Boardroom - European Institute for Technology and Innovation Management 2003-12-19
Europe is waking up to the challenge of technology and innovation. We see EU commitment to spend 3% of GDP on R&D, but who is thinking about how to spend? Who is thinking about technology management? Does the corporate board have the means to manage this spend? Should some percentage of the R&D be spent on improving technology and innovation management? This is where this book makes a contribution. It brings together the latest practice, research findings and thinking, presented in a way that addresses top management requirements. The goal is to secure the economic future of the firm, in the context of a sustainable industry and society. Using the ideas and methods in this book, the board can assess and improve its own ability to deal with the challenge of technology and innovation.
Managing Technological Innovation - Frederick Betz 2011-02-09

Written by the author who helped crystalize the field of technology management and the management of innovation with the first two editions of *Managing Technological Innovation*, this Third Edition brings the subject in line with current business strategy. It also presents information in a newer organized format that aligns more closely with how the topics are presented and discussed in the classroom. Also included is a wider discussion of how science and technology interact with the global economy.

Strategic Management of Technological Innovation - MELISSA SCHILLING 2012-10-30
Strategic Management of Technological Innovation, 4e by Melissa Schilling is the first comprehensive and rigorous, yet accessible text for the Technology and Innovation Management course. Unlike other books, Schilling's approach synthesizes the major research in the field, providing students with the knowledge needed to enhance case discussion and analysis. The

subject is approached as a strategic process, and as such, is organized to mirror the strategic management process used in most strategy textbooks, progressing from assessing the competitive dynamics of a situation, to strategy formulation, to strategy implementation. As a brief, affordable paperback, it is ideal to package with cases. Recommended case sets from the author are available through McGraw-Hill Create or from the Harvard Business School Case Database.

and engineering students.

Technology, Innovation, and Enterprise Transformation - Wadhwa, Manish 2014-09-30

Technical advancements are an important part of modern society, but particularly important in the business world. The success or failure of business operations can be affected by the technical operations working within it. *Technology, Innovation, and Enterprise Transformation* addresses the crucial relationship between a business and its technical implementations, and how current innovations are changing how the industry operates. Highlighting current theoretical frameworks, novel empirical research discoveries, and fundamental literature surveys, this book is an essential reference source for academicians, professionals, and researchers who are interested in the latest technical insights within the business field.

Managing Corporate Innovation - Adalberto Rangone 2019-11-14

This book makes a valuable contribution to innovation management in the form of an interdisciplinary analysis of contemporary international approaches. By introducing the concept of a 'techno-corporate gap,' it also highlights the crucial role that companies play in creating and managing innovation in order to increase (or decrease) the technological gap between countries, and in their economic development. The originality of the book lies in its systems thinking oriented approach to the techno-corporate gap and technological gap, and their relation to corporate governance. These aspects are analyzed in detail, and not merely from an economic standpoint, but also with regard to innovativeness and regional social development.
